Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different

than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

The House of Hades Lars Albinus, 2000 This detailed scrutiny of the ancient Greek perception and understanding of life after death is principally concerned with how the Greeks communicated their beliefs. The first part of the book examines the Greek cult of the dead through Homer's works, such as in the presentation of Patroclus' funeral, the hero's 'psyche' and the underworld. Albinus secondly looks at the Orphic mystical tradition which originated in the 7th and 6th centuries BC and offered a more positive view of an individual's fate. The final section briefly examines other mystery cults, such as the Eleusinian cult. The argument, largely based on linguistic details, is aimed more at specialists in Greek mysticism than at a general readership.

Death in the Greek World Maria Serena Mirto, 2012 Examines ancient Greek conceptions of death and the afterlife In our contemporary Western society, death has become taboo. Despite its inevitability, we focus on maintaining youthfulness and well-being, while fearing death's intrusion in our daily activities. In contrast, observes Maria Serena Mirto, the ancient Greeks embraced death more openly and effectively, developing a variety of rituals to help them grieve the dead and, in the process, alleviate anxiety and suffering. In this fascinating book, Mirto examines conceptions of death and the afterlife in the ancient Greek world, revealing few similarities-and many differences-between ancient and modern ways of approaching death. Exploring the cultural and religious foundations underlying Greek burial rites and customs, Mirto traces the evolution of these practices during the archaic and classical periods. She explains the relationship between the

living and the dead as reflected in grave markers, epitaphs, and burial offerings and discusses the social and political dimensions of burial and lamentation. She also describes shifting beliefs about life after death, showing how concepts of immortality, depicted so memorably in Homer's epics, began to change during the classical period. Death in the Greek World straddles the boundary between literary and religious imagination and synthesizes observations from archaeology, visual art, philosophy, politics, and law. The author places particular emphasis on Homer's epics, the first literary testimony of an understanding of death in ancient Greece. And because these stories are still so central to Western culture, her discussion casts new light on elements we thought we had already understood. Originally written and published in Italian, this English-language translation of *Death in the Greek World* includes the most recent scholarship on newly discovered texts and objects, and engages the latest theoretical perspectives on the gendered roles of men and women as agents of mourning. The volume also features a new section dealing with hero cults and a new appendix outlining fundamental developments in modern studies of death in the ancient Greek world. Volume 44 in the Oklahoma Series in Classical Culture

Maria Serena Mirto is Associate Professor of Classical Philology, Department of Classics, University of Pisa, Italy. A. M. Osborne holds an MA in Modern and Medieval Languages from the University of Cambridge, and an MA with distinction in Literary Translation from the University of East Anglia. A resident of the United Kingdom, she currently translates both academic and literary texts.
