Sorry Not Sorry Naya Rivera, 2016-09-13 Funny and deeply personal, *Sorry Not Sorry* recounts Glee star Naya Rivera's successes and missteps, urging young women to pursue their dreams and to refuse to let past mistakes define them. Navigating through youth and young adulthood isn't easy, and in *Sorry Not Sorry*, Naya Rivera shows us that we're not alone in the highs, lows, and in-betweens. Whether it's with love and dating, career and ambition, friends, or gossip, Naya inspires us to follow our own destiny and step over--or plod through--all the crap along the way. After her rise and fall from early childhood stardom, barely eking her way through high school, a brief stint as a Hooters waitress, going through thick and thin with her mom/manager, and resurrecting her acting career as Santana Lopez on *Glee*, Naya emerged from these experiences with some key life lessons: *Sorry*: - All those times I scrawled I HATE MY MOM in my journal. So many moms and teenage daughters don't get along--we just have to realize it's nothing personal on either side. - At-home highlights and DIY hair extensions. Some things are best left to the experts, and hair dye is one of them. - Falling in love with the idea of a person, instead of the actual person. *Not Sorry*: - That I don't always get along with everyone. Having people not like you is a risk you have to take to be real, and I'll take that over being fake any day. - Laughing at the gossip instead of getting upset by it. - Getting my financial disasters out of the way early--before I was married or had a family--so that the only credit score that I wrecked was my own. Even with a successful career and a family that she loves more than anything else, Naya says, There's still a thirteen-year-old girl inside of me making detailed lists of how I can improve, who's never sure of my own self-worth. *Sorry Not Sorry* is for that thirteen-year-old in all of us.

Papertoy Monsters Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids--paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), *Papertoy Monsters* offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of *Uglydolls* and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Papertoy Glowbots Brian Castleforte, 2016-08-23 Origami meets amazing creatures in a book of paper craft fun! *Papertoy Glowbots* introduces 46 robots that have the added cool factor of lighting up, whether using glow-in-the-dark stickers that come with the book or light sources like flashlights,

Christmas tree lights, and electric tea lights. The 46 die-cut paper robots are created by Brian Castleforte, author of Papertoy Monsters, along with the hottest papertoy designers from around the world. Meet the robots and read about their entertaining backstories in the front, then turn to the card stock section in the back to build them. The templates are die-cut and ready to pop out, fold, and glue. Bold, colorful graphics ensure the robots look as amazing in the daytime as they do with the lights off.

Rewilding European Landscapes Henrique M. Pereira, Laetitia M.

Navarro, 2015-05-04 Some European lands have been progressively alleviated of human pressures, particularly traditional agriculture in remote areas. This book proposes that this land abandonment can be seen as an opportunity to restore natural ecosystems via rewilding. We define rewilding as the passive management of ecological successions having in mind the long-term goal of restoring natural ecosystem processes. The book aims at introducing the concept of rewilding to scientists, students and practitioners. The first part presents the theory of rewilding in the European context. The second part of the book directly addresses the link between rewilding, biodiversity, and habitats. The third and last part is dedicated to practical aspects of the implementation of rewilding as a land management option. We believe that this book will both set the basis for future research on rewilding and help practitioners think about how rewilding can take place in areas under their management.

Multivariate Statistical Machine Learning Methods for Genomic Prediction

Osval Antonio Montesinos López, Abelardo Montesinos López, José

Crossa, 2022-02-14 This book is open access under a CC BY 4.0 license This open access book brings together the latest genome base prediction models currently being used by statisticians, breeders and data scientists. It provides an accessible way to understand the theory behind each statistical learning tool, the required pre-processing, the basics of model building, how to train statistical learning methods, the basic R scripts needed to implement each statistical learning tool, and the output of each tool. To do so, for each tool the book provides background theory, some elements of the R statistical software for its implementation, the conceptual underpinnings, and at least two illustrative examples with data from real-world genomic selection experiments. Lastly, worked-out examples help readers check their own comprehension. The book will greatly appeal to readers in plant (and animal) breeding, geneticists and statisticians, as it provides in a very accessible way the necessary theory, the appropriate R code, and illustrative examples for a complete understanding of each statistical learning tool. In addition, it weighs the advantages and disadvantages of each tool.

Textbook of Plastic and Reconstructive Surgery Deepak K. Kalaskar, Peter E M

Butler, Shadi Ghali, 2016-08-02 Written by experts from London's renowned Royal Free Hospital, Textbook of Plastic and Reconstructive Surgery offers a comprehensive overview of the vast topic of reconstructive plastic surgery and its various subspecialties for introductory plastic surgery and surgical science courses. The book comprises five sections covering the fundamental principles of plastic surgery, cancer, burns and trauma, paediatric plastic surgery and aesthetic surgery, and covers the breadth of knowledge that students need to further their career in this exciting field. Additional coverage of areas in which reconstructive surgery techniques are called upon includes abdominal wall reconstruction, ear reconstruction and genital

reconstruction. A chapter on aesthetic surgery includes facial aesthetic surgery and blepharoplasty, aesthetic breast surgery, body contouring and the evolution of hair transplantation. The broad scope of this volume and attention to often neglected specialisms such as military plastic surgery make this a unique contribution to the field. Heavily illustrated throughout, *Textbook of Plastic and Reconstructive Surgery* is essential reading for anyone interested in furthering their knowledge of this exciting field. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at

Ethnicity and Family Therapy Monica McGoldrick, John K. Pearce, Joe Giordano, 1982-11-10 Social, cultural, and religious characteristics that are relevant to working with Black American families, illustrated with case examples and hands on guide to developing cultural awareness of a specific ethnic population.

Book of Rhymes Adam Bradley, 2017-06-27 If asked to list the greatest innovators of modern American poetry, few of us would think to include Jay-Z or Eminem in their number. And yet hip hop is the source of some of the most exciting developments in verse today. The media uproar in response to its controversial lyrical content has obscured hip hop's revolution of poetic craft and experience: Only in rap music can the beat of a song render poetic meter audible, allowing an MC's wordplay to move a club-full of eager listeners. Examining rap history's most memorable lyricists and their inimitable techniques, literary scholar Adam Bradley argues that we must understand rap as poetry or miss the vanguard of poetry today. *Book of Rhymes* explores America's least understood poets, unpacking their surprisingly complex craft, and according rap poetry the respect it deserves.

Glee and New Directions for Social Change Brian C. Johnson, Daniel K. Faill, 2015-02-27 In the fall of 2009, the Fox network took a bold step in their primetime television lineup. Borrowing from the success of reality music performance shows like its own *American Idol*, the network introduced us to the students at McKinley High School, a fictional high school in Lima, OH, and home to the glee club known as the New Directions. The group is made up of freaks and geeks who feel the wrath of being "different." The cool kids are hell bent on making life difficult for the students in glee club. Yet, because of the determination of Mr. Will Schuester, the club's advisor, along with a few great songs, *Glee* has brought a new tone of inclusion to modern television and direct parallels can be seen between the experiences of the show choir members and what is happening in contemporary society. *Glee* has shown the importance of examining the intersections of pop culture and social issues; this text will encourage thinking on how effective the show has been beyond the screen. Essays provide critical analyses of the show, its characters, and its overall usefulness as a commentary on social issues. The show's content often deals with subject matter that would lend easily to critique around such social issues as sexuality, bullying, interpersonal communication, conflict resolution, and family relationships. This text invites readers to examine the intersections between media, society, and the individual.

The Man's Guide to Women John Gottman, Julie Schwartz Gottman, Douglas Abrams, Rachel Carlton Abrams, M.D., 2016-02-02 Results from world-renowned relationship expert John Gottman's famous Love Lab have proven an incredible

truth: Men make or break relationships. Based on 40 years of research, *The Man's Guide to Women* unlocks the mystery of how to attract, satisfy, and succeed with a woman for a lifetime. For the first time ever, there is a science-based answer to the age-old question: What do women really want in a man? Dr. Gottman, author of the New York Times bestseller *The Seven Principles for Making Marriage Work*, and his wife and collaborator, clinical psychologist Julie Schwartz Gottman, PhD, have pored over the research along with bestselling coauthors Douglas Abrams and Rachel Carlton Abrams, MD. Together, they have written this definitive guide for men, providing answers on everything from how to approach a woman and build a connection with her to how to truly satisfy her in bed and know when the relationship is on the right track. *The Man's Guide to Women* is a must-have playbook for how to play—and win—the game of love.

The Craft and Science of Coffee Britta Folmer, 2016-12-16 *The Craft and Science of Coffee* follows the coffee plant from its origins in East Africa to its current role as a global product that influences millions of lives through sustainable development, economics, and consumer desire. For most, coffee is a beloved beverage. However, for some it is also an object of scientific study, and for others it is approached as a craft, both building on skills and experience. By combining the research and insights of the scientific community and expertise of the crafts people, this unique book brings readers into a sustained and inclusive conversation, one where academic and industrial thought leaders, coffee farmers, and baristas are quoted, each informing and enriching each other. This unusual approach guides the reader on a journey from coffee farmer to roaster, market analyst to barista, in a style that is both rigorous and experience based, universally relevant and personally engaging. From on-farming processes to consumer benefits, the reader is given a deeper appreciation and understanding of coffee's complexity and is invited to form their own educated opinions on the ever changing situation, including potential routes to further shape the coffee future in a responsible manner. Presents a novel synthesis of coffee research and real-world experience that aids understanding, appreciation, and potential action. Includes contributions from a multitude of experts who address complex subjects with a conversational approach. Provides expert discourse on the coffee value chain, from agricultural and production practices, sustainability, post-harvest processing, and quality aspects to the economic analysis of the consumer value proposition. Engages with the key challenges of future coffee production and potential solutions.

Geospatial Thinking Marco Painho, Maribel Yasmina Santos, Hardy Pundt, 2010-07-20 For the fourth consecutive year, the Association of Geographic Information Laboratories for Europe (AGILE) promoted the edition of a book with the collection of the scientific papers that were submitted as full-papers to the AGILE annual international conference. Those papers went through a competitive review process. The 13 AGILE conference call for full-papers of original and unpublished fundamental scientific research resulted in 54 submissions, of which 21 were accepted for publication in this volume (acceptance rate of 39%). Published in the Springer Lecture Notes in Geoinformation and Cartography, this book is associated to the 13 AGILE Conference on Geographic Information Science, held in 2010 in Guimarães, Portugal, under the title "Geospatial Thinking". The efficient use of

geospatial information and related technologies assumes the knowledge of concepts that are fundamental components of Geospatial Thinking, which is built on reasoning processes, spatial conc- tualizations, and representation methods. Geospatial Thinking is associated with a set of cognitive skills consisting of several forms of knowledge and cognitive operators used to transform, combine or, in any other way, act on that same knowledge. The scientific papers published in this volume cover an important set of topics within Geoinformation Science, including: Representation and Visualisation of Geographic Phenomena; Spatiotemporal Data Analysis; Geo-Collaboration, Participation, and Decision Support; Semantics of Geoinformation and Knowledge Discovery; Spatiotemporal Modelling and Reasoning; and Web Services, Geospatial Systems and Real-time Appli- tions.

Between Crown & Commerce Junko Takeda, 2011-05-01 This “carefully argued and well-written study” examines French royal statecraft in the globalizing economy of the early modern Mediterranean (Choice). This is the story of how the French Crown and local institutions accommodated one another as they sought to forge acceptable political and commercial relationships. Junko Thérèse Takeda tells this tale through the particular experience of Marseille, a port the monarchy saw as key to commercial expansion in the Mediterranean. At first, Marseille’s commercial and political elites were strongly opposed to the Crown’s encroaching influence. Rather than dismiss their concerns, the monarchy cleverly co-opted their civic traditions, practices, and institutions to convince the city’s elite of their important role in Levantine commerce. Chief among such traditions were local ideas of citizenship and civic virtue. As the city’s stature throughout the Mediterranean grew, however, so too did the dangers of commercial expansion as exemplified by the arrival of the bubonic plague. During the crisis, Marseille’s citizens reevaluated merchant virtue, while the French monarchy found opportunities to extend its power. Between Crown and Commerce deftly combines a political and intellectual history of state-building, mercantilism, and republicanism with a cultural history of medical crisis. In doing so, the book highlights the conjoined history of broad transnational processes and local political change.

Edible Insects Arnold van Huis, Food and Agriculture Organization of the United Nations, 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to

the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Testimonios: Stories of Latinx and Hispanic Mathematicians Pamela E. Harris, 2021-08-16 *Testimonios* brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. *Testimonios* seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

The Paleoanthropology and Archaeology of Big-Game Hunting John D. Speth, 2010-09-08 Since its inception, paleoanthropology has been closely wedded to the idea that big-game hunting by our hominin ancestors arose, first and foremost, as a means for acquiring energy and vital nutrients. This assumption has rarely been questioned, and seems intuitively obvious—meat is a nutrient-rich food with the ideal array of amino acids, and big animals provide meat in large, convenient packages. Through new research, the author of this volume provides a strong argument that the primary goals of big-game hunting were actually social and political—increasing hunter's prestige and standing—and that the nutritional component was just an added bonus. Through a comprehensive, interdisciplinary research approach, the author examines the historical and current perceptions of protein as an important nutrient source, the biological impact of a high-protein diet and the evidence of this in the archaeological record, and provides a compelling reexamination of this long-held conclusion. This volume will be of interest to researchers in Archaeology, Evolutionary Biology, and Paleoanthropology, particularly those studying diet and nutrition.

The Takeover of Social Policy by Financialization Lena Lavinas, 2017-03-25 This book critically addresses the model of social inclusion that prevailed in Brazil under the rule of the Workers Party from the early 2000s until 2015. It examines how the emergence of a mass consumer society proved insufficient, not only to overcome underdevelopment, but also to consolidate the comprehensive social protection system inherited from Brazil's 1988 Constitution. By juxtaposing different theoretical frameworks, this book scrutinizes how the current finance-dominated capitalism has reshaped the role of social policy, away from rights-based decommodified benefits and towards further commodification. This constitutes the Brazilian paradox: how a center-left government has promoted and boosted financialization through a market incorporation strategy using credit as a lever for expanding financial inclusion. In so doing, it has pushed the subjection of social policy further into the logic of financial markets.

The Cortisol Connection Shawn Talbott, 2011-01-01 Why does stress make you

fat? What can you ultimately do about it? Shawn Talbott answered these questions in THE CORTISOL CONNECTION. Cortisol is the body's main stress hormone, prompting our fight or flight mechanism when dealing with a highly stressful situation, like being chased by a lion. However, the human body was made to deal with short bursts of stress (like being chased by a lion), not prolonged, continuous levels of stress (like mortgage payments, project deadlines, and traffic jams). This kind of stress causes the body's cortisol levels to rise, and scientific research has shown that high cortisol levels are associated with obesity, diabetes, fatigue, and even Alzheimer's disease. This new edition describes the results of the latest research about the connection between cortisol and HSD, and cortisol and testosterone. If we keep cortisol and HSD and testosterone within normal ranges, we're able to maximize the metabolic effect of diet and exercise regimen – and improve weight loss. In the first edition, Talbott introduced his SENSE program, that teaches participants how to manage stress and reduce cortisol levels. The program has been refined in the second edition with the help of the new research and the results of Talbott's test of the SENSE program over the past 5 years – he know it works. For the past 5 years, he has been actively researching (and refining and tweaking) this popular program to make it more and more effective in helping people to lose weight. SENSE is a program that combines Stress management, Exercise, Nutrition, Supplementation, and Evaluation into a comprehensive and highly effective (yet easy to follow) program that delivers results. During these 5 years, Talbott has combined different dietary approaches with varied exercise regimens and myriad supplement combinations – until finding just the right combination that works best for the majority of people. This edition contains 25% new material and a revised program to help everyone manage cortisol, stress, and their weight.

Pattern Recognition and Image Analysis Jorge S. Marques, 2005-05-23 The two-volume set LNCS 3522 and 3523 constitutes the refereed proceedings of the Second Iberian Conference on Pattern Recognition and Image Analysis, IbPRIA 2005, held in Estoril, Portugal in June 2005. The 170 revised full papers presented were carefully reviewed and selected from 292 submissions. The papers are organized in topical sections on computer vision, shape and matching, image and video processing, image and video coding, face recognition, human activity analysis, surveillance, robotics, hardware architectures, statistical pattern recognition, syntactical pattern recognition, image analysis, document analysis, bioinformatics, medical imaging, biometrics, speech recognition, natural language analysis, and applications.
