Mapping Chengde Philippe Foret, 2000-06-01 The imperial residence of Chengde was built by two powerful and ambitious Manchu emperors between 1703 and 1780 in the mountains of Jehol. This volume, the first scholarly publication in English on the Manchu summer capital, reveals how this unlikely architectural and landscape enterprise came to help forge a dynasty's multicultural identity and concretize its claims of political legitimacy. Using both visual and textual materials, the author explores the hidden dimensions of landscape, showing how geographical imagination shaped the aesthetics of Qing court culture while proposing a new interpretation of the mental universe that conceived one of the world's most remarkable examples of imperial architecture.

The Political Economy of an African Society in Tranformation: the Case of Macca Oromo (Ethiopia) Tesema Ta'a, 2006 The official historiography of the Ethiopian Empire as well as the majority of the publications on Ethiopian history by European authors used to view the country as a single cultural whole, and to deal only with the history of the Christian empire. The different historical experiences of the Ethiopian multiethnic society and culture used to be usually ignored. In contrast to such one-sided approach this book deals with the Macca Oromo activities, social transformation and historical experiences in the western part of Central Ethiopia, focusing on the political economy of the region. The sources for the book include: 1. written documents in Ethiopian languages (Amharic and Ge'ez), e.g. archival materials, 2. reports by European travellers and missionaries, 3. recent secondary literature, and 4. traditions and oral history collected mainly in Wallagga in 1972-73 and 1979-80. In that region the Macca states had played an important political and economical role until they were subjugated by the order of Menelik II and incorporated into the Ethiopian Empire at the end of the 19th century. Tesema Ta'a belongs to the first generation of the Ethiopian historiographers who graduated from Addis Ababa University in the seventies, and later formed the teaching staff of the History department in Addis Ababa.

**Agency in Ancient Writing** Joshua Englehardt, 2012-12-15 Individual agents are frequently evident in early writing and notational systems, yet these systems have rarely been subjected to the concept of agency as it is traceable in archeology. Agency in Ancient Writing addresses this oversight, allowing archeologists to identify and discuss real, observable actors and actions in the archaeological record. Embracing myriad ways in which agency can be interpreted, ancient writing systems from Mesoamerica, Mesopotamia, Egypt, Crete, China, and Greece are examined from a textual perspective as both archaeological objects and nascent historical documents. This allows for

distinction among intentions, consequences, meanings, and motivations, increasing understanding and aiding interpretation of the subjectivity of social actors. Chapters focusing on acts of writing and public recitation overlap with those addressing the materiality of texts, interweaving archaeology, epigraphy, and the study of visual symbol systems. Agency in Ancient Writing leads to a more thorough and meaningful discussion of agency as an archaeological concept and will be of interest to anyone interested in ancient texts, including archaeologists, historians, linguists, epigraphers, and art historians, as well as scholars studying agency and structuration theory.

*Patent Pledges* Jorge L. Contreras, Meredith Jacob, 2017-03-31 Patent holders are increasingly making voluntary, public commitments to limit the enforcement and other exploitation of their patents. The best-known form of patent pledge is the so-called FRAND commitment, in which a patent holder commits to license patents to manufacturers of standardized products on terms that are "fair, reasonable and non-discriminatory." Patent pledges have also been appearing in fields well beyond technical standard-setting, including open source software, green technology and the biosciences. This book explores the motivations, legal characteristics and policy goals of these increasingly popular private ordering tools.

**Illicit Trade Governance Frameworks to Counter Illicit Trade**

OECD, 2018-03-01 This report examines governance frameworks to counter illicit trade. It looks at the adequacy and effectiveness of sanctions and penalties applicable, the steps parties engaged in illicit trade take to lower the risk of detection - for example through small shipments - and the use of free trade ...

*Milk and Dairy Products in Human Nutrition* Ellen Muehlhoff, Anthony Bennett (Dairy scientist), Deirdre MacMahon (Nutrition consultant), 2013 Milk and dairy products are a vital source of nutrition for many people. They also present livelihood opportunities for farm families, processors and other stakeholders in dairy value chains. Consumers, industry and governments need up-to-date information on how milk and dairy products can contribute to human nutrition and how dairy-industry development can best contribute to increasing food security and alleviating poverty. This publication is unique in drawing together information on nutrition, and dairy-industry development, providing a rich source of useful material on the role of dairy products in human nutrition and the way that investment in dairy-industry development has changed.

Intellectual Property and the U. S. Economy: Industries in Focus Economics and Economics and Statistics Administration, United States Patent and Trademark Office, 2016-06-24 This report by the Economics and Statistics Administration (ESA) and the U.S. Patent and Trademark Office (USPTO) of the U.S. Department of Commerce attempts to identify the first-order players that are growing IP in the U.S. economy and protecting their innovations through patents, trademarks, or copyrights. These IP-intensive industries support

tens of millions of jobs and contribute several trillion dollars to our gross domestic product (GDP). This report not only estimates the contributions of these industries to our economy, but also gauges the ripple, or domino, effects they have on employment throughout the economy. They represent the leading edge of our economy that is built on the ingenuity of the American people and their future growth is increasingly dependent on effective protection of IP rights both here and abroad.

**Craft: Volume 01** Carla Sinclair, 2006-11-28 CRAFT is the first project-based magazine dedicated to the renaissance that is occurring within the world of crafts. Celebrating the DIY spirit, CRAFT's goal is to unite, inspire, inform and entertain a growing community of highly imaginative people who are transforming traditional art and crafts with unconventional, unexpected and even renegade techniques, materials and tools; resourceful spirits who undertake amazing crafting projects in their homes and communities. Volume 01, the premier issue, features 23 projects with a twist! Make a programmable LED shirt, turn dud shoes into great knitted boots, felt an iPod cocoon, embroider a skateboard, and much more.

*Computer Vision – ECCV 2020* Andrea Vedaldi, Horst Bischof, Thomas Brox, Jan-Michael Frahm, 2020-12-02 The 30-volume set, comprising the LNCS books 12346 until 12375, constitutes the refereed proceedings of the 16th European Conference on Computer Vision, ECCV 2020, which was planned to be held in Glasgow, UK, during August 23-28, 2020. The conference was held virtually due to the COVID-19 pandemic. The 1360 revised papers presented in these proceedings were carefully reviewed and selected from a total of 5025 submissions. The papers deal with topics such as computer vision; machine learning; deep neural networks; reinforcement learning; object recognition; image classification; image processing; object detection; semantic segmentation; human pose estimation; 3d reconstruction; stereo vision; computational photography; neural networks; image coding; image reconstruction; object recognition; motion estimation.

**The Darjeeling Distinction** Sarah Besky, 2014 Nestled in the Himalayan foothills of Northeast India, Darjeeling is synonymous with some of the finest and most expensive tea in the world. It is also home to a violent movement for regional autonomy that, like the tea industry, dates back to the days of colonial rule. In this nuanced ethnography, Sarah Besky narrates the lives of tea workers in Darjeeling. She explores how notions of fairness, value, and justice shifted with the rise of fair-trade practices and postcolonial separatist politics in the region. This is the first book to explore how fair-trade operates in the context of large-scale plantations. Readers in a variety of disciplines—anthropology, sociology, geography, environmental studies, and food studies—will gain a critical perspective on how plantation life is changing as Darjeeling struggles to reinvent its signature commodity for twenty-first-century consumers. The Darjeeling Distinction challenges fair-trade policy and practice, exposing how trade initiatives often fail to consider the larger environmental, historical, and sociopolitical forces that shape the lives of the people they intended to support.

**Person Re-Identification** Shaogang Gong, Marco Cristani, Shuicheng Yan, Chen Change Loy, 2014-01-03 The first book of its kind dedicated to the challenge of person re-identification, this text provides an in-depth, multidisciplinary discussion of recent developments and state-of-the-art

methods. Features: introduces examples of robust feature representations, reviews salient feature weighting and selection mechanisms and examines the benefits of semantic attributes; describes how to segregate meaningful body parts from background clutter; examines the use of 3D depth images and contextual constraints derived from the visual appearance of a group; reviews approaches to feature transfer function and distance metric learning and discusses potential solutions to issues of data scalability and identity inference; investigates the limitations of existing benchmark datasets, presents strategies for camera topology inference and describes techniques for improving post-rank search efficiency; explores the design rationale and implementation considerations of building a practical re-identification system.

The ROV Manual Robert D Christ, Robert L. Wernli, Sr, 2011-04-01 The ROV Manual: A User Guide for Observation-Class Remotely Operated Vehicles is the first manual to provide a basic How To for using small observation-class ROVs for surveying, inspection and research procedures. It serves as a user guide that offers complete training and information about ROV operations for technicians, underwater activities enthusiasts, and engineers working offshore. The book focuses on the observation-class ROV and underwater uses for industrial, recreational, commercial, and scientific studies. It provides information about marine robotics and navigation tools used to obtain mission results and data faster and more efficiently. This manual also covers two common denominators: the technology and its application. It introduces the basic technologies needed and their relationship to specific requirements; and it helps identify the equipment essential for a cost-effective and efficient operation. This user guide can be invaluable in marine research and surveying, crime investigations, harbor security, military and coast guarding, commercial boating, diving and fishing, nuclear energy and hydroelectric inspection, and ROV courses in marine and petroleum engineering. \* The first book to focus on observation class ROV (Remotely Operated Vehicle) underwater deployment in real conditions for industrial, commercial, scientific and recreational tasks \* A complete user guide to ROV operation with basic information on underwater robotics and navigation equipment to obtain mission results quickly and efficiently \* Ideal for anyone involved with ROVs complete with self-learning questions and answers
