Savoia-Marchetti S.79 Sparviero Bomber Units Marco Mattioli,2018-02-22 Initially developed by Savoia-Marchetti as a transport, the aircraft had evolved into a dedicated medium bomber by the time the S.79-I made its combat debut in the Spanish Civil War in 1936. During World War 2, it became Italy's most successful bomber, and the most produced, with around 1370 built between 1936 and early 1944. Although initially hampered by poor tactics, the S.79 bomber crews nonetheless scored sunk a number of Allied vessels, and provided a constant threat to Allied sailors in the Mediterranean in the early stages of the war. In East Africa and the Red Sea the Sparvieri were the most modern bombers in-theatre, proving a challenge to RAF and SAAF biplane fighters. Using specially commissioned full-colour artwork, first-hand accounts and historic photographs, this volume chronicles the history of the S.79's war in the Mediterranean, North African, Balkan, and East African theatres.

Savoia-Marchetti S.79 Sparviero Torpedo-Bomber Units Marco Mattioli,2014-10-20 Italy's most successful wartime bomber, the S.79 saw combat with the Regia Aeronautica in France, Yugoslavia, Greece, North Africa, East Africa and in the Mediterranean. Initially developed as a transport, the aircraft evolved into a dedicated medium bomber during the Spanish Civil War in 1936. The manufacturer then produced the S.79-II torpedo-bomber which entered service in 1939 - which primarily saw service against the Royal Navy in the Mediterranean. Illustrated with 30 full colour profiles of the main units that saw action with either the Regia Aeronautica or the ANR, this title is the first of two volumes to cover the development history and wartime performance of the S.79.

Macchi C.202/C.205V Units in Combat Marco Mattioli,2022-05-26 A study of the Macchi Folgore and Veltro, the most successful Italian fighters in World War II. With specially commissioned profiles, the book examines how these fighters were conceived, their performance and the fascinating stories of their pilots. Italian fighters, such as the Fiat G.50 and Macchi C.200, had always struggled with their straight-line speed and restricted armament when engaging their Allied counterparts. To solve these problems, Macchi initially designed the C.202 Folgore using German engines, which contributed to create a faster aircraft, with a superior rate of climb and reachable altitude. Folgore's success in various North African engagements then paved the way for the development of Macchi's most successful fighter, the C.205V Veltro, which managed to combine increased speed and increased power. Packed with specially commissioned artwork and original photos, and written by Italian military aviation specialist Marco Mattioli, this fascinating book explores how the premier Italian fighter of the war came to life and the historical circumstances that prevented it from becoming one of the most dreaded aircraft in the Mediterranean.

The Vought F4U Corsair Martin W. Bowman,2019-12-27 This fully illustrated history of the iconic American fighter plane examines its development and combat experience through WWII and beyond. First flown in 1940, the Vought F4U Corsair was the fastest fighter in the world and the fastest US aircraft of any description. Powered by a huge 18-cylinder Pratt and Whitney Double Wasp engine, the first Corsairs were capable of speeds up to 417 miles per hour. This figure would rise to nearly 450mph in later versions. The F4U entered service with the US Navy in September 1942 and over time was extensively used by the US Marines, Royal Navy and Royal New Zealand Air Force. Famous squadrons that flew these planes—like VMF-214 'The Black Sheep' and VF-17 'Jolly Rogers'—maintained their superiority over the Japanese for the rest of the war. After the Second World War the Corsair was used with distinction by the French in Indo-China and again by the US Navy in Korea. Since then, Corsairs have remained a favorite among warbird enthusiasts the world over. This comprehensive book examines the engineering of the Corsairs alongside a detailed history of their development and usage in combat. Illustrated with scores of rare and previously unpublished photographs, *Vought F4U Corsair* is the perfect book for any fan of the 'bent wing bird'.

The book also contains an excerpt from the never before published An Adventure in 1914, written by Christopher Kelly's maternal great-grandfather, Thomas Tileston Wells. The Condor Legion Carlos Caballero Jurado, 2013-10-20 The Condor Legion was the expeditionary force of soldiers and airmen sent by Hitler to aid Franco's Nationalists in the Spanish Civil War. The Germans used the war as an opportunity to develop equipment and tactics, and their force included not only instructors, but also combat units of artillery, tanks and aircraft. These units tested guns, tanks and planes and perfected techniques which were used in the 1940 Blitzkrieg. Many of officers prominent in the early campaigns of World War II won their first successes in Spain. This book details the Legion and its unique uniform and insignia.

The Stirling Story Michael J. F. Bowyer, 2002 Conceived in the shadow of looming war, when the RAF's bomber force was largely made up of obsolete and outmoded aircraft, the Stirling became the first British four-engined 'heavy' bomber of the Second World War. Developed, tested and brought into service in the first desperate years of the Second World War, the arrival of the Stirling marked a turning point in the aerial warfare of that conflict, the moment when the Allies went on the offensive against the German homeland. In the years that followed Stirling squadrons were at the forefront of the developing tactics of the Allied bomber campaign - target marking, pathfinding, electronic navigation, the thousand bomber raids etc. - that were ultimately to lead to the utter devastation of so many German cities. Despite this leading role the Stirling has never enjoyed the standing of the Halifax and the even more celebrated Lancaster. Handicapped by an unrealistic peacetime design specification, it could not match the performance of its more famous successors and was withdrawn from frontline service as deliveries of Lancasters and Halifaxes gathered momentum. However, even then the Stirling proved to be versatile and adaptable as a glider tug, transport in secret SOE operations, and later as a civilian transport in the immediate post-war years. The Stirling Story is the culmination of years of exhaustive research by one of the world's foremost aviation authors. From original design specification and testing, through its development, introduction to service, developing marks and later adaptations the full story of the Shorts Stirling bomber is told with the aid of eyewitness accounts from the designers, production workers, engineers and above all the crews of the Stirling. Much more than the history of just one aircraft type, The Stirling Story is the story of RAF Bomber Command emerging from obscurity and failure to become a devastatingly effective weapon of war. It is an essential work of reference that no serious military aviation enthusiast or war historian can afford to be without, as well as a fascinating read for anyone with any interest in, or connection with, the Shorts Stirling.'

Battle Hymn Col. Dean E. Hess, 2017-07-19 The explosive, true story of a man of God turned fighter pilot who fought and prayed his way through 300 combat missions and two wars. Author Dean E. Hess is the subject of this inspiring autobiography, Battle Hymn, first published in 1956, which tells of his experiences as a U.S. Air Force colonel, including his involvement in the so-called "Kiddy Car

Airlift” during the Korean War on December 20, 1950. With the airfield over capacity, Hess sent Korean orphans to an orphanage in Seoul. When the North Korean forces began to capture the city, Hess reportedly organized 15 C-54 Skymaster aircraft to airlift 950 orphans and 80 orphanage staff from the path of the Chinese advance to safety on Jeju Island. When Hess departed Korea in June 1951, a new orphanage on this island held over 1,000 Korean children. The book later served the basis for the 1957 film of the same name, where he was played by Rock Hudson. “Stirring”—San Francisco Chronicle “In his career as a war correspondent Quentin Reynolds has met his share of heroes, but few of them, he says have impressed him as deeply as Col. Dean E. Hess.”—Readers Digest “Twentieth century American soldiers, sailors, airmen and Marines have enjoyed a warm reputation for caring about the children of the lands they have fought in. Col. Dean E. Hess—Air Force humanitarians—well represents this tradition.”—The Times Magazine
