Historical Painting Techniques, Materials, and Studio Practice Arie Wallert, Erma Hermens, Marja Peek, 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Split Swati Avasthi, 2012-01-24 A riveting portrait of life after abuse from an award-winning novelist. Sixteen-Year-Old Jace Witherspoon arrives at the doorstep of his estranged brother Christian with a re-landscaped face (courtesy of his father's fist), \$3.84, and a secret. He tries to move on, going for new friends, a

new school, and a new job, but all his changes can't make him forget what he left behind—his mother, who is still trapped with his dad, and his ex-girlfriend, who is keeping his secret. At least so far. Worst of all, Jace realizes that if he really wants to move forward, he may first have to do what scares him most: He may have to go back. Award-winning novelist Swati Avasthi has created a riveting and remarkably nuanced portrait of what happens after. After you've said enough, after you've run, after you've made the split—how do you begin to live again? Readers won't be able to put this intense page-turner down.

Liquid Surveillance Zygmunt Bauman, David

Lyon, 2013-04-03 'Today the smallest details of our daily lives are tracked and traced more closely than ever before, and those who are monitored often cooperate willingly with the monitors. From London and New York to New Delhi, Shanghai and Rio de Janeiro, video cameras are a familiar and accepted sight in public places. Air travel now commonly involves devices such as body-scanners and biometric checks that have proliferated in the wake of 9/11. And every day Google and credit-card issuers note the details of our habits, concerns and preferences, quietly prompting customized marketing strategies with our active, all too often zealous cooperation. In today's liquid modern world, the paths of daily life are mobile and flexible. Crossing national borders is a commonplace activity and immersion in social media increasingly ubiquitous. Today's citizens, workers, consumers and travellers are always on the move but often lacking certainty and lasting bonds. But in this world where spaces may not be fixed and time is boundless, our perpetual motion does not go unnoticed. Surveillance spreads in hitherto unimaginable ways, responding to and reproducing the slippery nature of modern life, seeping into areas where it once had only marginal sway. In this book the surveillance analysis of David Lyon meets the liquid modern world so insightfully dissected by Zygmunt Bauman. Is a dismal future of moment-by-moment monitoring closing in, or are there

still spaces of freedom and hope? How do we realize our responsibility for the human beings before us, often lost in discussions of data and categorization? Dealing with questions of power, technology and morality, this book is a brilliant analysis of what it means to be watched – and watching – today.

The Woman Beyond the Attic Andrew

Neiderman, 2023-06-13 “The woman who emerges from these pages is as riveting as her books” (The Wall Street Journal) in this compelling celebration of the famously private V.C.

Andrews—featuring family photos, personal letters, a partial manuscript for an unpublished novel, and more. Best known for her internationally, multi-million-copy bestselling novel *Flowers in the Attic*, Cleo Virginia Andrews lived a fascinating life. Born to modest means, she came of age in the American South during the Great Depression and faced a series of increasingly challenging health issues. Yet, once she rose to international literary fame, she prided herself on her intense privacy. Now, *The Woman Beyond the Attic* aims to connect her personal life with the public novels for which she was famous. Based on Virginia’s own letters, and interviews with her dearest family members, her long-term ghostwriter Andrew Neiderman tells Virginia’s full story for the first time. Perfect for anyone hoping to learn more about the enigmatic woman behind one of the most important novels of the 20th century, *The Woman Beyond the Attic* will have you “transfixed” (Publishers Weekly) from the first page.

World Economic Outlook, April 2019 International Monetary Fund. Research Dept., 2019-04-09 After strong growth in 2017 and early 2018, global economic activity slowed notably in the second half of last year, reflecting a confluence of factors affecting major economies. China's growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States. The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards; investment dropped in Italy as sovereign spreads widened; and external demand, especially from emerging Asia, softened. Elsewhere, natural disasters hurt activity in Japan. Trade tensions increasingly took a toll on business confidence and, so, financial market sentiment worsened, with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year, weighing on global demand. Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US-China trade deal, but they remain slightly more restrictive than in the fall.

World Economic Outlook, October 2018 International Monetary Fund. Research Dept., 2018-10-09 Global growth for 2018-19 is projected to remain steady at its 2017 level, but its pace is less vigorous than projected in April and it has become less balanced. Downside risks to global growth have risen in the past six months and the potential for upside surprises has

receded. Global growth is projected at 3.7 percent for 2018-19—0.2 percentage point lower for both years than forecast in April. The downward revision reflects surprises that suppressed activity in early 2018 in some major advanced economies, the negative effects of the trade measures implemented or approved between April and mid-September, as well as a weaker outlook for some key emerging market and developing economies arising from country-specific factors, tighter financial conditions, geopolitical tensions, and higher oil import bills. The balance of risks to the global growth forecast has shifted to the downside in a context of elevated policy uncertainty. Several of the downside risks highlighted in the April 2018 World Economic Outlook (WEO)—such as rising trade barriers and a reversal of capital flows to emerging market economies with weaker fundamentals and higher political risk—have become more pronounced or have partially materialized. Meanwhile, the potential for upside surprises has receded, given the tightening of financial conditions in some parts of the world, higher trade costs, slow implementation of reforms recommended in the past, and waning growth momentum.

International Standard Classification of Occupations

International Labour Office,2012 The International Standard Classification of Occupations 2008 (ISCO-08) is a four-level hierarchically structured classification that covers all jobs in the world. Developed with the benefit of accumulated national and international experience as well as the help of experts from many countries and agencies, ISCO-08 is fully supported by the international community as an accepted standard for international labour statistics. ISCO-08 classifies jobs into 436 unit groups. These unit groups are aggregated into 130 minor groups, 43 sub-major groups and 10 major groups, based on their similarity in terms of the skill level and skill specialisation required for the jobs. This allows the production of relatively detailed internationally comparable data as well as summary information for only 10 groups at the highest level of aggregation. Each group in the classification is designated by a title and code number and is associated with a definition that specifies the scope of the group. The classification is divided into two volumes: Volume I presents the structure and definitions of all groups in ISCO-08 and their correspondence with ISCO-88, which it supersedes, while Volume II provides an updated and expanded index of occupational titles and associated ISCO-08 and ISCO-88 codes.

World Economic Outlook, October 2019 International Monetary Fund. Research Dept.,2019-10-15 Global growth is forecast at 3.0 percent for 2019, its lowest level since 2008-09 and a 0.3 percentage point downgrade from the April 2019 World Economic Outlook.
