From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Approaches to Prototyping R. Budde, K. Kuhlenkamp, L. Mathiassen, H. Züllighoven, 2012-12-06 This conference will focus on the user-oriented development of information systems. Against a background of recent concepts for the implementation of distributed systems based on workstation computers, various communicational, organizational and social issues gain increasing importance in the construction of computer based information systems. There is an urgent need to integrate end-users and other affected groups into the development process. New strategies for system development are thus needed. This was the beginning of the Call for Papers to the Working Conference on Prototyping. Working in the fields of user-oriented software construction and the analysis of communication problems between developers and users we, that is the GMD team involved in this conference and in preparing its Proceedings, sooner or later came across various new concepts to overcome the problems sketched above. Concepts focusing on the quick construction of an operative system such as rapid prototyping or concepts aiming at the human and organizational side of the development process such as Systemeering. Even on a second look, the multitude of different approaches, terms and tools still caused confusion. But despite the differences every concept seemed to have something to do with Prototyping. This, however, proved to be of little help to us, because the term Prototyping itself turned out to be quite fuzzy. In this obviously confused situation we decided that it was time for a working conference.

The Fortunes Peter Ho Davies, 2016-09-06 Winner of the Anisfield-Wolf Book Award for literature that confronts racism and examines diversity Winner of the 2017 Chautauqua Prize Finalist for the Dayton Literary Peace Prize A New York Times Notable Book Riveting and luminous...Like the best books, this one haunts the reader well after the end.—Jesmyn Ward "[A] complex, beautiful novel . . . Stunning."—NPR, Best Books of 2016 "Intense and dreamlike . . . filled with quiet resonances across time."—The New Yorker Sly, funny, intelligent, and artfully structured, *The Fortunes* recasts American history through the lives of Chinese Americans and reimagines the multigenerational novel through the fractures of immigrant family experience. Inhabiting four lives—a railroad baron's valet who unwittingly ignites an explosion in Chinese labor; Hollywood's first Chinese movie star; a hate-crime victim whose death mobilizes the Asian American community; and a biracial writer visiting China for an adoption—this novel captures and capsizes over a century of our history, showing that even as family bonds are denied and broken, a community can survive—as much through love as blood. "A prophetic work, with passages of surpassing beauty."—Joyce Carol Oates, Anisfield-Wolf Book Award citation "A poignant, cascading four-part novel . . . Outstanding."—David Mitchell, *Guardian* "The most honest, unflinching, cathartically biting novel I've read about the Chinese American experience."—Celeste Ng

And Sometimes I Wonder About You Walter Mosley, 2016-04-19 P.I. Leonid McGill isn't usually one to refuse a case. But when Hiram Stent, a man down on his luck, begs him to find a cousin who is about to inherit millions of dollars, he senses something fishy. His instincts prove right: The night after he turns Hiram away, Hiram is found dead and Leonid's office is broken into. Feeling partly responsible for this bizarre turn of events, Leonid is forced to open an investigation that will pull him into the lurid history of an old-money New York family. Leonid's personal life is no less troubling. As his wife recovers in an uptown sanatorium from a suicide attempt, his mistress's conscience kicks in. To further complicate matters, the stunning Marella Herzog, as irresistible as she is dangerous, walks into his life—the perfect wrong woman at just the right time.
