Nursing Staff in Hospitals and Nursing Homes Institute of Medicine, Committee on the Adequacy of Nursing Staff in Hospitals and Nursing Homes, 1996-03-27 Hospitals and nursing homes are responding to changes in the health care system by modifying staffing levels and the mix of nursing personnel. But do these changes endanger the quality of patient care? Do nursing staff suffer increased rates of injury, illness, or stress because of changing workplace demands? These questions are addressed in *Nursing Staff in Hospitals and Nursing Homes*, a thorough and authoritative look at today's health care system that also takes a long-term view of staffing needs for nursing as the nation moves into the next century. The committee draws fundamental conclusions about the evolving role of nurses in hospitals and nursing homes and presents recommendations about staffing decisions, nursing training, measurement of quality, reimbursement, and other areas. The volume also discusses work-related injuries, violence toward and abuse of nursing staffs, and stress among nursing personnel—and examines whether these problems are related to staffing levels. Included is a readable overview of the underlying trends in health care that have given rise to urgent questions about nurse staffing: population changes, budget pressures, and the introduction of new technologies. *Nursing Staff in Hospitals and Nursing Homes* provides a straightforward examination of complex and sensitive issues surrounding the role and value of nursing on our health care system.

Can We Read Letters? Finn Egil Tønnessen, Per Henning Uppstad, 2015-02-27 “In their new book, Finn Egil Tønnessen and Per Henning Uppstad provide a set of theoretical and philosophical reflections on research in reading and dyslexia. It is a pleasure to welcome this book, which reflects the many contributions made by researchers at the National Centre for Reading Education and Research in Stavanger, Norway.” – Professor Usha Goswami, University of Cambridge. Careful reflection on the concepts and methods used is a prerequisite for further development in any field of research. The authors think cognitive psychology has become too dominant in reading and dyslexia research, arguing that it should be combined with behaviourism and connectionism – in part by focusing on the concept of ‘skill’. The key components of a skill are claimed to be automaticity, awareness and shifts between them. Reading is defined as an interpretative skill, which should be viewed from the perspective of hermeneutics. The authors use these fundamental analyses and definitions to shed new light on the ‘balanced approach to reading instruction’, ‘reading fluency’ and other key concepts. The book also deals with problems in the definition of ‘dyslexia’ and proposes a method to arrive at clear and fruitful definitions. It concludes with a chapter trying to answer the question of in what sense, or to what extent, it can be claimed that reading and dyslexia research has made progress. The book mainly builds on articles published over the past 25 years by Professor Finn Egil Tønnessen at the National Centre for Reading Education and Research, Stavanger, Norway.

Foundations of Sport-Related Brain Injuries Semyon M. Slobounov,Wayne J. Sebastianelli,2006-08-25 In summarizing current insights and controversies over concussions in athletics, this book makes the vital point that symptom resolution does not necessarily mean injury resolution. Research shows that dysfunctional pathways continue for extended periods even after a minor concussion. Until the consequences of short-term perturbations and long-term residual brain dysfunctions are better understood, concussions must be treated with respect and given a higher priority for continued research activity.

Stand-Up Comedy Judy Carter,2010-03-03 If you think you're funny, buy this book! Whether you dream of becoming a star . . . A better public speaker . . . A more effective communicator . . . A funnier, happier human being . . . You can learn to leave 'em laughing! David Letterman learned to do it. Jay Leno learned to do it. Roseanne Barr learned to do it. So can you! Now successful stand-up comic Judy Carter—who went from teaching high school to performing in Las Vegas, Atlantic City, Lake Tahoe, and on over 45 major TV shows—gives you the same hands-on, step-by-step instruction she's taught to students in her comedy workshops. She shows you how to do it: create an act, perform it, make money with it, or apply it to everyday life. Discover: • The formulas for creating comedy material • How to find your own style • The three steps to putting your act together • Rehearsal do's and don'ts • What to do if you bomb • Ways to punch up your everyday life with humor

Sketch Comedy Nick Marx,2019-11-01 A history of sketch comedy on American television and analysis of what it says about American culture and society. In *Sketch Comedy: Identity, Reflexivity, and American Television*, Nick Marx examines some of the genre's most memorable?and controversial?moments from the early days of television to the contemporary line-up. Through explorations of sketches from well-known shows such as *Saturday Night Live*, *The State*, *Inside Amy Schumer*, *Key & Peele*, and more, Marx argues that the genre has served as a battleground for the struggle between comedians who are pushing the limits of what is possible on television and network executives who are more mindful of the financial bottom line. Whether creating new catchphrases or transgressing cultural taboos, sketch comedies give voice to marginalized performers and audiences, providing comedians and viewers opportunities to test their own ideas about their place in society, while simultaneously echoing mainstream cultural trends. The result, Marx suggests, is a hilarious and flexible form of identity play unlike anything else in American popular culture and media.

“An excellent study of a long-neglected area in television/media studies and is part of a larger turn toward the centrality of comedy in post-war U.S. culture.” —Jeffrey Sconce, Northwestern University “A stalwart of television . . . sketch comedy finally gets the in-depth critical attention it deserves . . . Marx shows how sketch comedy has fit (and been constrained by) TV’s industrial contexts, from live variety shows in its earliest days to movement across media in the era of multiple platforms. These case studies not only chart sketch comedy’s past, they provide the theoretical and analytical tools to consider its future.” —Ethan Thompson, Texas A&M University Corpus Christi

Antiangiogenic Agents in Cancer Therapy Beverly A. Teicher, Lee M. Ellis, 2008-01-08 This volume represents a compendium of scientific findings and approaches to the study of angiogenesis in cancer. The second edition of *Antiangiogenic Agents in Cancer Therapy* is intended to give a current perspective on the state-of-the-art of angiogenesis and therapy directed at this process. Antiangiogenesis is a dynamic and evolving field in oncology. New therapeutic targets continue to emerge followed by the rapid development of new therapeutic agents to be investigated in clinical trials. Optimizing the therapeutic potential of antiangiogenic agents in combination with the other therapies in the armamentarium to fight cancer will be an on-going challenge.

MicroRNAs Krishnarao Appasani, 2009-08-20 *MicroRNAs* (miRNAs) are RNA molecules, conserved by evolution, that regulate gene expressions and their recent discovery is revolutionising both basic biomedical research and drug discovery. Expression levels of miRNAs have been found to vary between tissues and with developmental stages and hence evaluation of the global expression of miRNAs potentially provides opportunities to identify regulatory points for many different biological processes. This wide-ranging reference work, written by leading experts from both academia and industry, will be an invaluable resource for all those wishing to use miRNA techniques in their own research, from graduate students, post-docs and researchers in academia to those working in R&D in biotechnology and pharmaceutical companies who need to understand this emerging technology. From the discovery of miRNAs and their functions to their detection and role in disease biology, this volume uniquely integrates the basic science with industry application towards drug validation, diagnostic and therapeutic development. Forewords by: Sidney Altman, Yale University, Winner of the Nobel Prize in Chemistry, 1989 and Victor R. Ambros, Dartmouth Medical School, Co-discoverer of *MicroRNAs*

Patent Claim Construction Robert C. Kahrl, 2014-09-16 This practical resource helps lawyers of all experience levels gain a firm footing in the rapidly evolving rules of claim construction with expert analysis of emerging methodologies for interpreting patents, a complete guide to the evidence, or modes of proof, accepted by the courts in applying claim construction principles and specific guidance on how the courts are likely to interpret certain phrases, terms, or forms of claims in Markman hearings. By Robert C. Kahrl. *Patent Claim Construction* is the first comprehensive treatise on claim construction in the U.S. Court of Appeals for the Federal Circuit. This practical resource helps lawyers of all experience levels gain a firm footing in the rapidly evolving rules of claim construction. This knowledge thereby allows for the systematic and efficient identification of the rules most advantageous to the client's position. *Patent Claim Construction* offers expert analysis of emerging methodologies, reflected in current case law for interpreting patents as a matter of the law and detailed descriptions of the cases applying the rule, as well as commentary describing the trend toward or away from favoring that particular rule. Additionally, the author includes a complete guide to the evidence, or modes of proof, accepted by the courts in applying claim construction principles and specific guidance on how the courts are likely to

interpret certain phrases, terms, or forms of claims.

Signal Transduction in Plants S.K. Sopory, Ralf Oelmüller, S.C. Maheswari, 2012-12-06 An understanding of the mechanisms by which plants perceive environmental cues, both physical and chemical, and transduce the signals that influence specific expression of genes, is an area of intensive scientific research. With the completion of the genome sequence of Arabidopsis it is understood now that a larger number of genes encode for proteins involved in signalling cascades and transcription factors. In this volume, different chapters deal with plant receptors, second messengers like calcium ions, phosphoinositides, salicylic acid and nitrous oxide, calcium binding proteins and kinases. In addition to dealing with the response of plants to light, hormones, pathogens, heat, etc. on cellular activity, work currently going on in apoptosis, cell division, and plastid gene expression is also covered in this book.

Report of the National Reading Panel : Teaching Children to Read : an Evidence-based Assessment of the Scientific Research Literature on Reading and Its Implications for Reading Instruction : Reports of the Subgroups National Reading Panel (U.S.), 2000 In 1997, Congress asked the Director of the National Institute of Child Health and Human Development (NICHD), in consultation with the Secretary of Education, to convene a national panel to assess the status of research-based knowledge, including the effectiveness of various approaches to teaching children to read. The panel was charged with providing a report that should present the panel's conclusions, an indication of the readiness for application in the classroom of the results of this research, and, if appropriate, a strategy for rapidly disseminating this information to facilitate effective reading instruction in the schools -- p. 1-1.

Turkish German Muslims and Comedy Entertainment Benjamin Nickl, 2020-10-26 Turkish German comedy culture and the lived realities of Turkish Muslims in Germany Comedy entertainment is a powerful arena for serious public engagement with questions of German national identity and Turkish German migration. The German majority society and its largest labour migrant community have been asking for decades what it means to be German and what it means for Turkish Germans, Muslims of the second and third generations, to call Germany their home. Benjamin Nickl examines through the social pragmatics of humour the dynamics that underpin these questions in the still-evolving popular culture space of German mainstream humour in the 21st century. The first book-length study on the topic to combine close readings of film, television, literary and online comedy, and transnational culture studies, *Turkish German Muslims and Comedy Entertainment* presents the argument that Turkish German humour has moved from margin to mainstream by intervening in cultural incompatibility and Islamophobia discourse. Ebook available in Open Access. This publication is GPRC-labeled (Guaranteed Peer-Reviewed Content).

Interthinking: Putting Talk to Work Karen Littleton, Neil Mercer, 2013-08-15 Through using spoken language, people are able to think creatively and productively together. This ability to 'interthink' is an important product of our evolutionary history that is just as important for our survival today. Many kinds of work activity depend on the success of groups or teams finding joint solutions to problems. Creative achievement is rarely the product of solitary endeavour, but of people working within a collective enterprise. Written in an accessible and jargon-free style, *Interthinking: putting talk to work* explores the growing body of work on how people think creatively and productively together. Challenging purely individualistic accounts of human evolution and cognition, its internationally acclaimed authors provide analyses of real-life examples of collective thinking in everyday settings including workplaces, schools, rehearsal spaces and online environments. The authors use socio-cultural psychology to explain the processes involved in interthinking, to explore its creative power, but also to understand why collective thinking isn't always productive or

successful. With this knowledge we can maximise the constructive benefits of our ability to interthink, and understand the best ways in which we can help young people to develop, nurture and value that capability. This book will be of great interest to academic researchers, postgraduates and undergraduates on Education and Psychology courses and to practicing teachers. It will also appeal to anyone with an interest in language, creativity and the role of psychology in everyday life.
