The Aerodynamics of Heavy Vehicles: Trucks, Buses, and Trains Rose McCallen, Fred Browand, James Ross, 2013-07-30 It is our pleasure to present these proceedings from the United Engineering Foundation Conference on The Aerodynamics of Heavy Vehicles: Trucks, Buses and Trains held December 2-6, 2002, in Monterey, California. This Department of Energy, United Engineering Foundation, and industry sponsored conference brought together 90 leading engineering researchers from around the world to discuss the aerodynamic drag of heavy vehicles. Participants from national labs, academia, and industry, including truck manufacturers, discussed how computer simulation and experimental techniques could be used to design more fuel efficient trucks, buses, and trains. Conference topics included comparison of computational fluid dynamics calculations using both steady and unsteady Reynolds-averaged Navier-Stokes, large-eddy simulation, and hybrid turbulence models and experimental data obtained from the Department of Energy sponsored and other wind tunnel experiments. Advanced experimental techniques including three-dimensional particle image velocimetry were presented, along with their use in evaluating drag reduction devices. We would like to thank the UEF conference organizers for their dedication and quick response to sudden deadlines. In addition, we would like to thank all session chairs, the scientific advisory committee, authors, and reviewers for their many hours of dedicated effort that contributed to a successful conference and resulted in this document of the conference proceedings. We also gratefully acknowledge the support received from the United Engineering Foundation, the US Department of Energy, Lawrence Livermore National Laboratory, Volvo Trucks America, International Truck and Engine Corporation, and Freightliner LLC.

The Second Automobile Revolution M. Freyssenet, 2009-04-30 The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties.

Alone Cyn Balog, 2017-11-07 This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls A bloody, wonderfully creepy scare ride. When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

Game Theory and Strategy Explained Can Akdeniz,2015-05-12 Game Theory has evolved since its inception, but at its root, it is the modeling of strategic interactions between two or more players where there is a set of rules and outcomes! This basic definition gets to the heart of what Game Theory is. And this can be applied to almost any situation in your life and your business. Regardless of your status, as an entrepreneur or a part of the employed, this theory can serve you well. It can help you develop strategic approaches to real life situations, where you predict, with remarkable accuracy, the best possible route towards the best possible outcomes. If you wanted to have a crystal ball, one that helps you predict the future, then Game Theory would be as close to that crystal ball as you can get, in real-life! Game Theory and Strategy go hand in hand. In fact, they are like the big brother and the little brother of social interaction. Where Game Theory is the big brother, used to guide you along the way, Strategy is the little brother, needing guidance, and who cannot exist successfully in the absence of 'big brother'! They, therefore, have a tandem and reciprocal relationship.

Introduction to UAV Systems Paul Fahlstrom,Thomas Gleason,2012-07-11 Unmanned aerial vehicles (UAVs) have been widely adopted in themilitary world over the last decade and the success of these military applications is increasingly driving efforts to establishunmanned aircraft in non-military roles. Introduction to UAV Systems,4th edition provides a comprehensiveintroduction to all of the elements of a complete Unmanned AircraftSystem (UAS). It addresses the air vehicle, mission planning andcontrol, several types of mission payloads, data links and how theyinteract with mission performance, and launch and recoveryconcepts. This book provides enough information to encourage astudent to learn more; to provide a specialist with a basicappreciation of the technical issues that drive other parts of thesystem and interact with their specialty; or to help a programmanager understand system-level tradeoffs and know what questions to ask. Key features: Comprehensive overview of all elements of a UAS and of how theyinteract. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate to subsystem design choices. Practical discussion of issues informed by lessons learned inUAV programs. Introduction to UAV Systems,4th edition is written both for newcomerto the subject and for experienced members of the UAV community whodesire a comprehensive overview at the system level. As well as being a primary text for an introductory course onUAS or a supplementary text in a course that goes into more depthin one of the individual technologies involved in a UAS, this book is a useful overview for practicing engineers, researchers,managers, and consultants interested in UAV systems.

OGT Reading Andrea J. Lapey,2005 OGT Exit Level Reading Workbook prepares students for the reading portion of the Ohio Graduation Test. Samples from similar tests provide plenty of practice and students learn to take multiple choice tests on their comprehension of what they read. Students learn to evaluate their own short answers to targeted questions, and learn from other students' responses to similar questions. This book is suitable for students in all states who need to take a reading exam for graduation or course completion.

Fab Neil Gershenfeld,2008-07-31 What if you could someday put the manufacturing power of an automobile plant on your desktop? It may sound far-fetched-but then, thirty years ago, the notion of personal computers in every home sounded like science fiction. According to Neil Gershenfeld, the renowned MIT scientist and inventor, the next big thing is personal fabrication -the ability to design and produce your own products, in your own home, with a machine that combines consumer electronics with industrial tools. Personal fabricators (PF's) are about to revolutionize the world just as personal computers did a generation ago. PF's will bring the programmability of the digital world to the rest of the world, by being able to make almost anything-including new personal fabricators. In FAB , Gershenfeld describes how personal fabrication is possible today, and how it is meeting local needs with locally developed solutions. He and his colleagues have created fab labs around the world, which, in his words, can be interpreted to mean a lab for fabrication, or simply a fabulous

laboratory. Using the machines in one of these labs, children in inner-city Boston have made saleable jewelry from scrap material. Villagers in India used their lab to develop devices for monitoring food safety and agricultural engine efficiency. Herders in the Lyngen Alps of northern Norway are developing wireless networks and animal tags so that their data can be as nomadic as their animals. And students at MIT have made everything from a defensive dress that protects its wearer's personal space to an alarm clock that must be wrestled into silence. These experiments are the vanguard of a new science and a new era-an era of post-digital literacy in which we will be as familiar with digital fabrication as we are with the of information processing. In this groundbreaking book, the scientist pioneering the revolution in personal fabrication reveals exactly what is being done, and how. The technology of FAB will allow people to create the objects they desire, and the kind of world they want to live in.

Change the Rules Anand Mahindra,2017-12-25 We have an inherent fear of new ideas. We grow up in an environment that forces us to fit in, makes us believe in common goals that are in line with our financial bracket, and ensures we stay within these parameters all our lives. No wonder we're so far away from innovation. Innovation comes from taking risks, and risks can only be taken once fears are abandoned. When Mahindra & Mahindra first ventured into the automobiles industry, there was every reason for the company to fail. Today, it's one of the leaders of the industry. What set its destiny apart? Change the Rules, Anand Mahindra's inspiring address at the convocation ceremony of the graduating class of 2014 at IIM Ahmedabad not only reveals the secret behind the organization's unprecedented success but also highlights the dangers of staying in the comfort zone.

The Decline and Fall of the American Automobile Industry Brock Yates,1983 Analyzes the reasons for the failures of the American auto industry to compete with foreign imports and to make use of modern technology and styling.

The White Shadow Andrea Eames,2012 Tinashe is a young Shona boy living in a small village in rural Rhodesia. The guerilla war of the late 1960s haunts the bushlands, but it only infrequently affects his quiet life; school, swimming in the river, playing with the other kids on the kopje. When his younger sister, Hazvinei, is born, Tinashe knows at once that there is something special about her. Their life in the village, once disturbed only by the occasional visits of his successful uncle and city cousin, Abel, now becomes entangled with the dual forces of the Shona spirit world and the political turmoil of the nation. As Tinashe, Hazvinei and Abel grow older, their destinies entangle in ways they never expected. Tinashe is prepared to follow his sister anywhere - but how far can he go to keep her safe when the forces threatening her are so much darker and more sinister than he suspected?Andrea Eames weaves together folklore and suspense in this compelling tale of a boy struggling to do the right thing in an unpredictable world.
