Celestial Being Noboru Kimura, Hajime Yodate, Yoshiyuki Tomino, 2010 The novelization of the hit anime series! The year is 2307 A.D. Although fossil fuels have been depleted, humanity has obtained a new source of energy to replace them in the form of a large-scale solar power generation system based on three huge orbital elevators. However, the benefits of this system are available only to a handful of major powers and their allies. The three orbital elevators belong to three superpower blocs. These are the Union, led by the United States of America; the Human Reform League, led by China, Russia, and India; and the AEU, led by Europe. These superpower blocs continue to play a grand zero-sum game for the sake of their own prestige and prosperity. In this world of never-ending conflict, a private armed organization appears, dedicated to the elimination of war through armed force. Its name is Celestial Being, and it is in possession of Gundam mobile suits. With these Gundams, it begins armed intervention into all acts of war.

Dominion from Sea to Sea Bruce Cumings, 2009-11-17 America is the first world power to inhabit an immense land mass open at both ends to the world's two largest oceans—the Atlantic and the Pacific. This gives America a great competitive advantage often overlooked by Atlanticists, whose focus remains overwhelmingly fixed on America's relationship with Europe. Bruce Cumings challenges the Atlanticist perspective in this innovative new history, arguing that relations with Asia influenced our history greatly. Cumings chronicles how the movement westward, from the Middle West to the Pacific, has shaped America's industrial, technological, military, and global rise to power. He unites domestic and international history, international relations, and political economy to demonstrate how technological change and sharp

economic growth have created a truly bicoastal national economy that has led the world for more than a century. Cumings emphasizes the importance of American encounters with Mexico, the Philippines, and the nations of East Asia. The result is a wonderfully integrative history that advances a strong argument for a dual approach to American history incorporating both Atlanticist and Pacificist perspectives.

7 Billion Needles Nobuaki Tadano, 2010 Modern-day Japan is the stage for a new form of hard science fiction, as author Nobuaki Tadano revisits one of the genre's Grand Masters, Hal Clement, in his debut series, 7 BILLION NEEDLES. Loosely based on Clement's golden age title Needle (Doubleday, 1952), Tadano's gripping homage follows the life of a teenage girl whose melancholy days are dramatically changed when her body becomes host to an alien life form caught up in an interplanetary manhunt.

Slasher Maidens, Vol. 1 Tetsuya Tashiro, 2020-12-08 Asuma Sudou has always been a proud pervert, but he's sworn to give that up to chase the girl of his dreams. Having received a special invitation to enter the same all-girls school as her, he's planning to live his romantic youth to the fullest. But those plans are cut short when it turns out the school is a front for a secret organization dedicated to battling kaijin-monsters created when people succumb to their murderous impulses! The girls of the school fight using the relics of defeated kaijin, but when the bloodthirsty instincts sealed within threaten to overwhelm them, Asuma is the only one who can bring them back to their senses!

Globalisms Manfred B. Steger, 2019-09-27 Providing a comprehensive overview of the changing ideological landscape in the age of globalization, Manfred Steger explores the clashing political belief systems of our time: market globalism, justice globalism, and religious globalism. He considers their prospects in light of the growing populist challengers in the tumultuous decade to come.

Globalization in Practice N. J. Thrift, Adam Tickell, Steve Woolgar, William H. Rupp, 2014 The concept of globalization has become ubiquitous in social science and in the public consciousness and is often invoked as an explanation for a diverse range of changes to economies, societies, politics and cultures - both as a positive liberating force and as a wholly negative

one. While our understanding of the politics, economics, and social resonance of the phenomenon has become increasingly sophisticated at the macro-level, this book argues that globalization too often continues to be depicted as a set of extra-terrestrial forces with no real physical manifestation, except as effects. The essays challenge this dominant understanding of 'globalization from above' through explorations of the mundane means by which globalization has been achieved. Instead of a focus on the meta-political economy of global capitalism, the book concentrates on the everyday life of capitalism, the not-so-'little' things that keep the 'large' forces of globalization ticking over. With its eye on the mundane, the book demonstrates that a series of everyday and, consequently, all but invisible formations critically facilitate and create the conditions under which globalization has flourished. The emphasis is on concrete moments in the history of capitalism when these new means of regular reproduction were invented and deployed. Only by understanding these infrastructures can we understand the dynamics of globalization. In short, punchy essays by distinguished researchers from across a range of disciplines, this book provides a new way of understanding globalization, moving away from the standard accounts of global forces, economic flows, and capitalist dynamics, to show how ordinary practices and artefacts are crucial elements and symbols of globalization.

Project Orion George Dyson, 2003-03-26 The race to the moon dominated space flight during the the 1960s yet, during the late 1950s and early 1960s, the US Government sponsored a project that could possibly have sent 150 people on expeditions to Mars or Saturn. The project was code-named Orion and centred upon the effort to develop a fast, manoeuvrable, nuclear-powered space

vehicle for long-range voyages in space. The proposed 4000-ton spaceship would be propelled by nuclear bombs but, strictly classified, the project was never given a chance to succeed or fail – due partly to its apparent absurdity – but its mix of sublime physics, madcap engineering, and a cast of Cold War warriors and would-be inter-galactic engineers made the mission a tantalising what if story. In this book George Dyson, son of physicist Freeman Dyson, one of the original project team, pieces together the story his father could only tell him in fragments at the time.

The Forgotten Rohingya: Their Struggle for Human Rights in Burma Habib Habib Siddiqui,2019 Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as settlers from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry.The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language

they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets? - Are restricted from traveling outside their villages? - Have no legal right to own land or property? - Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation,

extortion, arrest, torture and extra-judicial killings?– Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan?– Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights?Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. The Forgotten Rohingya makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.
