Libidinal Economy Jean-Francois Lyotard, 2004-01-01 Is regarded as the most important response to the philosophies of desire, as expounded by thinkers such as de Sade, Nietzsche, Bataille, Foucault and Deleuze and Guattari. It is a major work not only of philosophy, but of sexual politics, semiotics and literary theory, that signals the passage to postmodern philosophy.

Synthesis of Subsonic Airplane Design E. Torenbeek, 2013-06-29 Since the education of aeronautical engineers at Delft University of Technology started in 1940 under the inspiring leadership of Professor H.J. van der Maas, much emphasis has been placed on the design of aircraft as part of the student's curriculum. Not only is aircraft design an optional subject for thesis work, but every aeronautical student has to carry out a preliminary airplane design in the course of his study. The main purpose of this preliminary design work is to enable the student to synthesize the knowledge obtained separately in courses on aerodynamics, aircraft performances, stability and control, aircraft structures, etc. The student's exercises in preliminary design have been directed through the years by a number of staff members of the Department of Aerospace Engineering in Delft. The author of this book, Mr. E. Torenbeek, has made a large contribution to this part of the study programme for many years. Not only has he acquired vast experience in teaching airplane design at university level, but he has also been deeply involved in design-oriented research, e.g. developing rational design methods and systematizing design information. I am very pleased that this wealth of experience, methods and data is now presented in this book.

Aquatic Biodiversity Koen Martens, 2012-12-06 In this age of increased fundamental and applied research on biodiversity, no single volume was as yet devoted to the various temporal and spatial aspects of aquatic biodiversity. The present book is published in honour of Professor Henri Dumont (Ghent, Belgium) at the occasion of his retirement as Editor-in-Chief of Hydrobiologia. The volume presents a selection of contributions on aquatic biodiversity, written by colleagues from the editorial board, fellow editors of aquatic journals and former students and collaborators. Contributions deal with a wide spectrum of topics related to aquatic biodiversity and cover fields such as actual- and palaeolimnology, taxonomy, and fundamental and applied limnology. Even reconnaissance chapters on management and cultural impact of water bodies are included. The book combines state-of-the-art contributions in aquatic sciences.

Historical Dialogue Analysis Andreas H. Jucker, Gerd Fritz, Franz Lebsanft, 1999-07-15 Historical dialogue analysis is a new branch of historical pragmatics. The papers of this interdisciplinary volume contribute to charting the

developing field by presenting a survey of recent research from the different traditions of English, German and Romance language studies. Both the introductory paper by the editors and the individual papers deal with fundamental theoretical questions, e.g. the question of types of historical developments in dialogue forms, and methodological problems, e.g. the finding and interpretation of relevant data. The fifteen case studies presented in this volume provide a wide range of new data. The range of topics includes the pragmatic form of 16th century religious controversies in Germany, forms of polite answers in Early Modern German conversation culture, forms of dialogue in Early Modern English medical writing, learning English through dialogues in the 16th century, structures of bargaining dialogues in Late Medieval French, and reflections of spontaneous dialogue in Early Romance texts.

Cluster Analysis for Applications Michael R. Anderberg, 2014-05-10 Cluster Analysis for Applications deals with methods and various applications of cluster analysis. Topics covered range from variables and scales to measures of association among variables and among data units. Conceptual problems in cluster analysis are discussed, along with hierarchical and non-hierarchical clustering methods. The necessary elements of data analysis, statistics, cluster analysis, and computer implementation are integrated vertically to cover the complete path from raw data to a finished analysis. Comprised of 10 chapters, this book begins with an introduction to the subject of cluster analysis and its uses as well as category sorting problems and the need for cluster analysis algorithms. The next three chapters give a detailed account of variables and association measures, with emphasis on strategies for dealing with problems containing variables of mixed types. Subsequent chapters focus on the central techniques of cluster analysis with particular reference to computational considerations; interpretation of clustering results; and techniques and strategies for making the most effective use of cluster analysis. The final chapter suggests an approach for the evaluation of alternative clustering methods. The presentation is capped with a complete set of implementing computer programs listed in the Appendices to make the use of cluster analysis as painless and free of mechanical error as is possible. This monograph is intended for students and workers who have encountered the

notion of cluster analysis.

Non-Invasive Sperm Selection for In Vitro Fertilization Ashok Agarwal,Edson Borges Jr.,Amanda S.

Setti,2016-09-22 Non-Invasive Sperm Selection for In Vitro Fertilization summarizes and discusses the relevant literature on the various advanced sperm selection methods used in modern Assisted Reproductive Technologies (ART). Chapters review some of the major unresolved issues in the field, the feasibility and success of the various sperm selection methods, their safety and the effects they have on sperm quality and ART outcomes. The book makes recommendations on clinical applications and future research, while helping to elucidate the benefits and promise of non-invasive sperm selection techniques. A distinguished team of scientists, embryologists, and urologists, with expertise in male infertility and ART, contributes to this original and valuable reference guide meant for academics, researchers, and professionals in the field of reproductive medicine who need an update on the current status of the study and practice of non-invasive sperm selection techniques.

The Lords of Tikal Peter D. Harrison,1999 The Maya metropolis of Tikal was once one of the greatest cities in the world, its skyline dominated by huge temple-pyramids. In ad 750 over 100,000 people lived here, in the heart of the Guatemalan rainforest. Today Tikal is a popular site on the Maya tourist itinerary. But why did the city flourish? What does its history reveal about Maya civilization? And why did Tikal collapse? Drawing upon over 30 years of excavation and research, some of it his own, Peter D. Harrison gives a vivid account of the turbulent story of Tikal from 800 bc to the late 9th century ad. Strategically located, the city was a trade centre, an architectural pioneer and a focal point of warfare. The apogee of power and wealth was achieved during the reign of the Jaguar Claw clan, who built the Great Temples, some with tombs of treasures that hint at the richness of life of the lords of Tikal. Illustrated with photographs of artefacts and objects found at the site, remaining structures and a reconstruction of a Tikal king in full regalia, Peter D. Harrison offers a summary of what is known to date of this romantic, mysterious city and its rulers.
