The Battleship USS Iowa Stefan Draminski, 2020-01-23 USS Iowa (BB-61) was the lead ship in one of the most famous classes of battleships ever commissioned into the US Navy. Transferred to the Pacific Fleet in 1944, the Iowa first fired her guns in anger in the Marshall Islands campaign, and sunk her first enemy ship, the Katori. The Iowa went on to serve across a number of pivotal Pacific War campaigns, including at the battles of the Philippine Sea and Leyte Gulf. The ship ended the war spending several months bombarding the Japanese Home Islands before the surrender in August 1945. After taking part in the Korea War, the Iowa was decommissioned in 1958, before being briefly reactivated in the 1980s as part of President Reagan's 600-Ship Navy Plan. After being decommissioned a second and final time in 1990, the Iowa is now a museum ship in Los Angeles. This new addition to the Anatomy of the Ship series is illustrated with contemporary photographs, scaled plans of the ship and hundreds of superb 3D illustrations which bring every detail of this historic battleship to life.

The Poetry of Rimbaud Robert Greer Cohn, 1999 The standard work on Rimbaud returns to print In this proven study on Arthur Rimbaud, the world's leading authority on Stéphane Mallarmé provides a guide to the understanding and appreciation of Rimbaud's entire poetic oeuvre. Robert Greer Cohn begins with an outline of the poet's life, focusing particularly on a childhood and adolescence that produced astoundingly original and frequently exquisite works, the whole body of poetry by a writer who ended his literary creation in his twentieth year. Cohn's analysis, combined with a substantial introduction, weaves together the known biographical facts with major clues from the poems to present a coherent portrait of the inner and outwardly imaged world of the young poet. Cohn draws on nondoctrinaire and open-minded approaches of modern depth psychology and philosophy and, most particularly, on the dazzlingly integral cosmic vision of Mallarmé. The resulting unified view affords insights into the meaning of many difficult passages, especially in the most hermetic and resistant of the Illuminations. Cohn also reveals the early poems, which heretofore received little attention, to be rich in poetic humanity. He suggests that the seeds of Rimbaud's later development lie in these early poems, which provide convincing paths into subsequent complexities.

The Battleship USS North Carolina Stefan Draminski, 2015-05-19 Launched in 1940, North Carolina was the first U.S. newly built battleship to have taken part in the war in the Pacific. During her busy combat career she demonstrated that battleships could perform very well indeed in their new role as escorts for fleet aircraft carriers and weapon platforms providing fire support for ground troops. Having earned no fewer than 15 Battle Stars during her wartime service, North Carolina was the most highly decorated US Navy battleship of World War II. After decommissioning, she escaped the chopping block and is preserved to this day as a floating museum

Trojan Wars and the Making of the Modern World Adam J. Goldwyn, 2015-12-10

US Fast Battleships 1936-47 Lawrence Burr, 2011-12-20 This volume details the design, construction, and operation of the first six of the ten US fast battleships, two of the North Carolina class and four of the South Dakota class. These six battleships were all authorized in 1936 and were the first vessels built in the US since 1923. Consequently, these ships benefitted from enormous technological leaps, with improvements in ship design, power, armor, armament and the single most important improvement the use of radar guided fire control helping to change the course of the war in the Pacific. Packed with first-hand accounts, battle reports, and specially created artwork this book tells the story of these war-winning vessels.

The Sixteenth-Century French Religious Book Andrew Pettegree, Paul Nelles, 2017-03-02 This study comprises the proceedings of a conference held in St Andrews in 1999 which gathered some of the most distinguished historians of the French book. It presents the 16th-century book in a new context and provides the first comprehensive view of this absorbing field. Four major themes are reflected here: the relationship between the manuscript tradition and the printed book; an exploration of the variety of genres that emerged in the 16th century and how they were used; a look at publishing and book-selling strategies and networks, and the ways in which the authorities tried to control these; and a discussion of the way in which confessional literature diverged and converged. The range of specialist knowledge embedded in this study will ensure its appeal to specialists in French history, scholars of the book and of 16th-century French literature, and historians of religion.

Angels and Demons in Art Rosa Giorgi, 2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

Hatred in Print Luc Racaut, 2017-05-15 Catholic polemical works, and their portrayal of Protestants in print in particular, are the central focus of this work. In contrast with Germany, French Catholics used printing effectively and aggressively to promote the Catholic cause. In seeking to explain why France remained a Catholic country, the French Catholic response must be taken into account. Rather than confront the Reformation on its own terms, the Catholic reaction concentrated on discrediting the Protestant cause in the eyes of the Catholic majority. This book aims to contribute to the ongoing debate over the nature of the French Wars of Religion, to explain why they were so violent and why they engaged the loyalties of such a large portion of the population. This study also provides an example of the successful defence of catholicism developed independently and in advance of Tridentine reform which is of wider significance for the history of the Reformation in Europe.
