Victory in Papua Samuel Milner, 2015-07-11 This is a companion volume to the one on Guadalcanal in the series on the war in the Pacific. Both record the operations designed to halt the advance of the enemy toward the vital transpacific line of communications with Australia and secure Australia as a base. Success in Papua and Guadalcanal, achieved in February 1943, put the Allied forces in a position to neutralize Rabaul and, this accomplished, to advance to the Philippines. The present volume concentrates on the action of one United States Army division. In telling the story of a comparatively limited number of troops, the author has been able to present the combat experience of small units in sharper focus than has been possible in most of the other full-scale campaign volumes. The campaign abounds in lessons. Of these one of the most vital is the frequent necessity for all commanders to evaluate their own actions by asking themselves this question: How could I have helped, how should I have helped, how can I help my subordinates to accomplish their assigned tasks?

Militant Mediator Dennis C. Dickerson, 2021-12-14 During the turbulent 1960s, civil rights leader Whitney M. Young Jr. devised a new and effective strategy to achieve equality for African Americans. Young blended interracial mediation with direct protest, demonstrating that these methods pursued together were the best tactics for achieving social, economic, and political change. *Militant Mediator* is a powerful reassessment of this key and controversial figure in the civil rights movement. It is the first biography to explore in depth the influence Young's father, a civil rights leader in Kentucky, had on his son. Dickerson traces Young's swift rise to national prominence as a leader who could bridge the concerns of deprived blacks and powerful whites and mobilize the resources of the white America to battle the poverty and discrimination at the core of racial inequality. Alone among his civil rights colleagues—Martin Luther King Jr., Roy Wilkins, James Farmer, John Lewis, and James Forman—Young built support from black and white constituencies. As a National Urban League official in the Midwest and as a dean of the School of Social Work at Atlanta University during the 1940s and 1950s, Young developed a strategy of mediation and put it to work on a national level upon becoming the executive director of the League in 1961. Though he worked with powerful whites, Young also drew support from middle-and working-class blacks from religious, fraternal, civil rights, and educational organizations. As he navigated this middle ground, though, Young came under fire from both black nationalists and white conservatives.

Medical Consequences of Natural Disasters Lazar Bein, 2012-12-06 In spite of all the progress made by modern science and technology in penetrating the mysteries of nature and providing new possibilities for its transformation, we remain largely helpless in the face of such natural phenomena as earthquakes, tsunamis, typhoons, floods, and droughts. Natural disasters occur suddenly, but with periodicity, and man has been confronted by their devastating consequences throughout history. The way people deal with these problems is primarily predetermined: by character, by conditions, and by the social and economic development of society. Industrious efforts to reconstruct nature, and exploitation of her resources, have brought about additional damage, and there is the apparent danger that our interference with the atmosphere and other areas such as climate, soil, and hydrology has initiated devastating processes which may well be irreversible. As a result, the effects of natural disasters, and all the ensuing repercussions, become ever more aggravating. Their scope becomes global, and for the time being we have no effective countermeasures at our disposal with which to fight them. The contemporary world, then, faces the interconnected and interdependent phenomena of ecological crises and natural disasters: the problem of protecting man from the environment, and the concurrent problem of protecting the environment from man.

Hydrogen and Fuel Cells International Energy Agency, Organisation for Economic Co-operation and Development, 2004 Hydrogen and fuel cells are vital technologies to ensure a secure and CO₂-free energy future. Their development will take decades of extensive public and private effort to achieve technology breakthroughs and commercial maturity. Government research programs are

indispensable for catalyzing the development process. This report maps the IEA countries' current efforts to research, develop and deploy the interlocking elements that constitute a hydrogen economy, including CO₂ capture and storage when hydrogen is produced out of fossil fuels. It provides an overview of what is being done, and by whom, covering an extensive complexity of national government R & D programs. The survey highlights the potential for exploiting the benefits of the international cooperation. This book draws primarily upon information contributed by IEA governments. In virtually all the IEA countries, important R & D and policy efforts on hydrogen and fuel cells are in place and expanding. Some are fully-integrated, government-funded programs, some are a key element in an overall strategy spread among multiple public and private efforts. The large amount of information provided in this publication reflects the vast array of technologies and logistics required to build the hydrogen economy.--Publisher description.

Rocket Propulsion Stephen D. Heister, William E. Anderson, Timothée L. Pourpoint, R. Joseph Cassady, 2019-02-07 Equips students with an up-to-date practical knowledge of rocket propulsion, numerous homework problems, and online self-study materials.

New Technologies, Development and Application II Isak Karabegović, 2019-04-23 This book features papers focusing on the implementation of new and future technologies, which were presented at the International Conference on New Technologies, Development and Application, held at the Academy of Science and Arts of Bosnia and Herzegovina in Sarajevo on 27th–29th June 2019. It covers a wide range of future technologies and technical disciplines, including complex systems such as Industry 4.0; robotics; mechatronics systems; automation; manufacturing; cyber-physical and autonomous systems; sensors; networks; control, energy, automotive and biological systems; vehicular networking and connected vehicles; effectiveness and logistics systems, smart grids, as well as nonlinear, power, social and economic systems. We are currently experiencing the Fourth Industrial Revolution “Industry 4.0”, and its implementation will improve many aspects of human life in all segments, and lead to changes in business paradigms and production models. Further, new business methods are emerging, transforming production systems, transport, delivery, and consumption, which need to be monitored and implemented by every company involved in the global market.

Foundations of Trusted Autonomy Hussein A. Abbass, Jason Scholz, Darryn J. Reid, 2018-01-15 This book establishes the foundations needed to realize the ultimate goals for artificial intelligence, such as autonomy and trustworthiness. Aimed at scientists, researchers, technologists, practitioners, and students, it brings together contributions offering the basics, the challenges and the state-of-the-art on trusted autonomous systems in a single volume. The book is structured in three parts, with chapters written by eminent researchers and outstanding practitioners and users in the field. The first part covers foundational artificial intelligence technologies, while the second part covers philosophical, practical and technological perspectives on trust. Lastly, the third part presents advanced topics necessary to create future trusted autonomous systems. The book augments theory with real-world applications including cyber security, defence and space.

The Delfly G.C.H.E. de Croon, M. Perçin, B.D.W. Remes, R. Ruijsink, C. De Wagter, 2015-11-26 This book introduces the topics most relevant to autonomously flying flapping wing robots: flapping-wing design, aerodynamics, and artificial intelligence. Readers can explore these topics in the context of the Delfly, a flapping wing robot designed at Delft University in The Netherlands. How are tiny fruit flies able to lift their weight, avoid obstacles and predators, and find food or shelter? The first step in emulating this is the creation of a micro flapping wing robot that flies by itself. The challenges are considerable: the design and aerodynamics of flapping wings are still active areas of scientific research, whilst artificial intelligence is subject to extreme limitations deriving from the few sensors and minimal processing onboard. This book conveys the essential insights that lie behind success such as the Delfly Micro and the Delfly Explorer. The Delfly Micro, with its 3.07 grams and 10 cm wing span, is still the smallest flapping wing MAV in the world carrying a camera, whilst the Delfly Explorer is the world's first flapping wing MAV that is able to fly completely autonomously in unknown environments. The Delfly project started in 2005 and ever since has served as inspiration, not only to many scientific flapping wing studies, but also the design of flapping wing toys. The combination of

introductions to relevant fields, practical insights and scientific experiments from the DelFly project make this book a must-read for all flapping wing enthusiasts, be they students, researchers, or engineers.

Sustainability and Environmental Decision Making Euston Quah, Renate

Schubert, 2021-06-07 The primary aim of this reference volume is to provide an accessible and comprehensive review of current methods used to address resource evaluation and environmental as well as climate issues, and in a manner easily understood by decision-makers and the non-economists interested in environmental policy matters. Theoretical insight and empirical observations from various countries will be presented and recommendations on sustainable environmental decision-making will be given. Natural resource managers, environmental and climate decision-makers, government policy makers, and economics scholars will all find this volume to be an essential reference.

Children with Disabilities Mark L. Batshaw, 2002 This reference provides coverage of the developmental, clinical, educational, family and intervention issues related to the care of children with disabilities. Readers will explore the beginning of life from conception to infancy, including factors in each stage that can cause disability; learn about child development, including physical development and preventable threats; go in-depth on specific developmental disabilities they'll likely encounter; and find guidelines on conducting interventions, managing outcomes, and working with families. preservice and in-service professionals. The book features case stories, a glossary of key terms and appendices about medications, resources and syndromes and inborn errors of metabolism.

Technology in Mathematics Teaching Gilles Aldon, Jana Trgalová, 2019-07-01 This book comprises chapters featuring a state of the art of research on digital technology in mathematics education. The chapters are extended versions of a selection of papers from the Proceedings of the 13th International Conference on Technology in Mathematics Teaching (ICTMT-13), which was held in Lyon, France, from July 3rd to 6th. ICTMT-13 gathered together over one hundred participants from twenty countries sharing research and empirical results on the topical issues of technology and its potential to improve mathematics teaching and learning. The chapters are organised into 4 themed parts, namely assessment in mathematics education and technology, which was the main focus of the conference, innovative technology and approaches to mathematics education, teacher education and professional development toward the technology use, and mathematics teaching and learning experiences with technology. In 13 chapters contained in the book, prominent mathematics educators from all over the world present the most recent theoretical and practical advances on these themes. This book is of particular interest to researchers, teachers, teacher educators and other actors interested in digital technology in mathematics education.

Digital Enterprise Transformation Axel Uhl, Lars Alexander Gollenia, 2016-04-22 The integration of technological innovations, such as In-Memory Analytics, Cloud Computing, Mobile Connectivity, and Social Media, with business practice can enable significant competitive advantage. In order to embrace recent challenges and changes in the governance of IT strategies, SAP and its think tank - the Business Transformation Academy (BTA) - have jointly developed the Digital Capability Framework (DCF). *Digital Enterprise Transformation: A Business-Driven Approach to Leveraging Innovative IT* by Axel Uhl and Lars Alexander Gollenia outlines the DCF which comprises six specific capabilities: Innovation Management, Transformation Management, IT Excellence, Customer Centricity, Effective Knowledge Worker, and Operational Excellence. In cooperation with the University of Applied Sciences and Arts Northwestern Switzerland, University of St. Gallen (Switzerland), Queensland University of Technology (Australia), University of Liechtenstein

(Principality of Liechtenstein), and Karlsruhe Institute of Technology (Germany), SAP and the BTA have been validating each capability and the corresponding maturity models based on analyzing several 'lighthouse' case studies comprising: SAMSUNG, IBM, Finanz Informatik, The Walt Disney Company, Google Inc., HILTI AG. Digital Enterprise Transformation presents how these companies take advantage of innovative IT and how they develop their digital capabilities. On top the authors also develop and present a range of novel yet hands-on Digital Use Cases for a number of different industries which have emerged from innovative technological trends such as: Big Data, Cloud Computing, 3D Printing and Internet of Things.

International Conference on Innovative Computing and Communications Deepak Gupta, Ashish Khanna, Siddhartha Bhattacharyya, Aboul Ella Hassanien, Sameer Anand, Ajay Jaiswal, 2020-10-24 This book includes high-quality research papers presented at the Third International Conference on Innovative Computing and Communication (ICICC 2020), which is held at the Shaheed Sukhdev College of Business Studies, University of Delhi, Delhi, India, on 21-23 February, 2020. Introducing the innovative works of scientists, professors, research scholars, students and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-time applications.

Private Security and the Law Charles Nemeth, 2011-10-13 Private Security and the Law, Fourth Edition, is a unique resource that provides a comprehensive analysis of practices in the security industry as they relate to law, regulation, licensure, and constitutional questions of case and statutory authority. It is an authoritative, scholarly treatise that serves as a solid introduction for students regarding the legal and ethical standards that shape the industry. The book takes you step-by-step through the analysis of case law as it applies to situations commonly faced by security practitioners. It describes the legal requirements faced by security firms and emphasizes the liability problems common to security operations, including negligence and tortious liability, civil actions frequently litigated, and strategies to avoid legal actions that affect business efficiency. It also examines the constitutional and due-process dimensions of private security both domestically and internationally, including recent cases and trends that are likely to intensify in the future. New features of this edition include: a chapter on the legal implications of private contractors operating in war zones like Afghanistan; updated coverage of statutory authority, as well as state and federal processes of oversight and licensure; and special analysis of public-private cooperative relationships in law enforcement. A historical background helps readers understand the present by seeing the full context of recent developments. This book will appeal to: students in physical security, security management, and criminal justice programs in traditional and for-profit schools; security professionals; and those working in law enforcement. Authoritative, scholarly treatise sheds light on this increasingly important area of the law. Historical background helps readers understand the present by seeing the full context of recent developments. National scope provides crucial parameters to security practitioners throughout the US. NEW TO THIS EDITION! A chapter on the legal implications of private contractors operating in war zones like Afghanistan, updated coverage of statutory authority, updated coverage of state and federal processes of oversight and licensure, special analysis of public-private cooperative relationships in law enforcement.

Water Resources Engineering Challa Satya Murthy, 2002 This Book Presents A Comprehensive Treatment Of The Various Dimensions Of Water Resources Engineering. The Fundamental Principles And Design Concepts Relating To Various Structures Are Clearly Highlighted. The Practical Application Of Design Concepts Is Emphasised Throughout The Book. The Text Is Profusely Illustrated By A Large Number Of Detailed Drawings And photographs. Several Worked Out Examples Are Also Included For A Better Understanding Of The Concepts. Practice Problems And Questions From Various Examinations Are Given For Exercise And Self-Test. This Revised Edition Includes * A New Chapter On River Diversion Head Works Statistical Analysis Of Rainfall And Run-Off Data * Infiltration Indices And Storage Capacity Of Reservoirs * Design Of Sarda Type Canal Drop * Additional Photographs, Diagrams And

Examples. The Book Would Serve As An Ideal Text For B.E. Civil Engineering Students And Amie Candidates. Practising Engineers And Candidates Appearing In Various Competitive Examinations Including Gate, Upsc And Ies Would Also Find This Book Very Useful.

Helmet-Mounted Display Design Guide National Aeronautics and Space Administration (NASA), 2018-07-25 Helmet Mounted Displays (HMDs) present flight, navigation, and weapon information in the pilot's line of sight. The HMD was developed to allow the pilot to retain aircraft and weapon information while looking off boresight. This document reviews current state of the art in HMDs and presents a design guide for the HMD engineer in identifying several critical HMD issues: symbol stabilization, inadequate definitions, undefined symbol drive laws, helmet considerations, and Field Of View (FOV) vs. resolution tradeoff requirements. In particular, display latency is a key issue for HMDs. In addition to requiring further experimental studies, it impacts the definition and control law issues. Symbol stabilization is also critical. In the case of the Apache helicopter, the lack of compensation for pilot head motion creates excessive workload during hovering and Nap Of the Earth (NOE) flight. This translates into excessive training requirements. There is no agreed upon set of definitions or descriptions for how HMD symbols are driven to compensate for pilot head motion. A set of definitions is proposed to address this. There are several specific areas where simulation and flight experiments are needed: development of hover and NOE symbologies which compensate for pilot head movement; display latency and sampling, and the tradeoff between FOV, sensor resolution and symbology.
