Hermann Hiery

Boots on the ground: Troop Density in Contingency Operations John J. McGrath, 2006 This paper clearly shows the immediate relevancy of historical study to current events. One of the most common criticisms of the U.S. plan to invade Iraq in 2003 is that too few troops were used. The argument often fails to satisfy anyone for there is no standard against which to judge. A figure of 20 troops per 1000 of the local population is often mentioned as the standard, but as McGrath shows, that figure was arrived at with some questionable assumptions. By analyzing seven military operations from the last 100 years, he arrives at an average number of military forces per 1000 of the population that have been employed in what would generally be considered successful military campaigns. He also points out a variety of important factors affecting those numbers-from geography to local forces employed to supplement soldiers on the battlefield, to the use of contractors-among others.

The Neglected War Hermann Hiery, 1995-12-01 In the summer of 1914 Germany's Pacific colonies were a quiet backwater of its empire. But the shots of Sarajevo shattered the Pacific as well as Europe. Within weeks of the outbreak of World war I Western Samoa - German territory to be taken in the war - New Guinea, and the Micronesian lands, were occupied by Australian, New Zealand, and Japanese forces. Current historiography claims that World War I made little difference to the indigenous populations of the Pacific and that this change in colonial masters had little effect

on those they ruled. The Neglected War challenges this interpretation. World War I and its aftermath, Hermann Hiery claims, had a tremendous effect on the Pacific Islands, Hiery details the policies pursued by Australia, New Zealand, and Japan, showing how each viewed and treated the indigenous populations. Administered by military officers with little civil oversight, the new colonial regimes employed the mandates they had received at the Paris Peace Conference with impunity. Hiery's scrupulous review of the evidence, gathered from largely unknown primary sources, has uncovered a story of masquerades and coverups, negligence and duplicity, leading in some cases to full blown atrocities. Most of all, he tells the story of Pacific Islanders ,how they coped with the dramatic changes brought about by the war, and how they tried to influence its consequences. Many Islanders were fully aware that their political destiny was to be redefined after the war, and a few even saw it as an opportunity to achieve independence. This is also the story of their failure. Behind the evidence gathered here lie fundamental questions. How important are the differences in the nature of particular colonial regimes, and what effect do such differences have on indigenous peoples? How do indigenous peoples interpret disparities in colonial rule? This revisionist work addresses these issues while shedding light on a crucial time in the history of the Pacific.

Naval Accidents, 1945-1988 William M.
Arkin, Joshua Handler, 1989
The Pacific Rural Press ,1921

The Challenge of Slums United Nations Human Settlements Programme, 2012-05-23 The Challenge of Slums presents the first global assessment of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all level, from local to global, that underlie the formation of slums as well as their social, spatial and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics, case studies and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities and civil society organizations

around the world.

Behind the Veneer Joanna Smith, Ray Rogers, 2015-04-01 South Shoreditch lies just north of the City of London, at the centre of a band that has become known as the 'City Fringe'. The area's greatest architectural legacy arises from the furniture trade and for almost a century - from the mid-19th to the mid-20th - Shoreditch dominated the industry as the major centre of furniture manufacturing and wholesale selling to the domestic and export markets. Following the industry's demise in the 1980s, many of its buildings have been given a new life as offices, bars or restaurants and live/work units. Shoreditch's proximity to the City has now led to enormous development pressures and a serious threat to the architectural distinctiveness of the area from commercial clean-sweep schemes and piecemeal interventions. In 2002 English Heritage formed a partnership with Hackney Council, the Greater London Authority and other relevant agencies to present a co-ordinated response and a strategic planning framework for South Shoreditch. This highly illustrated publication draws upon the findings of a comprehensive appraisal of the character and significance of the area. It will appeal to local residents and workers, architectural historians, furniture trade practitioners past and present, conservationists, planners, and visitors to the area.

Would You Kill the Fat Man? David Edmonds, 2014 Most people feel it's wrong to kill the fat man.

Colour-Coded Constance Backhouse, 1999-11-20 Historically Canadians have considered themselves

to be more or less free of racial prejudice. Although this conception has been challenged in recent years, it has not been completely dispelled. In *Colour-Coded*, Constance Backhouse illustrates the tenacious hold that white supremacy had on our legal system in the first half of this century, and underscores the damaging legacy of inequality that continues today. Backhouse presents detailed narratives of six court cases, each giving evidence of blatant racism created and enforced through law. The cases focus on Aboriginal, Inuit, Chinese-Canadian, and African-Canadian individuals, taking us from the criminal prosecution of traditional Aboriginal dance to the trial of members of the 'Ku Klux Klan of Kanada.' From thousands of possibilities, Backhouse has selected studies that constitute central moments in the legal history of race in Canada. Her selection also considers a wide range of legal forums, including administrative rulings by municipal councils, criminal trials before police magistrates, and criminal and civil cases heard by the highest courts in the provinces and by the Supreme Court of Canada. The extensive and detailed documentation presented here leaves no doubt that the Canadian legal system played a dominant role in creating and preserving racial discrimination. A central message of this book is that racism is deeply embedded in Canadian history despite Canada's reputation as a raceless society. Winner of the Joseph Brant Award, presented by the Ontario Historical Society

Sumner-Gearing-class Destroyers Robert F. Sumrall, 1995 The US Navy's Sumner-Gearing-class

destroyers served as a standard for post-WWII destroyer design and development. In this outstandingly illustrated work (bandw throughout with a 16-page color center-spread) Sumrall traces the origins and evolution of these destroyers over nearly forty years and through three wars, showing the advances made in ordnance, fire control, and steam engineering. Annotation copyright by Book News, Inc., Portland, OR

Canadian Expeditionary Force, 1914-1919 G.W.L. Nicholson, Mark Osborne Humphries, 2015-11-01
Colonel G.W.L. Nicholson's Canadian Expeditionary Force, 1914-1919 was first published by the Department of National Defence in 1962 as the official history of the Canadian Army's involvement in the First World War. Immediately after the war ended Colonel A. Fortescue Duguid made a first attempt to write an official history of the war, but the ill-fated project produced only the first of an anticipated eight volumes. Decades later, G.W.L. Nicholson - already the author of an official history of the Second World War - was commissioned to write a new official history of the First. Illustrated with numerous photographs and full-colour maps, Nicholson's text offers an authoritative account of the war effort, while also discussing politics on the home front, including debates around conscription in 1917. With a new critical introduction by Mark Osborne Humphries that traces the development of Nicholson's text and analyzes its legacy, Canadian Expeditionary Force, 1914-1919 is an essential resource for both professional historians and military history enthusiasts.

On Contested Shores Timothy Heck, Brett A. Friedman, 2020 The basis for *On Contested Shores* has been under construction since before the Commandant released the planning guidance. As career Marine officers, who spent very little time at sea, the editors have long been concerned that the Marine Corps was becoming too land-centric, heavily reflecting the characteristics of a second land army. This has been true since 1991, when the Marine Corps participated in a land campaign in Iraq, and especially since 2001, when it participated in three land campaigns: Afghanistan, Iraq, and Syria. To fight these battles, the Marine Corps became heavier, upgraded equipment, and generally focused on counterinsurgency tactics vice amphibious warfare. While the Marine Corps always steps up to fight alongside the U.S. Army, its purpose is naval campaigns fought alongside the U.S. Navy. This book is in part a way to help figure out how to regain and maintain the skills necessary for maritime operations--

Planning Sustainable Cities United Nations Human Settlements Programme, 2009 This publication reviews recent urban planning practices and approaches, discusses constraints and conflicts therein, and identifies innovative approaches that are more responsive to current challenges of urbanization. It notes that traditional approaches to urban planning (particularly in developing countries) have largely failed to promote equitable, efficient and sustainable human settlements and to address twenty-first century challenges, including rapid urbanization, shrinking cities and aging, climate change and

related disasters, urban sprawl and unplanned peri-urbanization, as well as urbanization of poverty and informality. It concludes that new approaches to planning can only be meaningful, and have a greater chance of succeeding, if they effectively address all of these challenges, are participatory and inclusive, as well as linked to contextual socio-political processes.--Publisher's description

The Courts of the Morning John Buchan,2009-01-02 South America is the setting for this adventure from the author of 'The Thirty-nine Steps'. When Archie and Janet Roylance decide to travel to the Gran Seco to see its copper mines they find themselves caught up in dreadful danger; rebels have seized the city. Janet is taken hostage in the middle of the night and it is up to the dashing Don Luis de Marzaniga to aid her rescue.

Jacobite Gleanings from State Manuscripts J. Macbeth Forbes,1903

A Guide to the Archives of the Police Forces of England and Wales Ian Bridgeman,1990

Social Movements David S. Meyer,Nancy Whittier,Belinda Robnett,2002 Why do social movements take the forms they do? How do activists' efforts and beliefs interact with the cultural and political contexts in which they work? This book considers the intersections of opportunities and identities, structures and cultures, in social movements.

Memoirs of an Infantry Officer Siegfried Sassoon,2022-08-16 DigiCat Publishing presents to you this special edition of *Memoirs of an Infantry Officer* by Siegfried Sassoon. DigiCat Publishing

considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Time's Up! C.T. (Terry) Gillin, David MacGregor, Thomas R. Klassen, 2005-06 Mandatory retirement has become a major social and political issue in Canada. In this book expert authors explore the key themes that lie at the heart of the debate on this subject.

Hellcat Barrett Tillman, 2012-10-11 Largely responsible for crushing Japanese airpower wherever the American fast carrier force sailed, the Grumman F6F Hellcat was considered the most important Allied aircraft in the Pacific during 1943 and 1944. Designed for speed, range, and climb to compete with Japan's exceptional Mitsubishi A6M Zero, it succeeded not only in engaging the Zeke on equal terms but also in dictating the rules of combat. Fighters in every sense of the word, the Hellcats were credited with destroying more than five thousand Japanese aircraft, gaining outright air supremacy over the invasion beaches, and helping ensure Allied amphibious victories in the Central Pacific. Aviation historian Barrett Tillman presents the full story of the fighter plane--the men who built and tested it, the squadrons that flew it, and the heroes it created. Heavily illustrated with photographs from the pilots' own collections, this spirited, carefully documented operational history

is an absolute must for anyone interested in aviation history. It is now available for the first time in paperback.

Lloyd's Maritime Atlas of World Ports and Shipping Places 2020-2021 Informa UK Ltd, 2021-01-31 Published since 1951, Lloyd's Maritime Atlas is the oldest and most respected atlas in the shipping industry. A comprehensive reference for locating the world's busiest ports and shipping places, this new edition has been fully updated and enhanced with brand new maps and features to alleviate the demands on today's busy shipping professional. In the 2020-2021 edition: Fully up-to-date with the latest port names and locations World map indicating where MARPOL, SECA and PSSA regulations are in force Double page spread revealing piracy hotspots and detailed analyses of routes to avoid as well as a new symbol indicating incidence of piracy on the main maps World map of vaccinations required to protect against major global diseases Up-to-the-minute Marine Distance Tables and fleet statistics In addition, Lloyd's Maritime Atlas continues to provide: Precise latitude and longitude co-ordinates of over 8,000 ports and shipping places from around the world Over 70 full-colour world, ocean and regional maps At-a-glance weather hazards at sea and international load line zones maps Expansive double-page world distance table plus 33 detailed regional tables to help you plan your route Unique geographical and alphabetical indexing system to help you quickly and easily find a location All major canal and river systems, plus main road, rail and airport connections to

cater for multi-modal journeys This book continues to be the premier reference guide for shipping professionals worldwide.
