Natural Fibers, Plastics and Composites Frederick T. Wallenberger, Norman Weston, 2011-06-28

50 Years of South Midland, 1921-1970 David Flitton, 2004

New Generation of Electric Vehicles Johanna Adison, 2016-10-01 There is an unprecedented surge of interest in and the desire of producing gas electric hybrid (HEVs) and all-electric vehicles (EVs) by the governments and public in the industrialized countries. This surge of interest and desire is attributed to several factors relating to the life-threatening air pollution in many parts of the world, the high petroleum price, conflicts in oil producing Middle East regions and the alarming trend of global warming due to rapid increase of greenhouse gas emissions by all sources, including those from transportation. Full electric vehicles use no gasoline; they are powered by a high-voltage electric motor and battery pack. All the elements are now in place to tackle fairly complex static rigid body problems. Battery electric vehicles do not have an internal combustion engine and use no on-board gasoline. Instead, they use a high-voltage electric motor, which gets its power from a high-voltage battery pack. The primary benefit of BEVs is that they completely eliminate carbon dioxide (CO₂) and other emissions directly from the vehicle. Therefore, it is vital to raise global ecological awareness and wider public education regarding ecology. Goal of this book is to bring closer to the readers new drive technologies that are intended to

environment and nature protection. New Generation of Electric Vehicles presents modern technique achievements and technologies applied in the implementation of electric vehicles. Special attention was paid to energy efficiency of electrical vehicles. Also today's trends, mathematical models and computer design elements of future cars are presented.

Creating and Digitizing Language Corpora J. Beal, K. Corrigan, H. Moisl, 2007-07-12 A range of electronic corpora has become accessible via the WWW and CD-ROM. This coincides with improvements in standards governing the collecting, encoding and archiving of such data. This book develops similar standards for enriching and preserving 'unconventional' data': the fragmentary texts and voices left to us as accidents of history.

Room at the Inn Kristy Dykes, Pamela Griffin, 2004 These two holiday romances are perfectly paired at one irresistible price! Authors Kristy Dykes and Pamela M. Griffin celebrate hospitality by hanging out the welcome sign at a bed-and-breakfast inn in Florida and a bed-and-breakfast ranch in Texas. Characters seeking rest and seclusion for the holidays are about to get a surprise--Lois steps under the orange tree and into a love triangle, and Derrick is roped by a match-making scheme. Will faith, hope, and love be invited to take up permanent residence in their hearts after the holidays--or be asked to check out when the Christmas tree comes down?

Advanced Inorganic Fibers Frederick T. Wallenberger,John B. MacChesney,Roger Naslain,Harold D. Ackler,2011-04-27 F. T. Wallenberger This book serves as an introduction to advanced inorganic fibers and aims to support fundamental research, assist applied scientists and designers in industry, and facilitate materials science instruction in universities and colleges. Its three main sections deal with fibers which are derived from the vapor phase such as single crystal silicon whiskers or carbon nanotubes, from the liquid phase such as advanced glass and single crystal oxide fibers, and

from solid precursor fibers such as carbon and ceramic fibers. Contents
FIBERS FROM THE VAPOR, LIQUID AND SOLID PHASE 1.1 The most important phase
is the liquid phase 1.2 A fiber by any name is still a fiber 1.3 Biographic
sketches of the authors 1.4 Acknowledgments CHAPTER 1 FIBERS FROM THE VAPOR,
LIQUID AND SOLID PHASE F. T. Wallenberger The book describes advanced
inorganic fibers, focuses on principles and concepts, analyzes experimental
and commercial processes, and relates process variables to structures,
structures to fiber properties and fiber properties to end-use performance. In
principle, there are discontinuous or inherently short, and continuous or
potentially endless, fibers. Short fibers range from asbestos fibers, which
were described as early as 300 BC to carbon nanotubes which were discovered
in 1991 [1] and have been fully described in 1999 [2].

Structural Biological Materials M. Elices, 2000-05-08 The ongoing process of
bio-evolution has produced materials which are perfectly adapted to fulfil a
specific functional role. The natural world provides us with a multitude of
examples of materials with durability, strength, mechanisms of programmed
self-assembly and biodegradability. The materials industry has sought to
observe and appreciate the relationship between structure, properties and
function of these biological materials. A multidisciplinary approach,

building on recent advances at the forefront of physics, chemistry and molecular biology, has been successful in producing many synthetic structures with interesting and useful properties. Structural Biological Materials: Design and Structure-Property Relationships represents an invaluable reference in the field of biological materials science and provides an incisive view into this rapidly developing and increasingly important topic within materials science. This book focuses on the study of three sub-groups of structural biological materials: • Hard tissue engineering, focussing on cortical bone • Soft tissue engineering • Fibrous materials, particularly engineering with silk fibers. The fundamental relationship between structure and properties, and certain aspects of design and engineering, are explored in each of the sub-groups. The importance of these materials, both in their intrinsic properties and specific functions, are illustrated with relevant examples. These depict the successful integration of material properties, architecture and shape, providing a wide range of optimised designs, tailored to specific functions. Edited by Manuel Elices of the Universidad Politécnica de Madrid, Spain, this book is Volume 4 in the Pergamon Material Series.
