Patton's Juggernaut: The Rolling 8-Ball 8th Tank Battalion of the 4th Armored Division Albin F. Irzyk,2017-07-22 This is the biography, not of an individual but of a small military unit, the 8th Tank Battalion, 4th Armored Division (1943-1946). Combat with the German Army was the destiny of this Battalion. Nothing in my long, full life could compare with the priceless opportunity that I had to command the men of the 8th Tank Battalion. This is their story.

Steel Victory Harry Yeide,2003 Using the words of the tank soldiers themselves, and the radio logs of their real-time communications, Harry Yeide vividly brings back all the men and machines of this crucial method of combat - one that, in the end, may have won the war. Here are startling revelations of the treacherous fighting, and the challenges and dangers of battling a better-equipped enemy in outmoded, slow-moving death traps. Steel Victory recounts how tank planning, expertise, and accuracy grew as the war roared on - and reveals the inside story of how tank battalions turned the tide in the Battle of the Bulge and other major encounters of the European war. Here is an honest, painstakingly researched history of these man-driven vehicles that, in the words of one soldier, saved the day, shot the hell out of the Germans, and had the hell shot out of them.--BOOK JACKET.

The Virtual Community, revised edition Howard Rheingold,2000-10-23 Howard Rheingold tours the virtual community of online networking. Howard Rheingold has been called the First Citizen of the Internet. In this book he tours the virtual community of online networking. He describes a community that is as real and as much a mixed bag as any physical community—one where people talk, argue, seek information, organize politically, fall in love, and dupe others. At the same time that he tells moving stories about people who have received online emotional support during devastating illnesses, he acknowledges a darker side to people's behavior in cyberspace. Indeed, contends Rheingold, people relate to each other online much the same as they do in physical communities. Originally published in 1993, The Virtual Community is more timely than ever. This edition contains a new chapter, in which the author revisits his ideas about online social communication now that so much more of the world's population is wired. It also contains an extended bibliography.

India's Ad Hoc Arsenal Chris Smith,1994 Chris Smith explores the evolution of Indian defence policy since 1947. He looks carefully at

the domestic dynamics of Indian defence policy. This includes an in-depth analysis of the period 1947-62, which is often ignored by Indian defence analysts, and the performance of the defence industrial base. He concludes that India's defence policy is designed more as one aspect of the quest for great power status than as an attempt to acquire security at an affordable price.

Handbook of Fruits and Fruit Processing Y. H. Hui, József Barta, M. Pilar Cano, Todd W. Gusek, Jiwan S. Sidhu, Nirmal K. Sinha, 2008-02-28 The processing of fruits continues to undergo rapid change. In the Handbook of Fruits and Fruit Processing, Dr. Y.H. Hui and his editorial team have assembled over forty respected academicians and industry professionals to create an indispensable resource on the scientific principles and technological methods for processing fruits of all types. The book describes the processing of fruits from four perspectives: a scientific basis, manufacturing and engineering principles, production techniques, and processing of individual fruits. A scientific knowledge of the horticulture, biology, chemistry, and nutrition of fruits forms the foundation. A presentation of technological and engineering principles involved in processing fruits is a prelude to their commercial production. As examples, the manufacture of several categories of fruit products is discussed. The final part of the book discusses individual fruits, covering their harvest to a finished product in a retail market. As a professional reference book replete with the latest research or as a practical textbook filled with example after example of commodity applications, the Handbook of Fruits and Fruit Processing is the current, comprehensive, yet compact resource ideal for the fruit industry.

Sherman R. P. Hunnicutt, 2015-03-26 In Sherman: A History of the American Medium Tank, R. P. Hunnicutt provides the comprehensive history of the technological evolution that led to the production of Sherman M4 in 1942 and its development, variants, and modifications. Although the Sherman was part of the US pre-war development program, its adaptability to conditions on the front led to extensive British innovations drawn from battle experience. As WWII raged on, these modifications transformed the Sherman into a highly specialized workhorse of the Anglo-American armored forces. Taking full advantage of the ease with which the Sherman absorbed modifications, British forces adapted Shermans as minesweepers, amphibious assault float tanks, bulldozers, flame throwers, CDL tanks for nighttime attacks, carriages for tank destroyers and self-propelled artillery, among other uses. The Sherman, the epitome of American prowess in mass production, played an integral role in infantry support and fought in every major theater of operation in

WWII. Due to its reliability, adaptability, and sheer strength in numbers, the Sherman M4 served with unmatched longevity, and Hunnicutt touches upon the wide range of combat conditions that the M4 performed under, in addition to its post-WWII activity. Featuring over a thousand photos from the National Archives, diagrams, and detailed specifications, Hunnicutt's Sherman remains the definitive history of M4 for the military historian, professional soldier, and tank restorer. 1,368 black & white photos, 12 color plates

Richard Pearce Hunnicutt (1926-2011) enlisted in the 7th Infantry Division in 1944 and in 1945 was promoted to sergeant and awarded the Silver Star for his heroic actions. After WWII, Hunnicutt earned a Masters in engineering from Stanford University under the GI Bill. In addition to being one of the most respected metallurgists in California, Hunnicutt wrote the definitive 10-volume history of the development and employment of American armored vehicles. As a tank historian and leading expert in the field, Hunnicutt was one of the founders of the US Army Ordnance Museum at Aberdeen Proving Ground, MD and was a close friend and frequent contributor to the Patton Museum at Fort Knox, KY.
