Wood and Wood Joints Klaus Zwerger, 2012 Building with wood as an ecologically viable material is a tradition with a long history. The timber architecture which has ensued over the past centuries reveals to the modern observer the depth of knowledge which has enabled both Eastern and Western cultures to use this wonderful material in such a creative way. In the most typical method of building with wood, elements are connected by using wood joints which do not require the assistance of adhesives or metal connectors. This art of wood jointing reached its zenith in Japan; but Europe too provided its share of highly influential forms. By looking at several hundred examples from Japan and 18 European countries, with a new chapter on China added to this enlarged edition, this book describes in great detail the history of timber architecture in terms of its technical, aesthetic and ecological dimensions. This thorough study is a mine of information to specialists in this field; it opens up to the craftsman of today what has become an almost forgotten world and provides a fascinating account for the general reader. Here is a man who has trekked through the wild Carpathian forests, the Norwegian outback, the Russian steppes and obscure regions of Japan in pursuit of the wood joint. He tells the story with a sense of unfolding discovery; for anyone interested in how buildings work this book is a joy to read. the architects journal

House and Home in Modern Japan Jordan Sand, 2020-05-11 A house is a site, the bounds and focus of a community. It is also an artifact, a material extension of its occupants' lives. This book takes the Japanese house in both senses, as site and as artifact, and explores the spaces, commodities, and conceptions of community associated with it in the modern era. As Japan modernized, the principles that had traditionally related house and family began to break down. Even where the traditional class markers surrounding the house persisted, they became vessels for new meanings, as housing was resituated in a new nexus of relations. The house as artifact and the artifacts it housed were affected in turn. The construction and ornament of houses ceased to be stable indications of their occupants' social status, the home became a means of personal expression, and the act of dwelling was reconceived in terms of consumption. Amid the breakdown of inherited meanings and the fluidity of modern society, not only did the increased diversity of commodities lead to material elaboration of dwellings, but home itself became an object of special attention, its importance emphasized in writing, invoked in politics, and articulated in architectural design. The aim of this book is to show the features of this culture of the home as it took shape in Japan.

Heritage Conservation and Japan's Cultural Diplomacy Natsuko Akagawa, 2014-07-25 Japan's heritage conservation policy and practice, as deployed through its foreign aid programs, has become one of the main means through which post-World War II Japan has sought to mark its presence in the international arena, both globally and regionally. Heritage conservation has been intimately linked to Japan's sense of national identity, in addition to its self-portrayal as a responsible global and regional citizen. This book explores the concepts of heritage, nationalism and Japanese national identity in the context of Japanese and international history since the second half

of the nineteenth century. In doing so, it shows how Japan has built on its distinctive approach to conservation to develop a heritage-based strategy, which has been used as part of its cultural diplomacy designed to increase its 'soft power' both globally and within the Asian region. More broadly, Natsuko Akagawa underlines the theoretical nexus between the politics of heritage conservation, cultural diplomacy and national interest, and in turn highlights how issues of heritage conservation practice and policy are crucial to a comprehensive understanding of geo-politics. Heritage Conservation and Japan's Cultural Diplomacy will be of great interest to students, scholars and professionals working in the fields of heritage and museum studies, heritage conservation, international relations and Asian/Japanese studies.

Shigeru Ban Shigeru Ban, 2014 Beginning with his pioneering designs for United Nations refugee shelters in the mid-1990s, 2014 Pritzker winning architect Shigeru Ban has devoted himself to humanitarian efforts in the wake of some of the most devastating natural and manmade disasters of the past two decades. With projects jointly selected by Ban and AAM Nancy and Bob Magoon CEO and Director Heidi Zuckerman Jacobson, and the exhibition design done by the architect himself, Shigeru Ban: Humanitarian Architecture broadly explores this fascinating and inspiring component of the architect's practice with full-scale examples of Ban's groundbreaking designs.

Geography of Religion in Japan Keisuke Matsui, 2013-12-09 This book discusses modern aspects of Japanese religion in terms of cultural geography. To understand the function of religion, it is essential to examine it in the context of local societies. One of the distinguishing characteristics of Japanese religion is its diversity; indeed, it is often remarked that "Japan is a museum of religions."

In this work, the author clarifies some geographical aspects of the complex situation of Japanese religion. Chapter 1 discusses the trend of geographical studies of religion in Japan, of which four types can be identified. Chapter 2 focuses on certain characteristics of Japanese religious traditions by discussing tree worship and the landscape of sacred places. Chapter 3 clarifies regional divisions in the catchment areas of Japanese Shintoism by analyzing the distribution of certain types of believers. The author discusses two case studies: the Kasama Inari Shrine and the Kanamura Shrine. Chapter 4 discusses some modern aspects of sacred places and tourism through two case studies. The first part of the chapter focuses on changes in the types of businesses at the Omotesando of the Naritasan Shinshoji-Monzenmachi, and the following sections examine the revitalization of the local community through the promotion of religious tourism.

Japanese Mythology in Film Yoshiko Okuyama, 2015-04-09 A cyborg detective hunts for a malfunctioning sex doll that turns itself into a killing machine. A Heian-era Taoist slays evil spirits with magic spells from yin-yang philosophy. A young mortician carefully prepares bodies for their journey to the afterlife. A teenage girl drinks a cup of life-giving sake, not knowing its irreversible transformative power. These are scenes from the visually enticing, spiritually eclectic media of Japanese movies and anime. The narratives of courageous heroes and heroines and the myths and legends of deities and their abodes are not just recurring motifs of the cinematic fantasy world. They are pop culture's representations of sacred subtexts in Japan. *Japanese Mythology in Film* takes a semiotic approach to uncovering such religious and folkloric tropes and subtexts embedded in popular Japanese movies and anime. Part I introduces film semiotics with plain definitions of terminology. Through familiar cinematic examples, it emphasizes the myth-making nature of modern-day film and argues that semiotics can be used as a theoretical tool for reading film. Part II

presents case studies of eight popular Japanese films as models of semiotic analysis. While discussing each film's use of common mythological motifs such as death and rebirth, its case study also unveils more covert cultural signifiers and folktale motifs, including jizo (a savior of sentient beings) and kori (bewitching foxes and raccoon dogs), hidden in the Japanese filmic text.

Digital Draw Connections Fabio Bianconi, Marco Filippucci, 2021-04-27 This book stems from the seminal work of Robert Venturi and aims at re-projecting it in the current cultural debate by extending it to the scale of landscape and placing it in connection with representative issues. It brings out the transdisciplinary synthesis of a necessarily interdisciplinary approach to the theme, aimed at creating new models which are able to represent the complexity of a contradictory reality and to redefine the centrality of human dimension. As such, the volume gathers multiple experiences developed in different geographical areas, which come into connection with the role of representation. Composed of 43 chapters written by 81 authors from around the world, with an introduction by Jim Venturi and Cezar Niculescu, the volume is divided into two parts, the first one more theoretical and the other one which showcases real-world applications, although there is never a total split between criticism and operational experimentation of research.

Japan Foreclosed Property (2015-16) Andrew Sheldon, 2015-10-04 Japan Foreclosed Property is a guide for English-speaking foreigners to avail of the opportunities to buy foreclosed property in Japan at a substantial discount through court-administered tenders. The guide provides the reader with a broad array of resources inclusive of the political, economic, social pretext for investing in property in Japan, as well as how to participate in the process, how to research, strategies, what you need to do, and how to fix up properties. The guide is targeted at English speakers, because the author purchased several foreclosed properties in Japan, and he saw the opportunity for a guide for

those people who wish to live, retire or holiday in Japan, because the country is highly regarded by expatriates.

Sustainable City and Creativity Tüzin Baycan, 2016-04-01 The notion of 'creative cities' - where cultural activities and creative and cultural industries play a crucial role in supporting urban creativity and contributing to the new creative economy - has become central to most regional and urban development strategies in recent years. A creative city is supposed to develop imaginative and innovative solutions to a range of social, economic and environmental problems: economic stagnancy, urban shrinkage, social segregation, global competition or more. Cities and regions around the world are trying to develop, facilitate or promote concentrations of creative, innovative and/or knowledge-intensive industries in order to become more competitive. These places are seeking new strategies to combine economic development with quality of place that will increase economic productivity and encourage growth. Against this increasing interest in creative cities, this volume offers a coherent set of articles on sustainable and creative cities, and addresses modern theories and concepts relating to research on sustainability and creativity. It analyses principles and practices of the creative city for the formulation of policies and recommendations towards the sustainable city. It brings together leading academics with different approaches from different disciplines to provide a comprehensive and holistic overview of creativity and sustainability of the city, linking research and practice. In doing so, it puts forward ideas about stimulating the production of an innovative knowledge for a creative and sustainable city, and transforming a specific knowledge into a general common knowledge, which suggests best future policy actions, decision-making processes and choices for the change towards a human sustainable development of the city.

"Wordplay" in Ancient Near Eastern Texts Scott B. Noegel,2021-07-02 This book from Scott B. Noegel offers a comparative, in-depth study of wordplay in ancient Near Eastern texts. Noegel establishes comprehensive taxonomies for the many kinds of devices that scholars label as wordplay and for their proposed functions. The consistent terminology proposed offers students and scholars of Sumerian, Akkadian, Egyptian, Ugaritic, Hebrew, and Aramaic a useful template for documenting and understanding the devices they discover and for comparing them across languages for a rich interdisciplinary dialogue.

Community Practices for Disaster Risk Reduction in Japan Rajib Shaw, 2016-08-23 This book presents key lessons from community-based risk-reduction practices in Japan, a country that is often hit by disasters and that also has shown strong resilience in coping with those disasters. Japan has a strong governance system for disaster risk reduction. However, the Kobe earthquake of 1995

showed the importance of community involvement in disaster response as well as recovery. With several examples from different parts of Japan, the book elaborates on the importance of community-based risk reduction and the innovations required for sustaining some of the community approaches. The book has 13 chapters and is divided into three parts: (1) Evolution of community-based risk reduction in Japan; (2) Community-based risk-reduction issues; and (3) Case studies. The primary target groups for this book are students and researchers in the fields of environment, disaster risk reduction, and climate change studies. The book provides them with a good idea of the current research trends in the field and furnishes basic knowledge about these vital topics. Another target group comprises practitioners and policy makers, who will be able to apply the knowledge collected here to policy and decision-making.
