Asia-Pacific Rebalance 2025 Michael Green,Kathleen Hicks,Mark F. Cancian,2016-02-04 In 2015, Congress tasked the Department of Defense to commission an independent assessment of U.S. military strategy and force posture in the Asia-Pacific, as well as that of U.S. allies and partners, over the next decade. This CSIS study fulfills that congressional requirement.

The Reserve Policies of Nations: A Comparative Analysis Richard Weitz,Strategic Studies Institute,2014-06-22 While the American defense community has naturally been preoccupied with the extensive transformation of the U.S. reserve components in recent years, equally critical developments in the reserve policies of the world's other major military powers have received less attention. The inevitability of continued American engagement with these countries means that their changing policies are highly relevant to the United States. American defense planners should therefore keep abreast of ongoing alterations in these countries' reserve components and, in certain cases, might wish to adjust their own forces and policies in response. The Reserve Policies of Nations provides a comprehensive assessment of these issues as well as a wealth of data on recent developments affecting the reserve policies of many of the world's leading military powers: Australia, Britain, Canada, China, France, Germany, Israel, Japan, and Russia.

Japan's Peacekeeping at a Crossroads Hiromi Nagata Fujishige,Yuji Uesugi,Tomoaki Honda,2022-01-12 This open access book examines why Japan discontinued its quarter-century history of troop contribution to UN Peacekeeping Operations (1992-2017). Japan had deployed its troops as UN peacekeepers since 1992, albeit under a constitutional limit on weapons use. Japan's peacekeepers began to focus on engineering work as its strength, while also trying to relax the constraints on weapons use, although to a minimal extent. In 2017, however, Japan suddenly withdrew its engineering corps from South Sudan, and has contributed no troops since then. Why? The book argues that Japan could not match the increasing "robustness" of recent peacekeeping operations and has begun to seek a new direction, such as capacity-building support.

Navy Aegis Ballistic Missile Defense (BMD) Program Ronald O'Rourke,2011-05 The Aegis BMD program gives Navy Aegis cruisers and destroyers a capability for conducting BMD operations. Under current plans, the number of BMD-capable Navy Aegis ships is scheduled to grow from 20 at the end of FY 2010 to 38 at the end of FY 2015. Contents of this report: (1) Intro.; (2) Background: Planned Quantities of Ships, Ashore Sites, and Interceptor Missiles; Aegis BMD Flight Tests; Allied Participation and Interest in Aegis BMD Program; (3) Issues for Congress: Demands for BMD-Capable Aegis Ships; Demands for Aegis Ships in General; Numbers of SM-3 Interceptors; SM-2 Block IV Capability for 4.0.1 and Higher Versions; (4) Legislative Activity for FY 2011. PACS Keith J. Dreyer,Amit Mehta,James H. Thrall,2013-03-14 This textbook reviews the technological developments associated with the transition of radiology departments to filmless environments. Each chapter addresses the key topics in current literature with regard to the generation, transfer, interpretation and distribution of images to the medical enterprise. As leaders in the field of computerized medical imaging, the editors and contributors will provide insight into emerging technologies for physicians, administrators, and other interested groups. As health care organizations throughout the world begin to generate filmless implementation strategies, this exhaustive review has proven to be a vital aid to leaders in the development of health care.

The Japanese Ground Self-Defense Force Robert D. Eldridge,Paul Midford,2017-01-21 Based on extensive Japanese-language materials, this book is the first to examine the development of Japan's Ground Self-Defense Force. It addresses: how the GSDF was able to emerge as the post-war successor of the Imperial Japanese Army despite Japan's anti-militarist constitution; how the GSDF, despite the public skepticism and even hostility that greeted its creation, built domestic and international legitimacy; and how the GSDF has responded to changes in international and domestic environments. This path-breaking study of the world's third-largest-economic power's ground army is timely for two reasons. First, the resurgence of tensions in Northeast Asia over territorial disputes, and the emphasis recent Japanese governments have placed on using the GSDF for defending Japan's outlying islands is driving media coverage and specialist interest in the GSDF. Second, the March 11, 2011 Great East Japan Earthquake and Tsunami has focused global attention on the GSDF as Japan's lead disaster relief organization. This highly informative and thoroughly researched book provides insight for policy makers and academics interested in Japanese foreign and defense policies.

Raising Red Flags N.R. Jenzen-Jones,Jonathan Ferguson,2014-11-18 This report examines the significant range of arms and munitions carried and employed throughout the conflict by armed individuals on all sides. It also examines, somewhat less extensively, the range of armoured vehicles and aircraft observed in the conflict. This report examines over 100 distinct weapons systems, over 60 different types of munitions, and over 70 different models of armoured fighting vehicles, as well as miscellaneous associated materiel, in the context of the ongoing conflict in Ukraine. Particular attention is paid to items which may indicate flows of arms and munitions into and within the affected areas of Ukraine. Beginning with an assessment of the arms and munitions employed during the initial unrest in Kiev, in February 2012, the report documents relevant materiel up until the time of publication

Theory in Archaeology Peter J. Ucko,2005-08-10 Theory in Archaeology tackles important questions about the diversity in archaeological theory and practice which face the discipline in the 1990s. What is the relationship between theory and practice? How does 'World' archaeological theory differ from 'European'? Can one be a good practitioner without theory? This unique book brings together contributors from many different countries and continents to provide the first truly global perspective on archaeological theory. They examine the nature of material culture studies and look at problems of ethnicity, regionalism, and nationality. They consider, too, another fundamental of archaeological inquiry: can our research be objective, or must 'the past' always be a relativistic construction? Theory in Archaeology is an important book whose authors bring together very different perceptions of the past. Its wide scope and interest will attract an international readership among students and academics alike.

Pacific Currents Evan S. Medeiros,Keith Crane,Eric Heginbotham,2008 China's importance in the Asia-Pacific has been on the rise, raising concerns about competition the United States. The authors examined the reactions of six U.S. allies and partners to China's rise. All six see China as an economic opportunity. They want it to be engaged productively in regional affairs, but without becoming dominant. They want the United States to remain deeply engaged in the region.

Beech Aircraft and Their Predecessors Alain J. Pelletier,1995 Highly acclaimed for its comprehensive coverage of the aviation industries and their products, from the turn of the century to the present, this popular series includes an abundance of photos and highly accurate line drawings. Each volume provides fascinating evaluations of aircraft design and construction and complete histories of aircraft manufacturers.

The American Home Guard Barry M. Stentiford,2002 Since colonial times Americans have used the militia to maintain local order during both war and peacetime. States have intermittently created, maintained, deployed, and disbanded countless militia organizations outside the scope of the better-known National Guard. Barry M. Stentiford tells the story of these militia units--variously called home guards, State Guard, National Guard Reserve, and State Defense Forces. Stentiford traces the evolution of the militia over the past century, demonstrating its transformation from an amalgamation of state militia units into the National Guard, a reserve of the army. Ironically, the very existence of the National Guard made the creation of other militia forces necessary during periods of war. The home guards or State Guard were organized to fill the vacuum left when the National Guard was called up, depriving states of an organized militia that could be mobilized for repelling invasions, suppressing riots, controlling strikes, or guarding the waterfront. Stentiford carefully analyzes the challenges that faced the State Guards as states sought to build their new militia with leftover men and material. He also examines the role of the State Guard: providing relief during and after natural disasters, providing military training for future draftees, and broadening participation in military units during wartime by giving a role to men who, because of their age or occupation, could not join the federal forces. The State Guard gained a new significance in the Cold War, especially as the political unpalatability of a draft and reductions in the size of the full-time military expanded the functions of the National Guard in military policy. Today modern state militias, born to an ancient tradition, must define a role for themselves in a society that increasingly views them as anachronistic. They must also compete

ideologically with so-called unorganized militias for the title of true heir to the American militia tradition.

Telemedicine in Dermatology H. Peter Soyer,Michael Binder,Anthony C. Smith,Elisabeth M.T. Wurm,2012-01-03 Written by leading teledermatologists and telemedicine experts, this hands-on guide addresses the practical needs of the many emerging teledermatology services worldwide. It covers the medical and technical prerequisites for such services as well as the photographic imaging essentials. It also illustrates the performance of teledermatology by means of clinical examples, discusses teledermatology in underdeveloped countries, and presents specialized methods of teledermatology. The impact of telemedicine on the doctor-patient relationship is explored, and the advantages that accrue from improving access to expert knowledge are explained. In addition, quality assurance, legal assumptions, economic aspects, and the future horizons of such health care services are all considered. A comprehensive appendix provides information on training opportunities, sample protocols, consent forms, information sheets, references, and relevant web links.

Practical Imaging Informatics Society for Imaging,2009-10-03 Attention SIIM Members: a special discount is available to you; please log in to the SIIM website at www.siim.org/pii or call the SIIM office at 703-723-0432 for information on how you can receive the SIIM member price. Imaging Informatics Professionals (IIPs) have come to play an indispensable role in modern medicine, and the scope of this profession has grown far beyond the boundaries of the PACS. A successful IIP must not only understand the PACS itself, but also have knowledge of clinical workflow, a base in several medical specialties, and a solid IT capability regarding software interactions and networking. With the introduction of a certification test for the IIP position, a single source was needed to explain the fundamentals of imaging informatics and to demonstrate how those fundamentals are applied in everyday practice. Practical Imaging Informatics describes the foundations of information technology and clinical image management, details typical daily operations, and discusses rarer complications and issues.

Asia Pacific Security Outlook 2005 Richard W. Baker,Charles E. Morrison,2005-07 The Asia Pacific Security Outlook series provides assessments of the security environment, defense issues, and regional and global cooperation from the perspectives of countries that participate in the ASEAN Regional Forum. This ninth edition reports on the impact of such recent trends and events as the continuing slow-motion crisis over North Korea's nuclear program and other potential proliferation of weapons of mass destruction; further terrorist attacks combined with the forces of radical Islamism and regional rebellion that threaten numerous countries in the region; stresses in the relations of major regional powers, including China's relations with the United States (especially over Taiwan) and Japan; and new questions about the long-term future of a U.S. presence in the region. Adding the toll of natural disasters, disease, and persistent poverty, human security is under threat virtually throughout the region. Based on the work and expertise of a multinational team of security analysts and written for generalists and specialists alike, the Outlook is the most concise and authentic comparative work in this field. Contributors include Ross Cottrill (Australian Institute of International Affairs), Allen G. Sens (University of British Columbia), Martin Wagener (University of Trier, Germany), Philips Vermonte (Centre for Strategic and International Studies, Indonesia), Ken Jimbo (Japan Forum for International Relations), Kim Sung-han, (Ministry of Foreign Affairs and Trade, ROK), Elina Noor (Institute of Strategic and International Studies, Malaysia), Bayarmagnai Toinkhuu (Institute for Strategic Studies, Mongolia), Peter Cozens (Victoria University of Wellington, New Zealand), Victor Cha (Georgetown University), Ronald J. Learning from a Disaster Scott D. Sagan,Edward D. Blandford,2016-04-06 This book—the culmination of a truly collaborative international and highly interdisciplinary effort—brings together Japanese and American political scientists, nuclear engineers, historians, and physicists to examine the Fukushima accident from a new and broad perspective. It explains the complex interactions between nuclear safety risks (the causes and consequences of accidents) and nuclear security risks (the causes and consequences of sabotage or terrorist attacks), exposing the possible vulnerabilities all countries may have if they fail to learn from this accident. The book further analyzes the lessons of Fukushima in comparative perspective, focusing on the politics of safety and emergency preparedness. It first compares the different policies and procedures adopted by various nuclear facilities in Japan and then discusses the lessons learned—and not learned—after major nuclear accidents and incidents in other countries in the past. The book's editors conclude that learning lessons across nations has proven to be very difficult, and they propose new policies to improve global learning after nuclear accidents or attacks.

Worldwide Implementation of Digital Imaging in Radiology International Atomic Energy Agency,2015 This publication provides a basic introduction to digital technology and digital networks as well as an overview of the issues to consider when implementing such technology in diagnostic radiology. In an area that is under rapid development, it provides a careful analysis of the principles and advice on implementation and sustainability of digital imaging and teleradiology. The transition from film to digitally based medical imaging is complex and requires knowledge and planning to be successful. This comprehensive resource guide contains information on the needs and implications of a transition to digital imaging with case studies for different facilities requiring different levels on communication connectivity. It is aimed at hospital administrators and managers, radiologists and radiographers/technologist, medical physicists and clinical engineers as well as information technology staff.
