Little Free Libraries & Tiny Sheds Philip Schmidt, Little Free Library, 2019-03-26 Expand the sharing movement to your community with Little Free Libraries and Tiny Sheds—your complete source for building tiny sharing structures, including plans for 12 different structures, step-by-step photography and instructions, inspirational examples, and maintenance. Around the world, a community movement is underway featuring quaint landscape structures mounted on posts in front yards and other green spaces. Some are built for personal use, as miniature sheds for gardeners or as decorative accent pieces. More commonly,

though, they are evidence of the growing trend toward neighborhood organization and community outreach. This movement has been popularized by Wisconsin-based Little Free Library (LFL), whose members currently include 75,000 stewards seeking to build community togetherness and promote reading at the same time by sharing books among neighbors. LFL has inspired builders to use similar structures to share things like CDs, food, garden tools, and seeds in the community. Produced in cooperation with Little Free Library, Little Free Libraries and Tiny Sheds is the builder's complete source of inspiration and how-to knowledge. Illustrated throughout with colorful step-by-step photography and a gallery of tiny structures for further inspiration, Little Free Libraries and Tiny Sheds covers every step: planning and design, tools and building techniques, best materials, and 12 complete plans for structures of varying size and aesthetics. In addition, author and professional carpenter Phil Schmidt includes information on proper installation of small structures and common repairs and maintenance for down the road. Little Free Libraries and Tiny Sheds even includes information on how to become a steward, getting the word out about your little structure once it's up and running, and tips for building a lively collection. Community

togetherness has never been so at the fore of our consciousness—or so important. Little Free Libraries and Tiny Sheds is one tool on the road to helping you build community in your neighborhood.

*School Fundraising Handbook* Lindsey Marsh, 2019-11-21

Written by Lindsey Marsh, *The School Fundraising Handbook: How to maximise your income from grants, sponsorship and many other sources of finance* is a carefully compiled treasury of tips, tools and key contacts to help schools in the UK save money, boost their income and manage their fundraising projects. It's exciting to know that there are hundreds of grants available to schools whether they're for funds needed to raise attainment levels, purchase new equipment, run school clubs or improve buildings and outdoor spaces and these grants can range from a few pounds to thousands of pounds! Plus, in addition to financial grants, there are also lots of other means of support out there too, such as business sponsorship and employee volunteers. *The School Fundraising Handbook* aims to help schools become better informed about such opportunities, and to raise awareness of all the wonderful charities and organisations that are willing to support schools and other educational establishments such as nurseries, colleges, special schools and pupil referral units. Covering grants, crowdfunding, event planning, recycling schemes, corporate

support and much more, this indispensable guide throws schools a lifeline by revealing the abundance of fundraising streams available to them and sharing shrewd advice on how to coordinate specific projects and initiatives successfully. Lindsey also uses her fundraising expertise to guide readers through the grant application process from start to finish, so that even the most inexperienced fundraiser can feel confident about seeing their projects through to fruition. Furthermore, she offers ideas and insights on how to fundraise through wider community involvement, reach out to business links and benefit from various other opportunities available to schools (e.g. hire schemes, guest speakers, free gifts and free site visits). An invaluable resource for school leaders, school business managers and anyone involved in fundraising in the education sector.

**Librarians and Educators Collaborating for Success** Marcia A. Mardis, 2016-12-05 The first in the IASL-Libraries Unlimited partnership series, this book features contributions written by authors from around the world about their effective collaboration experiences. Collaboration between teachers and school librarians is a topic that is often discussed in the quest for educational excellence, but the international perspective is something that is

rarely explored. This text documents the collaboration endeavors in international school libraries and—drawing upon research and direct experience—demonstrates effective collaboration experiences in a range of countries. It also features selected brief case studies as well as several original essays on the topic of collaboration between teachers and teacher librarians in curriculum planning. The result of a joint effort between Libraries Unlimited and the International Association of School Librarianship (IASL), this book shows how collaboration with teachers looks in the international arena. It addresses topics such as collaborating for success with student searching, the roles of librarians and teachers in the research process, principal involvement, information literacy, inquiry-based learning, use of digital resources, models of collaboration for diversity, and evaluation of collaboration. Additionally, the current research findings presented will offer readers new insights into their profession.

*Maximizing the Impacts of Academic Research* Patrick Dunleavy,Jane Tinkler,2020-10-10 This is an invaluable guide to better research communication within and beyond academia. With many years of research experience, the authors provide scholars and scientists with systematic advice on how to ensure their research reaches its potential, and grows the recognition, influence, practical application and public understanding of science and scholarship. It begins by examining how citations work and evaluating the different measures of academic influence, from legacy bibliometric systems to altmetrics and digital metrics. Subsequent chapters show readers how to craft impactful journal articles, work effectively with co-authors, create a portfolio of publications and build a digital strategy that promotes knowledge exchange. Checklists help readers decide how and in what format to publish, enabling them to get their research in front of the right people. Throughout, the authors illustrate impact with data drawn from a wide range of disciplines. Maximizing the Impacts of

Academic Research is ideal for PhD students and early career researchers taking their first steps into academic research, experienced researchers mentoring the next generation of scholars and scientists and established academics looking to systematically review and upgrade their existing impact practices.
