**Achtung-Panzer!** Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**Transtopia in the Sinophone Pacific** Howard Chiang, 2021-04-06 As a broad category of identity, "transgender" has given life to a vibrant field of academic research since the 1990s. Yet the Western origins of the field have tended to limit its cross-cultural scope. Howard Chiang proposes a new paradigm for doing transgender history in which geopolitics assumes central importance. Defined as the antidote to transphobia, transtopia challenges a minoritarian view of transgender experience and makes room for the variability of transness on a historical continuum. Against the backdrop of the Sinophone Pacific, Chiang argues that the concept of transgender identity must be rethought beyond a purely Western frame. At the same time, he challenges China-centrism in the study of East Asian gender and sexual

configurations. Chiang brings Sinophone studies to bear on trans theory to deconstruct the ways in which sexual normativity and Chinese imperialism have been produced through one another. Grounded in an eclectic range of sources—from the archives of sexology to press reports of intersexuality, films about castration, and records of social activism—this book reorients anti-transphobic inquiry at the crossroads of area studies, medical humanities, and queer theory. Timely and provocative, *Transtopia in the Sinophone Pacific* highlights the urgency of interdisciplinary knowledge in debates over the promise and future of human diversity.
