Architecture Francis D. K. Ching, 2012-07-16 A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment. Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form, Space, and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

Are you a beginner

in sketching? Or are you a sketcher looking to infuse for colorful magic in your illustrations? Do you think that the average art instruction book omits too many steps in explaining the illustration techniques? Then this book is for you. Why combine pen, inks and watercolor for illustrations? Pen and ink are the ideal tools to create mind-blowing textures and contrasts in illustrations. Watercolor painting is appealing for the charming effects it creates but notorious for its unpredictability. When pen, ink and watercolor are combined in an illustration, magic happens! In this book, we will learn how to create this magic of texture, contrast and vivid colors. What will you learn in this book? - Pen shading techniques like hatching, cross-hatching, contour shading, stippling, and scribbling. - Acrylic ink shading techniques. - Wet and dry brush techniques for watercolor/ink. - Materials used for pen-ink-watercolor painting. These include the conventional materials as well as some 'exotic' materials (such as table salt and toothbrush!) for creating unique effects. - Creating textures using various shading techniques as well as different materials. Of course, the real learning happens by doing, not just reading. So, we will implement all the shading techniques and the brush techniques into ten step-by-step demonstrations. Each demonstration will teach you how to do the initial rough pencil sketch, line work using pens, and coloring. The ten step-by-step demonstrations will cover the following topics: A House and a Light Pole We will start with this beautiful monochrome illustration using pens and black acrylic ink. Wood and Rusted Metal Texture We will learn to create exquisite textures using pens, ink and watercolor in this exercise. An Old DP (Distribution Point) Box We will learn how a seemingly uninteresting and mundane subject can be used for a beautiful illustration. Also, textures, textures!! A Piece of Old Abandoned Machinery Even an ugly subject can be used as inspiration to draw a beautiful illustration. The Door We will use to capture the power of wooden textures and the charm of the old house in this illustration. A Stairway to Heaven We will learn how to simplify a seemingly complicated subject such as these curvy stairs. A Charming Little Lane We will learn how some rustic and subdued color combinations can be used to great effect. Wall of an Old House We will see how to 'cheat' our way to create a pretty illustration from a grey and depressing subject. A Stone Temple We will learn how a colorful illustration can be painted using a very limited color palette. Buildings in Ladakh We will learn to declutter a seemingly overwhelming subject and to create a 'feel' of a scene.

BOOK #2: PEN, INK AND WATERCOLOR SKETCHING VOLUME 2 – TEMPLES OF CAMBODIA Let's re-create the lost world of the ancient kings through pen, ink and watercolor sketching. Cambodia is a land of a rich heritage, ancient mystique and a tragic contemporary history. Nevertheless, as peace returned to Cambodia since the last two decades, the ancient temples in the city of Siem Reap found themselves back on the world's tourist map. Siem Reap is home to many ancient Hindu and Buddhist temples. These temples are an example of some of the most breathtaking architecture and incredible artwork. I travelled to Siem Reap in 2019 to visit these temples and experience sketching them on-location. The trip proved to be an enriching and meditative experience for me. I also realized that drawing and painting the illustrations of these ancient temples was equally a delightful and a challenging experience. In this book, you will learn to draw and paint 10 illustrations of various temples in Cambodia using pen, ink and watercolor through step-by-step demonstrations. All the illustrations use the reference photographs that I clicked while visiting the temples. Every demonstration describes the thought process behind and description of every step. Wherever necessary, I have discussed compositional considerations and perspective, materials used etc. You will learn the art of pen, ink and watercolor sketching via the following ten demonstrations. Scenes from three of the most famous temples of Cambodia are used for these demonstrations. -Ta Phrom (also known as The Tomb Raider temple) – The Roots -Ta Phrom – The Main Gate -Ta Phrom – The Ruins -Angkor Wat – The Stairs -Angkor Wat – The Inner Ruins -Angkor Wat – The

Library Building -Bayon Temple - The Entry Gate -Bayon Temple - The Faces of the Kings -Bayon Temple - The Buddha Statue -Ta Phrom - Some More Roots For many wannabe artists, the main hurdle is to begin the initial line sketch and getting the perspective right. To get rid of these hurdles, the reference photographs, rough sketches, compositional sketches and the final illustrations are given as free downloadable resources. You may use these resources to trace over the linework or use these references to give your unique spin to your artwork. The book will guide you about using these free resources to quickstart your drawing process. As a bonus, many sketches/paintings that I did on-location in those temples are also given. I have also shared some unique and interesting experiences I had while doing the on-location sketches. So, get ready to embark on an exciting and fulfilling journey of sketching with me.

The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

NICOMACHEAN ETHICS Aristotle,2017-04-20 ♦EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences,

their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single capacity- as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned.◆
