Jim Christley

Nuclear Powered Submarines U.S. Atomic Energy Commission. Division of Technical Information,1964

US Nuclear Submarines Jim Christley,2012-01-20 The adoption of nuclear power revolutionized submarine design and means that vessels can stay underwater for months, trailing the enemy or training weapons on land targets from secret positions, "always there, never seen." Jim Christley, a former submariner, explores here the influence of Admiral Hyman Rickover in cautiously introducing these stealthy machines of war, and frankly discusses the power and perils of using nuclear reactors at sea. Using unique and detailed artwork, he outlines the many evolving aspects of design within the submarine classes, from the very first nuclear submarine, USS Nautilus, to the classes under construction even now.

Run Silent, Run Deep Edward L. Beach,2016-10-15 This is a story of the silent service—the submarine crews which destroyed the Japanese merchant marine. A narrative taut with drama, told with the intimacy of a confession, it deals with two strong-headed men: their loves, their jealousies, and their destinies in the lonely and desperate struggle between the hunter and the hunted. Few war novels will rival Run Silent, Run Deep in the naked realism of its action. None will surpass its rising excitement and brilliant descriptions of men in combat. Unlike many war novels, here is a story that deals with war from the perspective of command. Edward Beach re-creates with fidelity the anguish, agony, and triumphs of command decisions. In Commander Richardson, he has created a character who embodies all that is fine, all that is human, in an excellent naval officer. In a sense, Run Silent, Run Deep is a monument, not to the misfits and the mistakes, but to those men who rose to greatness under the sometimes unbearable tensions of action.

Sustaining U.S. Nuclear Submarine Design Capabilities John Frederic Schank,2007 Nuclear submarine design resources at the shipyards, their suppliers, and the Navy may erode for lack of demand. Analysis of alternative workforce and workload management options suggests that the U.S. Navy should stretch out the design of the next submarine class and start it early or sustain design resources above the current demand, so that the next class may be designed on time, on budget, and with low risk.

Rickover and the Nuclear Navy Francis Duncan,1990 An official Atomic Energy Commission historian assigned to Admiral Rickover's office, Duncan draws on files, documents, and interviews to chronicle the introduction of nuclear powered ships into the US Navy. Covers the period from the mid-1950s to the early 1980s. Annotation copyrighted by Book News, Inc., Portland, OR

Atlas of Submarine Glacial Landforms J.A. Dowdeswell,M. Canals,M. Jakobsson,B.J. Todd,E.K. Dowdeswell,K. Hogan ,2016-12-16 New geophysical techniques (multibeam echo sounding and 3D seismics) have revolutionized high-resolution imaging of the modern seafloor and palaeo-shelf surfaces in Arctic and Antarctic waters, generating vast quantities of data and novel insights into sedimentary architecture and past environmental conditions. The Atlas of Submarine Glacial Landforms is a comprehensive and timely summary of the current state of knowledge of

these high-latitude glacier-influenced systems. The Atlas presents over 180 contributions describing, illustrating and discussing the full variability of landforms found on the high-latitude glacier-influenced seafloor, from fjords and continental shelves to the continental slope, rise and deep-sea basins beyond. The distribution and geometry of these submarine landforms provide key information on past ice-sheet extent and the direction and nature of ice flow and dynamics. The papers discuss individual seafloor landforms, landform assemblages and entire landsystems from relatively mild to extreme glacial marine climatic settings and on timescales from the modern margins of tidewater glaciers, through Quaternary examples to ancient glaciations in the Late Ordovician.

Admiral Hyman Rickover Marc Wortman, 2022-02-15 A riveting exploration of the brilliant, combative, and controversial “Father of the Nuclear Navy” “A superb and even-handed treatment of a complex, brilliant, and driven admiral who inspired both awe and loathing across the Navy he fundamentally reshaped.”—Admiral James Stavridis, former Supreme Commander, NATO, and author of 2034 Known as the “Father of the Nuclear Navy,” Admiral Hyman George Rickover (1899–1986) remains an almost mythical figure in the United States Navy. A brilliant engineer with a ferocious will and combative personality, he oversaw the invention of the world’s first practical nuclear power reactor. As important as the transition from sail to steam, his development of nuclear-propelled submarines and ships transformed naval power and Cold War strategy. They still influence world affairs today. His disdain for naval regulations, indifference to the chain of command, and harsh, insulting language earned him enemies in the navy, but his achievements won him powerful friends in Congress and the White House. A Jew born in a Polish shtetl, Rickover ultimately became the longest-serving U.S. military officer in history. In this exciting new biography, historian Marc Wortman explores the constant conflict Rickover faced and provoked, tracing how he revolutionized the navy and Cold War strategy.

The Art of Command Harry Laver, 2008-10-17 What essential leadership lessons do we learn by distilling the actions and ideas of great military commanders such as George Washington, Dwight D. Eisenhower, and Colin Powell? That is the fundamental question underlying The Art of Command: Military Leadership from George Washington to Colin Powell. The book illustrates that great leaders become great through conscious effort—a commitment not only to develop vital skills but also to surmount personal shortcomings. Harry S. Laver, Jeffrey J. Matthews, and the other contributing authors identify nine core characteristics of highly effective leadership, such as integrity, determination, vision, and charisma, and nine significant figures in American military history whose careers embody those qualities. The Art of Command examines each figure’s strengths and weaknesses and how those attributes affected their leadership abilities, offering a unique perspective of military leadership in American history. Laver and Matthews have assembled a list of contributors from military, academic, and professional circles, which allows the book to encompass diverse approaches to the study of leadership.

Introduction to Nuclear Engineering John R. Lamarsh, Anthony J. Baratta, 2013-08-29 The text is designed for junior and senior level Nuclear Engineering students. The third edition of this highly respected text offers the most current and complete introduction to nuclear engineering available. Introduction to Nuclear Engineering has

been thoroughly updated with new information on French, Russian, and Japanese nuclear reactors. All units have been revised to reflect current standards. In addition to the numerous end-of-chapter problems, computer exercises have been added.

Rig Ship for Ultra Quiet Andrew Karam, 2002-01-01 You've seen *The Hunt for Red October* and wondered if it was real. Now you'll know. *Rig Ship for Ultra Quiet* -- a book about submarines, written by a submariner. Spend two months in a nuclear fast attack submarine off the coast of the Soviet Union at the end of the Cold War with Andrew Karam, a decorated veteran of the US submarine force.

Body of Secrets James Bamford, 2007-12-18 The National Security Agency is the world's most powerful, most far-reaching espionage. Now with a new afterword describing the security lapses that preceded the attacks of September 11, 2001, *Body of Secrets* takes us to the inner sanctum of America's spy world. In the follow-up to his bestselling *Puzzle Palace*, James Bamford reveals the NSA's hidden role in the most volatile world events of the past, and its desperate scramble to meet the frightening challenges of today and tomorrow. Here is a scrupulously documented account--much of which is based on unprecedented access to previously undisclosed documents--of the agency's tireless hunt for intelligence on enemies and allies alike. *Body of secrets* is a riveting analysis of this most clandestine of agencies, a major work of history and investigative journalism. A New York Times Notable Book

Royal Navy Submarine Peter Goodwin, 2015-05-01 Launched in 1945 and commissioned two years later, submarine HMS Alliance was built for service with the Royal Navy in the Far East. Alliance had a long and distinguished career of more than 28 years that took her all over the world. Today, Alliance is the centrepiece at the Royal Navy Submarine Museum, Gosport, where the submarine experience is brought to life by tours around the boat. Former submariner and historian Peter Goodwin gives Alliance the Haynes Manual treatment, examining in detail her construction and restoration, and describing what it was like to live, work and go to war in a submarine.

The Brighton Boys with the Submarine Fleet James R. Driscoll, 2005-09-20 Wanted: young men to enlist in Uncle Sam's submarine fleet for service in European waters. The magic words stood out in bold type from the newspaper

that Jack Hammond held spread out over his knees. Underneath the caption ran a detailed statement setting forth the desire of the United States Government to recruit at once a great force of young Americans to man the undersea ships that were to be sent abroad for service against Germany.

Thunder Below! Eugene B. Fluckey, 2013-04-01 The thunderous roar of exploding depth charges was a familiar and comforting sound to the crew members of the USS Barb, who frequently found themselves somewhere between enemy fire and Davy Jones's locker. Under the leadership of her fearless skipper, Captain Gene Fluckey, the Barb sank the greatest tonnage of any American sub in World War II. At the same time, the Barb did far more than merely sink ships-she changed forever the way submarines stalk and kill their prey. This is a gripping adventure chock-full of you-are-there moments. Fluckey has drawn on logs, reports, letters, interviews, and a recently discovered illegal diary kept by one of his torpedomen. And in a fascinating twist, he uses archival documents from the Japanese Navy to give its version of events. The unique story of the Barb begins with its men, who had the confidence to become unbeatable. Each team helped develop innovative ideas, new tactics, and new strategies. All strove for personal excellence, and success became contagious. Instead of lying in wait under the waves, the USS Barb pursued enemy ships on the surface, attacking in the swift and precise style of torpedo boats. She was the first sub to use rocket missiles and to creep up on enemy convoys at night, joining the flank escort line from astern, darting in and out as she sank ships up the column. Surface-cruising, diving only to escape, Luckey Fluckey relentlessly patrolled the Pacific, driving his boat and crew to their limits. There can be no greater contrast to modern warfare's long-distance, videogame style of battle than the exploits of the captain and crew of the USS Barb, where they sub, out of ammunition, actually rammed an enemy ship until it sank. *Thunder Below!* is a first-rate, true-life, inspirational story of the courage and heroism of ordinary men under fire.

The Cultures of Work Organizations Harrison Miller Trice, Janice M. Beyer, 1993 This is the first, most comprehensive integration and synthesis of the growing literature on the cultures of work organizations. It offers a cultural perspective that is compatible with mainstream theories of organizations, while drawing upon the literatures in sociology, anthropology, organizations, communications, education, public administration, management, and business to illustrate the major components of work-related cultures. It will benefit professionals who are consultants, trainers, organizational development agents, and literate managers.

Under an Ionized Sky Elana Freeland, 2018-02-13 It is difficult to believe that our planet has been weaponized before our very eyes, but that is exactly what has happened. First, we were seduced by the convenience of a wireless world; then, atmospheric weather experimentation in the guise of carbons "climate change" converted the air we breathe into an antenna. Now, the geo-engineering we've been subjected to for two decades is being normalized as the "Star Wars" Space Fence rises around and within us. Is this the Space Age we were promised?
