*The International status of education about the Holocaust* Carrier, Peter, Fuchs, Eckhardt, Messinger, Torben, Georg Eckert Institute for International Textbook Research (Germany), 2015-01-14 How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy.

*Curating Contemporary Music Festivals* Brandon Farnsworth, 2020-07-31 Contemporary music, like other arts, is dealing with the rise of »curators« laying claim to everything from festivals to playlists - but what are they and what do they do anyway? Drawing from backgrounds ranging from curatorial studies to festival studies and musicology, Brandon Farnsworth lays out a theory for understanding curatorial practices in contemporary music, and how they could be a solution to the field's diminishing social relevance. The volume focuses on two case studies, the Munich Biennale for New Music Theatre, and the Maerzmusik Festival at the Berliner Festspiele, putting them in a transdisciplinary history of curatorial practice, and showing what music curatorial practice can be.

*The Muslim Brotherhood in Europe* Edwin Bakker, Roel Meijer, 2013-01-08 Scholars have long debated the intentions of the Muslim Brotherhood in the Middle East. Some claim the organization supports terrorism, while others believe it is a positive force for democratization. Though the Muslim Brotherhood in Europe has attracted less attention, many feel they understand the group just as well. They assume it is closely tied to its Middle Eastern counterpart, with detractors regarding it to be a suspicious, secretive, and centrally-led organization increasing the alienation of Europe's Muslims. Sympathizers, on the other hand, see it as a moderate, westernized, and fully-integrated force for good. This volume complicates both these views, with experts providing richer and more impartial perspectives on the critical issues relating to Europe's Muslim Brotherhood. It follows the growth and operation of these organizations within different European contexts and captures their highly specific relationship with non-Muslim media and authority figures.

Surface and Underground Excavations, 2nd Edition Ratan Raj Tatiya, 2013-05-13 Surface and Underground Excavations – Methods, Techniques and Equipment (2nd edition) covers the latest technologies and developments in the excavation arena at any locale: surface or underground. In the first few chapters, unit operations are discussed and subsequently, excavation techniques are described for various operations: tunnelling, drifting, raising, sinking, stoping, quarrying, surface mining, liquidation and mass blasting as well as construction of large subsurface excavations such as caverns and underground chambers. The design, planning and development of excavations are treated in a separate chapter. Especially featured are methodologies to select stoping methods through incremental analysis. Furthermore, this edition encompasses comprehensive sections on mining at 'ultra depths', mining difficult deposits using non-conventional technologies, mineral inventory evaluation (ore – reserves estimation) and mine closure. Concerns over Occupational Health and Safety (OHS), environment and loss prevention, and sustainable development are also addressed in advocating a solution to succeed within a scenario of global competition and recession. This expanded second edition has been wholly revised, brought fully up-to-date and includes (wherever feasible) the latest trends and best practices, case studies, global surveys and toolkits as well as questions at the end of each chapter. This volume will now be even more appealing to students in earth sciences, geology, and in civil, mining and construction engineering, to practicing engineers and professionals in these disciplines as well as to all with a general or professional interest in surface and underground excavations.

Mephisto Klaus Mann, 1995-09-01 "It chimes eerily with the times we are living through now." —Margaret Atwood, The New York Times Book Review Hendrik Hofgen is a man obsessed with becoming a famous actor. When the Nazis come to power in Germany, he willingly renounces his Communist past and deserts his wife and mistress in order to keep on performing. His diabolical performance as Mephistopheles in Faust proves to be the stepping-stone he yearned for: attracting the attention of Hermann Göring, it wins Hofgen an appointment as head of the State Theatre. The rewards – the respect of the public, a castle-like villa, a place in Berlin's highest circles – are beyond his wildest dreams. But the moral consequences of his betrayals begin to haunt him, turning his dreamworld into a nightmare. The Problem of Distraction Paul North, 2011-10-19 We live in an age of distraction. Contemporary analyses of culture, politics, techno-science, and psychology insist on this. They often suggest remedies for it, or ways to capitalize on it. Yet they almost never investigate the meaning and history of distraction itself. This book corrects this lack of attention. It inquires into the effects of distraction, defined not as the opposite of attention, but as truly discontinuous intellect. Human being has to be reconceived, according to this argument, not as quintessentially thought-bearing, but as subject to repeated, causeless blackouts of mind. The Problem of Distraction presents the first genealogy of the concept from Aristotle to the largely forgotten, early twentieth-century efforts by Kafka, Heidegger, and Benjamin to revolutionize the humanities by means of distraction. Further, the book makes the case that our present troubles cannot be solved by recovering or enhancing attention. Not-always-thinking beings are beset by radical breaks in their experience, but in this way they are also receptive to what has not and cannot yet be called experience.

Good Neighbors, Bad Times Revisited Mimi Schwartz,2021-03 Mimi Schwartz's father was born Jewish in a tiny German village thirty years before the advent of Hitler when, as he'd tell her, We all got along. In her original memoir, Good Neighbors, Bad Times, Schwartz explored how human decency fared among Christian and Jewish neighbors before, during, and after Nazi times. Ten years after its publication, a letter arrived from a man named Max Sayer in South Australia. Sayer, it turns out, grew up Catholic in the village during the Third Reich and in 1937 moved into an abandoned Jewish home five houses away from where the family of Schwartz's father had lived for generations before fleeing to America a few months earlier. The two families had never met. Sayer wrote an unpublished memoir about his childhood memories and in Schwartz's new edition, Good Neighbors, Bad Times Revisited, the two memoirs talk to each other. Weaving excerpts from Sayer's memoir and from a yearlong correspondence with him into her book, Schwartz revisits village history from a new perspective, deepening our understanding of decency and demonization. Given the rise of xenophobia, white supremacy, and anti-Semitism in the world today, this exploration seems more urgent than ever.
