*Debating Procreation* David Benatar,David Wasserman,2015-06-01 While procreation is ubiquitous, attention to the ethical issues involved in creating children is relatively rare. In *Debating Procreation*, David Benatar and David Wasserman take opposing views on this important question. David Benatar argues for the anti-natalist view that it is always wrong to bring new people into existence. He argues that coming into existence is always a serious harm and that even if it were not always so, the risk of serious harm is sufficiently great to make procreation wrong. In addition to these philanthropic arguments, he advances the misanthropic one that because humans are so defective and cause vast amounts of harm, it is wrong to create more of them. David Wasserman defends procreation against the anti-natalist challenge. He outlines a variety of moderate pro-natalist positions, which all see procreation as often permissible but never required. After criticizing the main anti-natalist arguments, he reviews those pronatalist positions. He argues that constraints on procreation are best understood in terms of the role morality of prospective parents, considers different views of that role morality, and argues for one that imposes only limited constraints based on the well-being of the future child. He then argues that the expected good of a future child and of the parent-child relationship can provide a strong justification for procreation in the face of expected adversities without giving individuals any moral reason to procreate

**Power Performance for Singers** Shirlee Emmons,Alma Thomas,1998-08-20 To perform well in today's highly competitive world where technical skills have been advanced

to an unprecedented degree, a singer must be able to handle incredible pressure within the performing arena; his or her ability to deal with this stress will often determine whether he or she will succeed. Why, then, do singers with less technical skill sometimes out-perform stars? Why do some stars suddenly stop performing? What is that mysterious factor that makes an electric performance? Consistent, competent performances do not depend solely upon superior vocal skills, nor are they a matter of luck. On the contrary, the best performances result from a combination of mental attitude, concrete performing skills, and excellent technical skills in that order. Yet most singers have never had the opportunity to acquire the essential skills that make for a successful career. Written as a self-help manual for singers at all levels of expertise, *Power Performance for Singers* is designed to teach performing artists, and especially singers, how to experience elite performance at their level. The skills outlined in this book will help singers use what they have, to enjoy their voices during performance, and to perform consistently to the best of their present ability.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Christopher B. Field, Vicente Barros, Thomas F. Stocker, Qin Dahe, 2012-05-28 This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

**Bougainville before the conflict** Anthony J Regan, Helga M Griffin, 2015-08-03 One of the most beautiful island groups of the Pacific, Bougainville has a remarkable history.

Tragically, it is as the site of devastating civil conflict that Bougainville is perhaps best known. In exploring the rich environmental, cultural and social heritage of Bougainville before the conflict, this collection provides an insight into the long-term causes of the crisis. In doing so, it surveys such topics as Bougainville's prehistory and traditional cultures, the impact of German and Australian colonialism, the attempts by disparate local cultures to find a common identity, the assertion of political autonomy in the face of coercion to integrate with Papua New Guinea, and contemporary efforts to resolve conflict and plan a viable future. A landmark collaboration between expert commentators on Bougainville and Bougainvilleans themselves, this volume provides a comprehensive picture for those seeking to understand Bougainville's history and future directions. *Bougainville before the conflict* was published in association with the State, Society and Governance in Melanesia Project, which is supported by The Australian National University and the Commonwealth of Australia.

**Beneath the Dust of Time** Jacques R. Pauwels, 2009 Aims to explain the origin and meaning of the names of peoples (e.g. Greeks, Germans), countries (e.g. Spain), continents (Europe, Africa), seas (Baltic), mountains (Alps, Pyrenees), rivers (Nile, Rhine, Danube), and

cities (Rome, Babylon). These names are generally extremely old, and many can be traced back to migrants who had fled from their desertifying homeland in North Africa and who spoke non-Indo-European languages such as Etruscan. Pauwels has written a book for the general public, but historians, geographers, and linguists will also benefit from reading it (...). [He] is a scholar who knows how to tell an intriguing story. Too few of his colleagues possess that talent.

*Peasants, Pilgrims, and Sacred Promises* Laura Stark, 2002-06-27 Lying on the border between eastern and western Christendom, Orthodox Karelia preserved its unique religious culture into the 19th and 20th centuries, when it was described and recorded by Finnish and Karelian folklore collectors. This colorful array of rituals and beliefs involving nature spirits, saints, the dead, and pilgrimage to monasteries represented a unique fusion of official Church ritual and doctrine and pre-Christian ethnic folk belief. This book undertakes a fascinating exploration into many aspects of Orthodox Karelian ritual life: beliefs in supernatural forces, folk models of illness, body concepts, divination, holy icons, the role of the ritual specialist and healer, the divide between nature and culture, images of forest, the cult of the dead, and the popular image of monasteries and holy hermits. It will appeal to anyone interested in popular religion, the cognitive study of religion, ritual studies, medical anthropology, and the folk traditions and symbolism of the Balto-Finnic peoples.

*Registers of Communication* Asif Agha, 2015-12-03 In any society, communicative activities are organized into models of conduct that differentiate specific social practices from each other and enable people to communicate with each other in ways distinctive to those practices. The articles in this volume investigate a series of locale-specific models of

communicative conduct, or registers of communication, through which persons organize their participation in varied social practices, including practices of politics, religion, schooling, migration, trade, media, verbal art, and ceremonial ritual. Drawing on research traditions on both sides of the Atlantic, the authors of these articles bring together insights from a variety of scholarly disciplines, including linguistics, anthropology, folklore, literary studies, and philology. They describe register models associated with a great many forms of interpersonal behavior, and, through their own multi-year and multi-disciplinary collaborative efforts, bring register phenomena into focus as features of social life in the lived experience of people in societies around the world.

Akuzilleput Igaqullghet Arctic Studies Center (National Museum of Natural History), 2002  
In the Alaskan community of Kingigin (population 165), also known as Wales, more than seventy-five indigenous terms for types of sea ice and ice conditions were recorded in 2007–2008 in the local Kingikmiut dialect of the Inupiaq language. In addition, over 30 terms were collected for various biological and cultural realities associated with the sea ice and ice hunting. Winton Weaypuk, Jr., a boat captain and a speaker of the Kingikmiut dialect, led the effort to collect local ice terms, documented elders' knowledge about ice, and took over 100 photos of various ice-related activities in the Wales area, as illustrations to the dictionary. Collecting indigenous words for sea ice in Wales was a part of the SIKU (Sea Ice Knowledge and Use) international project. For the SIKU project, over 30 local ice vocabularies were collected in indigenous communities in Alaska, Canada, Greenland, and Chukotka, Russia. The Wales Inupiaq Sea Ice Dictionary is the first to be published in full, with comments and illustrations. Special sections in the book written by project participants

(Weyapuk, Krupnik, Anungazuk, Eicken, and Druckenmiller) tell how the Kingikmiut ice 'dictionary' was prepared; how indigenous sea ice nomenclatures can be analyzed, and what we learned from compiling indigenous terms for ice in Wales, Alaska and beyond. The book is also illustrated by historical black-and-white photographs taken in Wales in 1922 by biologist Alfred M. Bailey, now in the collection of the Denver Museum of Nature and Science. Bailey's photos with comments by today's experts show how the environment and people's life in Wales have changed over the past eighty years. Traditional words for ice, illustrations of local ice forms, Inupiaq explanations and English translations of ice types and conditions presented in the book will be of help to Wales students, educators, young hunters, so that the knowledge possessed by elders is preserved for future generations. Inupiaq knowledge about sea ice environment is also an insightful window to polar scientists, students, educators, and media specialists into indigenous people's vision of Arctic climate change.

ReNEUAL Model Rules on EU Administrative Procedure Paul Craig, Herwig Hofmann, Jens-Peter Schneider, Jacques Ziller, 2017 The Research Network on EU Administrative Law (ReNEUAL) was established in 2009 and now comprises well over one hundred scholars and practitioners active in the field of EU and comparative public law. The aim of the network is to contribute to the development of a legal framework in which the constitutional values of the EU can be embedded in the exercise of public authority. research, best practices in different specific policies of the EU. The book includes an extended introduction chapter, followed by the Model Rules, which are organised into six parts. Part I addresses general issues concerning the scope of the Model Rules and their relation to existing rules in EU legislation and Member State law; Part II is concerned with rulemaking by EU institutions, bodies, offices, and agencies; Part III focuses on single case decision-making by EU institutions, bodies, offices, and agencies; Part IV addresses contracts of EU institutions, bodies, offices, and agencies; Part V discusses mutual assistance between administrations; and Part VI addresses inter-administrative information management.
