Popular Science, 2004-09 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Automotive Ethernet Kirsten Matheus, Thomas Königseder, 2015 Learn how automotive Ethernet is revolutionizing in-car networking from the experts at the core of its development. Providing an in-depth account of automotive Ethernet, from its background and development, to its future prospects, this book is ideal for industry professionals and academics alike.

Automotive Development Processes Julian Weber, 2009-06-22 The global crisis the automotive industry has slipped into over the second half of 2008 has set a fierce spotlight not only on which cars are the right ones to bring to the market but also on how these cars are developed. Be it OEMs developing new models, suppliers integrating themselves deeper into the development processes of different OEMs, analysts estimating economical risks and opportunities of automotive investments, or even governments creating and evaluating scenarios for financial aid for suffering automotive companies: At the end of the day, it is absolutely indispensable to comprehensively understand the processes of automotive development - the core subject of this book. Let's face it: More than a century after Carl Benz, Wilhelm Maybach and Gottlieb Daimler developed and produced their first motor vehicles, the overall concept of passenger cars has not changed much. Even though components have been considerably optimized since then, motor cars in the 21st century are still driven by combustion engines that transmit their propulsive power to the road surface via gearboxes, transmission shafts and wheels, which together with spring-damper units allow driving stability and ride comfort. Vehicles are still navigated by means of a steering wheel that turns the front wheels, and the required control elements are still located on a dashboard in front of the driver who operates the car sitting in a seat.

The 'Made in Germany' Champion Brands Ugesh A. Joseph, 2016-03-09 Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In *The 'Made in Germany' Champion Brands*, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

Transforming Automobile Assembly Koichi Shimokawa, Ulrich Jürgens, Takahiro Fujimoto, 2012-12-06 For the world's leading car-makers, the early 1990s brought radical changes. The reports published by MIT shocked management in European and American industries. Former major companies had to face consequences no one had expected. The assembly-lines were reorganized in order to achieve higher quality at lower costs.

Five years after the MIT report, this book poses the question: What are the results of this revolution in work organization? Scientists and practitioners, many of them involved in earlier reports, evaluate the changes to the automotive industry in Europe and Japan. An insight into recent concepts in automation and the organization of production.

Research and the Future of Telematics Jerzy Mikulski, 2020-10-13 This book constitutes selected papers from the 20th International Conference on Transport Systems Telematics, TST 2020, held in Kraków, Poland, in October 2020. The 34 full papers presented in this volume were carefully reviewed and selected from 97 submissions. They were organized in topical sections named: telematics in road transport - general view; telematics in road transport - details in applications.- telematics in rail and marine transport; general about telematics.

A Successful Transformation? Petr Pavlínek, 2008-04-30 This is a brilliant examination of the complex processes of the post-1990 transformation in the Czech automotive industry and its selective integration into the West European system. The post-1990 restructuring of the industry is analyzed in the context of its pre-1990 development and in the context of the East European automobile industry as a whole. Specifically, the book examines the development and post-1990 restructuring of the Czech car, components, and truck industries.

Product Design Alex Milton, Paul Rodgers, 2011-08-29 Product Design offers a broad and comprehensive introduction to the field of product design and the key role of product designers. It follows through all the stages and activities involved in the creation of a new product - from concept design to manufacture, prototyping to marketing. It encourages the reader to challenge conventions and to think about the subject in new and exciting ways. The book also explores the diverse nature of product design, including new and emerging forms of practice. A rich overview of influential design movements and individuals are covered, together with interviews and examples from prominent product designers, and working practices and career guidance relevant to today. Full of visual examples and practical information, the book is an essential guide for students or anyone interested in product design.

Innovations in Electrical and Electronic Engineering Margarita N. Favorskaya, Saad Mekhilef, Rajendra Kumar Pandey, Nitin Singh, 2020-07-25 The book is a compilation of selected papers from 2020 International Conference on Electrical and Electronics Engineering (ICEEE 2020) held in National Power Training Institute HQ (Govt. of India) on February 21 - 22, 2020. The work focuses on the current development in the fields of electrical and electronics engineering like power generation, transmission and distribution, renewable energy sources and technology, power electronics and applications, robotics, artificial intelligence and IoT, control, and automation and instrumentation, electronics devices, circuits and systems, wireless and optical communication, RF and microwaves, VLSI, and signal processing. The book is beneficial for readers from both academia and industry.

Culture and Customs of Kenya Neal W. Sobania, 2003-06-30 Kenya, a land of safaris, wild animals, and Maasai warriors, perfectly represents Africa for many Westerners. This peerless single-source book presents the contemporary reality of life in Kenya, an important East-African nation that has served as a crossroads for peoples and cultures from Africa, the Middle East, and East Asia for centuries. As such, it is a land rich in cultural and ethnic diversity, where unique and dynamic traditions blend with modern influences. Students and general readers will be engrossed in narrative overviews highlighting Kenyan history, as well as the beliefs, vibrant cultural expressions, and various lifestyles and roles of the Kenyan population. A chronology, glossary, and numerous photos enhance the narrative. Kenya today struggles with nation building. Its society comprises the haves and the have-nots and faces the challenges of the trend toward urbanization, with its attendant disruption of traditional social structures. For Kenyans, the preserving of traditional cultures is as important as making the statement that Kenya is a modern nation. Chapters on the land, people, and history; religion and worldview; literature, film, and media; art and architecture; cuisine and traditional dress; gender roles, marriage, and family;

and social customs and lifestyle are up to date and written by a country expert. A chronology, glossary, and numerous photos enhance the narrative.

Jean Desmet and the Early Dutch Film Trade Ivo Blom, Ivo Leopold Blom, 2003 The Netherlands Film Museum's Desmet Collection contains the estate of Dutch cinema owner and film distributor Jean Desmet (1875-1956): almost nine hundred European and American films of all genres, a collection of publicity material, and a massive business archive. These three sources form the basis of this book, the first comprehensive reconstruction of Desmet's career. From his nomadic beginnings as a traveling showman to his successful switch to permanent cinema operation and film distribution, Blom shows how Desmet's fortunes encapsulated a series of structural changes within the new culture of the cinema.

Evolutionary Algorithms in Management Applications Jörg Biethahn, Volker Nissen, 2012-12-06 Evolutionary Algorithms (EA) are powerful search and optimisation techniques inspired by the mechanisms of natural evolution. They imitate, on an abstract level, biological principles such as a population based approach, the inheritance of information, the variation of information via crossover/mutation, and the selection of individuals based on fitness. The most well-known class of EA are Genetic Algorithms (GA), which have received much attention not only in the scientific community lately. Other variants of EA, in particular Genetic Programming, Evolution Strategies, and Evolutionary Programming are less popular, though very powerful too. Traditionally, most practical applications of EA have appeared in the technical sector. Management problems, for a long time, have been a rather neglected field of EA-research. This is surprising, since the great potential of evolutionary approaches for the business and economics domain was recognised in pioneering publications quite a while ago. John Holland, for instance, in his seminal book *Adaptation in Natural and Artificial Systems* (The University of Michigan Press, 1975) identified economics as one of the prime targets for a theory of adaptation, as formalised in his reproductive plans (later called Genetic Algorithms).

High and Mighty Keith Bradsher, 2004-01-19 SUVs have taken over America's roads. Ad campaigns promote them as safer and greener than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In *High and Mighty*, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect--for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of *Unsafe at Any Speed* and *Fast Food Nation*, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not.

Hydrogen and Fuel Cells Bent Sørensen, 2011-11-14 A hydrogen economy, in which this one gas provides the source of all energy needs, is often touted as the long-term solution to the environmental and security problems associated with fossil fuels. However, before hydrogen can be used as fuel on a global scale we must establish cost effective means of producing, storing, and distributing the gas, develop cost efficient technologies for converting hydrogen to electricity (e.g. fuel cells), and creating the infrastructure to support all this. Sorensen is the only text available that provides up to date coverage of all these issues at a level appropriate for the technical reader. The book not only describes the how and where aspects of hydrogen fuels cells usage, but also the obstacles and benefits of its use, as well as the social implications (both economically and environmental). Written by a world-renowned researcher in energy systems, this thoroughly illustrated and cross-referenced book is an excellent reference for researchers, professionals and students in the field of renewable energy. Updated sections on PEM fuel cells, Molten carbonate cells, Solid Oxide cells and Biofuel cells Updated material to reflect the growing commercial acceptance of stationary and portable fuel cell systems, while also recognizing the ongoing research in automotive fuel cell systems A new example of a regional system based on renewable energy sources reflects the

growing international attention to uses of renewable energy as part of the energy grid Examples of life cycle analysis of environmental and social impacts

Principles of Marketing Gary M. Armstrong, Stewart Adam, Sara Marion Denize, Michael Volkov, Philip Kotler, 2018 An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. Principles of Marketing keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.

Data Analysis in Management with SPSS Software J.P. Verma, 2012-12-13 This book provides readers with a greater understanding of a variety of statistical techniques along with the procedure to use the most popular statistical software package SPSS. It strengthens the intuitive understanding of the material, thereby increasing the ability to successfully analyze data in the future. The book provides more control in the analysis of data so that readers can apply the techniques to a broader spectrum of research problems. This book focuses on providing readers with the knowledge and skills needed to carry out research in management, humanities, social and behavioural sciences by using SPSS.

Urban Transit Systems and Technology Vukan R. Vuchic, 2007-02-16 This is the only current and in print book covering the full field of transit systems and technology. Beginning with a history of transit and its role in urban development, the book proceeds to define relevant terms and concepts, and then present detailed coverage of all urban transit modes and the most efficient system designs for each. Including coverage of such integral subjects as travel time, vehicle propulsion, system integration, fully supported with equations and analytical methods, this book is the primary resource for students of transit as well as those professionals who design and operate these key pieces of urban infrastructure.

Section D for Destruction Malcolm Atkin, 2017-11-30 When Neville Chamberlain made his famous Peace in Our Time statement in 1938, after the Munich Agreement with Hitler, he may, or may not, have been aware that the new Section D of the Secret Intelligence Service was already making plans to mount an all-out political and sabotage war against Nazi Germany. This was a new form of warfare, encompassing bribery, black propaganda and sabotage by agents described as having no morals or scruples. To the horror of many, it disregarded the conventions of neutrality and was prepared to hit the Nazi state wherever it could do most damage. Malcolm Atkin reveals how Section D's struggle to build a European wide anti-Nazi resistance movement was met with widespread suspicion from government, to the extent of a systematic destruction of its reputation. It was, however, a key pioneer of irregular warfare that led to the formation of the famous Special Operations Executive (SOE). His study is the first in-depth account of it to be published since the release of previously secret documents to the National Archives.

Automotive Systems G.K. Awari, V.S. Kumbhar, R.B. Tirpude, 2021-01-26 This book introduces the principles and practices in automotive systems, including modern automotive systems that incorporate the latest trends in the automobile industry. The fifteen chapters present new and innovative methods to master the complexities of the vehicle of the future. Topics like vehicle classification, structure and layouts, engines, transmissions, braking, suspension and steering are illustrated with modern concepts, such as battery-electric, hybrid electric and fuel cell vehicles and vehicle maintenance practices. Each chapter is supported with examples, illustrative figures, multiple-choice questions and review questions. Aimed at senior undergraduate and graduate students in automotive/automobile engineering, mechanical engineering, electronics engineering, this

book covers the following: Construction and working details of all modern as well as fundamental automotive systems Complexities of operation and assembly of various parts of automotive systems in a simplified manner Handling of automotive systems and integration of various components for smooth functioning of the vehicle Modern topics such as battery-electric, hybrid electric and fuel cell vehicles Illustrative examples, figures, multiple-choice questions and review questions at the end of each chapter
