Advanced Solutions of Transport Systems for Growing Mobility Grzegorz Sierpiński, 2017-07-11 What are the parameters that should be taken into account in an advanced simulation model designed for a transport system that promotes green travelling policies? How can the goal of modal shift be pursued through ICT solutions? Is it enough to apply only a single criterion when planning transport systems? What is the importance of information acquisition and provision in Intelligent Transport Systems? Answers to these and many other questions can be found in this publication. It also contains numerous analyses based on relevant data sets, illustrating the close relationship between ITS and the changes observed in terms of how specific means of transport are used. What proves to be particularly important for advanced transport systems is the use of environmentally friendly solutions that reduce their negative environmental impacts; accordingly, the book also addresses this aspect. With regard to the research results discussed and the selected solutions applied, the book primarily addresses the needs of three target groups: · Scientists and researchers (ITS field) · Local authorities (responsible for transport systems at the urban and regional level) · Representatives of business (traffic strategy management) and industry (manufacturers of ITS components) *Advanced Solutions of Transport Systems for Growing Mobility* gathers selected papers presented at the 14th "Transport Systems. Theory and Practice" Scientific and Technical Conference, organized by the Department of Transport Systems and Traffic Engineering at the Faculty of Transport of the Silesian University of Technology. The conference was held on 18-20 September 2017 in Katowice (Poland). More details at www.TSTP.polsl.pl

Recent Advances in Traffic Engineering Shriniwas S. Arkatkar, S. Velmurugan, Ashish Verma, 2020-08-28 This book comprises select proceedings of the National Conference on Recent Advances in Traffic Engineering (RATE 2018) with technical papers on the themes of traffic operation control and management, traffic safety and vulnerable road users, and sustainable transportation. It covers a wide range of topics, including advanced traffic data collection methods, big data analysis, mix-traffic characterization and modelling, travel time reliability, scenario of pedestrian and non-motorised vehicles (NMVs) traffic, regional traffic growth modelling, and applications of intelligent transportation systems (ITS) in traffic management. The contents of this book offer up-to-date and practical knowledge on different aspects of traffic engineering, which is useful for students, researchers as well as practitioners.

The Sacraments We Celebrate Peter J. Vaghi, 2010-03-01 In *The Sacraments We Celebrate: A Catholic Guide to the Seven Mysteries of Faith*, the second book in the *Pillars of Faith* series, Msgr. Peter J. Vaghi introduces the seven sacraments of the Catholic Church. Drawing from the Catechism of the Catholic Church, the U.S. Catholic Catechism for Adults, and the writings of Benedict XVI and John Paul II, Msgr. Vaghi's easy-to-use resource considers each of the sacraments from a personal, communal, and social perspective. The chapters explore the sacraments as a whole and examine the scriptural foundation, the history, and the symbolism of each. At a time when Mass attendance, Confession, and the celebration of Catholic weddings are all declining, the clarity and accessibility of Msgr. Peter Vaghi's writing on

the meaning of these celebrations, complemented by questions for reflection and prayer, makes *The Sacraments We Celebrate* a vital resource for any Catholic seeking to understand these central actions of the faith.

Hydrogen Supply Chain Catherine Azzaro-Pantel, 2018-08-18 Design, Deployment and Operation of a Hydrogen Supply Chain introduces current energy system and the challenges that may hinder the large-scale adoption of hydrogen as an energy carrier. It covers the different aspects of a methodological framework for designing a HSC, including production, storage, transportation and infrastructure. Each technology's advantages and drawbacks are evaluated, including their technology readiness level (TRL). The multiple applications of hydrogen for energy are presented, including use in fuel cells, combustion engines, as an alternative to natural gas and power to gas. Through analysis and forecasting, the authors explore deployment scenarios, considering the dynamic aspect of HSCs. In addition, the book proposes methods and tools that can be selected for a multi-criteria optimal design, including performance drivers and economic, environmental and societal metrics. Due to its systems-based approach, this book is ideal for engineering professionals, researchers and graduate students in the field of energy systems, energy supply and management, process systems and even policymakers. Explores the key drivers of hydrogen supply chain design and performance evaluation, including production and storage facilities, transportation, information, sourcing, pricing and sustainability Presents multi-criteria tools for the optimization of hydrogen supply chains and their integration in the overall energy system Examines the available technology, their strengths and weaknesses, and their technology readiness levels (TRL), to draw future perspectives of hydrogen markets and propose deployment scenarios Includes international case studies of hydrogen supply chains at various scales

Contested Urban Spaces Ulrike Capdepón, Sarah Dornhof, 2022-02-09 This book takes the urban space as a starting point for thinking about practices, actors, narratives, and imaginations within articulations of memory. The social protests and mobilizations against colonial statues are examples of how past injustice and violence keep on shaping debates in the present. Following an interdisciplinary approach, the contributions to this book focus on the in/visibility and affective power of monuments and traces through political, activist, and artistic contestations in different geographical settings. They show that memories are shaped in contact zones, most often in conflict and within hierarchical social relations. The notion of decentered memory shifts the perspective to relationships between imperial centers and margins, remembrance and erasure, nationalistic tendencies and migration. This plurality of connections emerges around unfinished histories of violence and resistance that are reflected in monuments and traces.

The Gold Rush Letters of E. Allen Grosh and Hosea B. Grosh Ronald M. James, Robert E. Stewart, 2012-09-04 When brothers Ethan and Hosea Grosh left Pennsylvania in 1849, they joined throngs of men from all over the world intent on finding a fortune in the California Gold Rush. Their search for wealth took them from San Francisco into the gold country and then over the Sierra into Nevada's Gold Canyon, where they placer-mined for gold and discovered a deposit of silver. The letters they sent back to their family offer vivid commentaries on the turbulent western frontier, the diverse society of the Gold Rush camps, and the heartbreaking labor and frustration of mining. Their lively descriptions of Gold Canyon provide one of the

earliest accounts of life in what would soon become the fabulously wealthy Comstock Mining District. The Groshes' letters are rich in color and important historical details. Generously annotated and with an introduction that provides a context for the brothers' career and the setting in which they tried to make their fortune, these documents powerfully depict the often harsh realities of Gold Rush life and society.

Teamwork in Healthcare Michael S. Firstenberg,Stanislaw P. Stawicki,2021-04-21 One of the most important advances in the delivery of healthcare has been recognition of the need for developing highly functioning multi-disciplinary teams. Such teams, when structured in a cohesive fashion, can function more effectively and efficiently than the sum of their parts. The benefits of teamwork extend from the delivery of care to a single patient to the overall structure and function of entire care delivery systems. Recognizing the value of collaborative approaches for improving all aspects of healthcare delivery and having champions, leaders, structure, function, goals, and accountability are paramount to success, regardless of how defined. Another important pillar of teamwork is excellent communication with clearly defined information flows and cross-verification mechanisms. This book outlines how to work together for shared goals in a complex, diverse, and constantly evolving health care system.

Konflikt '47 Warlord Games,Clockwork Goblin,2016-08-25 1944 Atomic testing at Los Alamos opens a rift in the fabric of space, while the detonation of the Fat Boy atomic bomb over Dresden creates a second. German and American scientists determine that signals are being transmitted through the rifts, many indecipherable, but some containing revolutionary scientific and technological theorems. Desperate for any military advantage, Germany and the US swiftly apply these discoveries to their war efforts, and incredible new weapons begin to appear on the battlefield. Angered by America's refusal to share the secrets of Rift-tech, Stalin declares war on the US and Britain, and the Allies are fractured. 1947 World War II has entered a completely new phase. Power-armoured infantry armed with personal wonder-weapons follow super-heavy tanks and mechanised walkers into battle, smashing defences with colossal firepower, while genetic monstrosities are sent out to hunt and terrorise enemy forces. This is the new nature of war. This is *Konflikt '47*.
*** With rules inspired by the award-winning Bolt Action system, this standalone game takes World War II to a completely new level, and offers everything required to harness the incredible weapons and technologies made possible by the rift signals, and to engage in tabletop battles for supremacy and survival.
