The Collaborative Economy in Action: European Perspectives Andrzej Klimczuk, Vida Česnaitė, Gabriela Avram, 2021-10-04 The book titled *The Collaborative Economy in Action: European Perspectives* is one of the important outcomes of the COST Action CA16121, *From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy* (short name: *Sharing and Caring*; sharingandcaring.eu) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST (www.cost.eu/actions/CA16121). The main objective of the COST Action *Sharing and Caring* is the development of a European network of researchers and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action *Sharing and Caring* helped to connect research initiatives across Europe and enabled scientists to develop their ideas by collaborating with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for country reports was distributed among the members of the COST Action *Sharing and Caring*. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the level of detail included, in accordance with how much information was available in each respective country at the time of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The Member Countries Report on the Collaborative Economy, edited by Gaia Mosconi, Agnieszka Lukaszewicz, and Gabriela Avram (2018) that was published on the *Sharing and Caring* website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio Nassare-Aznar, Kosjenka Dumančić, and Giulia Priora compiled a Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy (2018). In 2018, after undertaking an analysis of the previous reports' strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments, Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka Dumančić, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team was formed by volunteers from the participants of the COST Action: Andrzej Klimczuk, Vida Česnaitė, Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary analysis on the state of the CE in 2019, when the reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the intention was to update these reports again just before the end of the COST Action *Sharing and Caring* in 2021 and to produce a third edition. However, the COVID-19 pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors and consists of reports on 27 countries participating in the COST Action.

A Successful Transformation? Petr Pavlínek, 2008-04-30 This is a brilliant examination of the complex processes of the post-1990 transformation in the Czech automotive industry and its selective integration into the West European system. The post-1990 restructuring of the industry is analyzed in the context of its pre-1990 development and in the context of the East European automobile industry as a whole. Specifically, the book examines the development and post-1990 restructuring of the Czech car, components, and truck industries.

Multifunctional Barriers for Flexible Structure Sophie Duquesne, Carole Magniez, Giovanni Camino, 2007-08-29 This is the first complete overview of the present state of the art of flexible barrier materials such as textile, paper and leather, including methods for barrier evaluation. It will be of interest to readers in industries, consumers, and members of the scientific community. The scope of the field is clearly delineated here for the first time, and it deals with a number of specific topics such as barrier to fire and antibacterial properties.

New Product Development and Production Networks Ulrich Jürgens, 2000-02-03 Prof. Dr. U. Jürgens, Wissenschaftszentrum Berlin, is renown for his scientific work in fields like human resources, work organization and organization of production and development, especially for automotive industries. In this publication the authors from different countries discuss practical models of integration in development and production as realized in practice. Time-to-Market is the key for success, efficient integration of development and production necessary to reach the goal. Jürgens himself acts as a publication editor and creates a book reporting about the state of art in automotive and electronics industry. The publication is directed to scientists and is of interest to those practitioners, who have to develop the benchmarks for their own development and production.

Creating a Brand Identity: A Guide for Designers Catharine Slade-Brooking, 2016-01-18 Creating a brand identity is a fascinating and complex challenge for the graphic designer. It requires practical design skills and creative drive as well as an understanding of marketing and consumer behaviour. This practical handbook is a comprehensive introduction to this multifaceted process. Exercises and examples highlight the key activities undertaken by designers to create a successful brand identity, including defining the audience, analyzing competitors, creating mood boards, naming brands, designing logos, presenting to clients, rebranding and launching the new identity. Case studies throughout the book are illustrated with brand identities from around the world, including a diverse range of industries – digital media, fashion, advertising, product design, packaging, retail and more.

Trauma Biomechanics Kai-Uwe Schmitt, Peter F. Niederer, Markus H. Muser, Felix Walz, 2009-11-11 Injury is a leading cause of death, hospitalisation and disability world-wide. The World Health Organization predicts that unintentional injuries arising from road traffic incidents will rise to take third place in the rank order of international disease burden by the year 2030. Although these statistics and the associated economic costs are staggering, the effect of unintentional injury and death from trauma is more apparent, and more disturbing, when seen personally. By a young age, nearly everyone in the world, regardless of region, wealth or education, has had a relative or someone that they know killed or disabled in an accident. The quality of life and financial effects on the injured person and their families and friends are plainly evident and clearly devastating. Many unintentional injuries are in reality not accidents; they could be prevented with changes in policy, education, or through improved safety devices. Arrayed against these preventable injuries, a diverse group of injury prevention researchers and practitioners work to decrease the incidence of unintentional injury. In trauma biomechanics, the principles of mechanics are used to understand how injuries happen at the level of the bones, joints, organs and tissues of the body. This knowledge is central in the development, characterization and improvement of safety devices such as helmets and seat belts and in the safe design of vehicles and equipment used for transportation, occupation and recreation.

The Global Economic and Financial Crisis, 2009 What started as a financial crisis in the US has quickly unfolded into an economic crisis that now threatens to roll back the development gains of the last decade and may precipitate a human tragedy in many parts of the developing world. The analysis presented in this report provides a regional perspective on how this crisis is impacting the member states of the five regional commissions of the UN, and examines the types and adequacy of responses at the national and regional levels. It suggests ways in which the Regional Commissions can use their collective strengths to prevent the economic crisis from becoming a human crisis.

The Meaningful Brand N. Hollis, 2016-04-30 Instilling brand loyalty among consumers is the key to long-term success, and requires focusing on meaningful differentiation: functional, emotional, or societal. Supported by data analyses, case studies and interviews, The Meaningful Brand explores the four components of a distinguished brand: purpose, delivery, resonance, and difference.

Smart Systems and IoT: Innovations in Computing Arun K. Somani, Rajveer Singh Shekhawat, Ankit Mundra, Sumit Srivastava, Vivek Kumar Verma, 2020-10-27 The book features original papers from the 2nd International Conference on Smart IoT Systems: Innovations and Computing (SSIC 2019), presenting scientific work related to smart solution concepts. It discusses computational collective intelligence, which includes interactions between smart devices, smart environments and smart interactions, as well as information technology support for such areas. It also describes how to successfully approach various government organizations for funding for business and the humanitarian technology development projects. Thanks to the high-quality content and the broad range of the topics covered, the book appeals to researchers pursuing advanced studies.

The Kremlin Playbook 2 Heather A. Conley, Ruslan Stefanov, Donatienne Ruy, Martin Vladimirov, 2019-05-01 The Kremlin Playbook 2: The Enablers shows that some countries facilitate or enable Russian malign economic influence to flow through their systems and across Europe. This feeds the Kremlin's cycle of influence, weakens democratic structures in Europe, and threatens U.S. and transatlantic security.

The Word Rhythm Dictionary Timothy Polashek, 2014-04-18 This new kind of dictionary reflects the use of "rhythm rhymes" by rappers, poets, and songwriters of today. Users can look up words to find collections of words that have the same rhythm as the original and are useable in ways that are familiar to us in everything from vers libre poetry to the lyrics and music of Bob Dylan and hip hop groups.

New Frontiers of the Automobile Industry Alex Covarrubias V., Sigfrido M. Ramírez Perez, 2019-11-28 Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

Innovating the Corporation Thomas Kuczumarski, Arthur Middlebrooks, Jeffrey Swaddling, 2000-10-22 Numerous barriers, problems, and unresolved issues often prevent innovation from taking hold within an organization. Companies haven't discovered how to measure innovation, make it repeatable, or systematize it. Until now. The program outlined in *Innovating the Corporation* guarantees accelerated innovation within any corporation, within any industry. Intended as a dynamic, hands-on guide, this book offers a comprehensive look at strategic planning, understanding and cultivating an innovation vision, and building an innovation team. Includes detailed, step-by-step information on how to measure the success of an innovation plan.

Product Strategy for High Technology Companies Michael McGrath, 2000-11-02 One of the key determinants of success for today's high-technology companies is product strategy—and this guide continues to be the only book on product strategy written specifically for the 21st century high-tech industry. More than 250 examples from technological leaders including IBM, Compaq, and Apple—plus a new focus on growth strategies and on Internet businesses—define how high-tech companies can use product strategy and product platform strategy for competitiveness, profitability, and growth in the Internet age.

Advertising and Promotion Chris Hackley, Rungpaka Amy Hackley, 2021-01-27 Now in its fifth edition, this popular textbook continues to provide a comprehensive insight into the world of advertising and promotional communications. Unique in its approach, the authors situate the key concepts of marketing communications from the perspective of advertising agencies and provide insight into what a career within an ad agency might be like. Their critical approach grounded in up-to-date research allows the reader to develop an interdisciplinary understanding of marketing and advertising, including business, socio-cultural, media studies and consumer culture theory perspectives. Along with striking full colour visual advertisements and illustrations, new examples and case studies, this fifth edition has been fully updated to include: Two brand new chapters on Social Media Advertising and Digital Advertising Commentary on how the COVID-19 pandemic has and will impact advertising The evolving role of advertising agencies in the post digital era Emerging forms of advertising and promotion, including the role of influencers

Handbook of Accident Reconstruction Heinz Burg, Andreas Moser, 2014-01-13 The analysis of a traffic accident requires additional knowledge that is not normally taught during the university education. Therefore, the analysis of road accidents usually is performed by specialized experts. The knowledge required for this was published in the early 80s in a previous German edition of this book. Now a team of authors created the long overdue update. The authors are experts in their field and make their knowledge available in a contemporary representation. In this computer-aided methods of work are taken into account as well. Content Accident survey - instrumentation - data for the calculation - kinematics - driving operation - kinetics - dynamics - information perception - speed calculation - collision mechanics - pedestrian - bicycle - cars - commercial vehicles - rollovers - rail based vehicles - biomechanics - occupant motion - simulation - animation Target groups Experts in accident reconstruction and damage assessment Traffic judges, prosecutors, lawyers Vehicle engineers Traffic police in training Insurance professionals in the claims settlement Insurance adjusters
