His influence has extended from the Impressionists to later modern art and even to commercial design. A few of his works are so frequently reproduced that they are almost as familiar as the face of the Mona Lisa. Yet the 'Great Wave' and the 'Red Fuji' from the

Ernst Neufert, Peter Neufert Nicole Delmes, Johannes Kister, Lilian Pfaff, Michael Kasiske, 2014 The numerous designs by Ernst Neufert (1900-1986) and his son, Peter Neufert (1925-1999), which ranged from residences to industrial and office buildings, helped define twentieth-century German architecture. Especially influential, of course, were the many years that Ernst Neufert taught at the Technical University of Darmstadt as well as his Bauentwurfslehre, a theory of architectural design that continues to be a standard work to this day. The Neuferts' buildings stand for Modernism and the rebuilding of Germany after World War II. Ernst Neufert, for instance, designed the strictly functional Quelle distribution center in Nuremberg. Prestressed concrete offered technical opportunities for Peter Neufert's bold experiments in form, which clearly distinguished his buildings in the late sixties from those of his father. Using large-format photographs, this volume documents the first stage of six selected building projects by the two architects and attests to the quality and relevance of their designs.

Culture and Customs of Kenya Neal W. Sobania, 2003-06-30 Kenya, a land of

safaris, wild animals, and Maasai warriors, perfectly represents Africa for many Westerners. This peerless single-source book presents the contemporary reality of life in Kenya, an important East-African nation that has served as a crossroads for peoples and cultures from Africa, the Middle East, and East Asia for centuries. As such, it is a land rich in cultural and ethnic diversity, where unique and dynamic traditions blend with modern influences. Students and general readers will be engrossed in narrative overviews highlighting Kenyan history, as well as the beliefs, vibrant cultural expressions, and various lifestyles and roles of the Kenyan population. A chronology, glossary, and numerous photos enhance the narrative. Kenya today struggles with nation building. Its society comprises the haves and the have-nots and faces the challenges of the trend toward urbanization, with its attendant disruption of traditional social structures. For Kenyans, the preserving of traditional cultures is as important as making the statement that Kenya is a modern nation. Chapters on the land, people, and history; religion and worldview; literature, film, and media; art and architecture; cuisine and traditional dress; gender roles, marriage, and family; and social customs and lifestyle are up to date and written by a country expert. A chronology, glossary, and numerous photos enhance the narrative.

Jean Desmet and the Early Dutch Film Trade Ivo Blom, Ivo Leopold Blom, 2003 The Netherlands Film Museum's Desmet Collection contains the estate of Dutch cinema owner and film distributor Jean Desmet (1875-1956): almost nine hundred European and American films of all genres, a collection of publicity material, and a massive business archive. These three sources form the basis of this book, the first comprehensive reconstruction of Desmet's career. From his nomadic beginnings as a traveling showman to his successful switch to permanent cinema operation and film distribution, Blom shows how Desmet's fortunes encapsulated a series of structural changes within the new culture of the cinema.

And On That Bombshell Richard Porter, 2015-10-22 I was Top Gear's script editor for 13 years and all 22 series. I basically used to check spelling and think of stupid gags about The Stig. I also got to hang around with Jeremy Clarkson, Richard Hammond and James May. It didn't feel like something you should get paid for. From the disastrous pilot show of 2002 to the sudden and unexpected ending in 2015, working on Top Gear was quite a rollercoaster ride. We crossed continents, we made space ships, we bobbed across the world's busiest shipping lane in a pick-up truck. We also got chased by an angry mob, repeatedly sparked fury in newspapers, and almost killed one of our presenters. I realised that I had quite a few stories to tell from behind the scenes on the show. I remembered whose daft idea it was to get a dog. I recalled the willfully stupid way in which we decorated our horrible office. I had a sudden flashback to the time a Bolivian drug lord threatened to kill us. I decided I should write down some of these stories. So I have. I hope you like them. And now, a quote from James May: 'Richard Porter has asked me to write a quote for his new book about the ancient history of Top Gear. But this is a ridiculous request. How can one write a quote? Surely, by definition, a quote must be extracted from a greater body of writing, for the purpose of illustrating or supporting a point in an unrelated work. I cannot write a quote any more than I could film an out-take. 'Porter, like Athens, has lost his marbles.'

Would Trotsky Wear a Bluetooth? Paul R. Josephson,2009-12-09 After visiting Russia in 1921, the journalist Lincoln Steffens famously declared, I have seen the future, and it works. Steffens referred to the social experiment of technological utopianism he found in the Soviet Union, where subway cars and farm tractors would carry the worker and peasant -- figuratively and literally -- into the twentieth century. Believing that socialism and technology together created a brave new world, Boleslaw Bierut of Poland and Kim Il Sung of North Korea -- and other leaders -- joined Russia's Vladimir Lenin and Leon Trotsky in embracing big technology with a verve and conviction that rivaled the western world's. Paul R. Josephson here explores these utopian visions of technology -- and their unanticipated human and environmental costs. He examines the role of technology in communist plans and policies and the interplay between ideology and technological development. He shows that while technology was a symbol of regime legitimacy and an engine of progress, the changes it spurred were not unequivocally positive. Instead of achieving a worker's paradise, socialist technologies exposed the proletariat to dangerous machinery and deadly pollution; rather than freeing women from exploitation in family and labor, they paradoxically created for them the dual -- and exhausting -- burdens of mother and worker. The future did not work. The fall of the Soviet Union in 1991 marked the end of communism's self-proclaimed glorious quest to reach and surpass the West. Josephson's intriguing study of how technology both helped and hindered this effort asks new and important questions about the crucial issues inextricably linked with the development and diffusion of technology in any sociopolitical system.
