Encyclopedic Dictionary of Polymers Jan W. Gooch,2010-11-08 This reference, in its second edition, contains more than 7,500 polymeric material terms, including the names of chemicals, processes, formulae, and analytical methods that are used frequently in the polymer and engineering fields. In view of the evolving partnership between physical and life sciences, this title includes an appendix of biochemical and microbiological terms (thus offering previously unpublished material, distinct from all competitors.) Each succinct entry offers a broadly accessible definition as well as cross-references to related terms. Where appropriate to enhance clarity further, the volume's definitions may also offer equations, chemical structures, and other figures. The new interactive software facilitates easy access to a large database of chemical structures (2D/3D-view), audio files for pronunciation, polymer science equations and many more.

How to Draw What You See Rudy De Reyna, 2011-09-07 The 35th anniversary edition of the classic how-to book that has helped millions of artists learn to draw. When it was originally published in 1970, *How to Draw What You See* zoomed to the top of Watson-Guption's best-seller list—and it has remained there ever since. "I believe that you must be able to draw things as you see them—realistically," wrote Rudy de Reyna in his introduction. Today, generations of artists have learned to draw what they see, to truly capture the world around them, using de Reyna's methods. *How to Draw What You See* shows artists how to recognize the basic shape of an object—cube, cylinder, cone, or sphere—and use that shape to draw the object, no matter how much detail it contains.

Beyond Nineteen Eighty-four William Lutz, 1989 This book probes the efforts at manipulation individuals face daily in this information age and the tactics of persuaders from many sectors of society using various forms of Orwellian doublespeak. The book contains the following essays: (1) Notes toward a Definition of Doublespeak (William Lutz); (2) Truisms Are True: Orwell's View of Language (Walker Gibson); (3) Mr. Orwell, Mr. Schlesinger, and the Language (Hugh Rank); (4) What Do We Know? (Charles Weingartner); (5) The Dangers of Singlespeak (Edward M. White); (6) The Fallacies of Doublespeak (Dennis Rohatyn); (7) Doublespeak and Ethics (George R. Bramer); (8) Post-Orwellian Refinements of Doublethink: Will the Real Big Brother Please Stand Up? (Donald Lazere); (9) Worldthink (Richard Ohmann); (10) 'Bullets Hurt, Corpses Stink': George Orwell and the Language of Warfare (Harry Brent); (11) Political Language: The Art of Saying Nothing (Dan F. Hahn); (12) Fiddle-Faddle, Flapdoodle, and Balderdash: Some Thoughts about Jargon (Frank J. D'Angelo); (13) How to Read an Ad: Learning to Read between the Lies (D. G. Kehl); (14) Subliminal Chainings: Metonymical Doublespeak in Advertising (Don L. F. Nilsen); (15) Doublespeak and the Polemics of Technology (Scott Buechler); (16) Make Money, Not Sense: Keep Academia Green (Julia Penelope); (17) Sensationspeak in America (Roy F. Fox); and (18) The Pop Grammarians--Good Intentions, Silly Ideas, and Doublespeak (Charles Suhor). Curating As Anti-Racist Practice Natalie Bayer, Belinda Kazeem-Kaminski, Nora Sternfeld, 2019-04 The anthology *Curating as Anti-Racist Practice* reflects upon museums and exhibitions from the perspective of postcolonial museology and critical migration and regime research. Beyond critical analysis, this collection of texts is about collecting strategies and forms of action that make it possible to think of curating as anti-racist practice. Using as springboards the intersections between social battlefields and curatorial practices, as well as a focus on agency, this book examines the relationality of struggles for and against representation. Therefore, the focus is on discursive strategies of resistance, contact zones and approaches to re-appropriation. [publisher].

Peppered Minds Om Somani, 2020-02-18 *Peppered Minds* is about the journey of a young geologist, Neeraj, beginning his professional life. His imaginative mind conjures up a thesis presented on a brainstorming session for the welfare of his countrymen and the nation. The book provides an

interesting insight to explain blatant problems that contribute to the lack of innovation, misconduct and all kinds of frenzy we see around today. The writing of the book is a lighthearted account of the protagonist, Neeraj, brought up in a conservative middle-class god-fearing family, who travels from Jaipur to Hyderabad to start his professional life as a geologist. The story depicts his bitter and heartening experiences, be it meeting an astrologer, making a railway reservation, going on a rail journey from Jaipur, joining up at his new office in Hyderabad or eventually completing a successful geological expedition in the wild. Neeraj's tryst with the various characters along his brief journey brings to light the mind set, personal traits, beliefs and culture of a vast cross section of the ordinary public that span age groups ranging from the child to the octogenarian. The book depicts several interplays of events that envelope the geologists in the office as well as in the field. One of the momentous events that overwhelms Neeraj is his meeting with the Moon and learning of the unbelievable history of human existence on earth. There are also hilarious episodes, including the one which describes the use of kerosene as the basic material for nuclear research.

The Essential Cult TV Reader David Lavery, 2021-09-15 The Essential Cult TV Reader is a collection of insightful essays that examine television shows that amass engaged, active fan bases by employing an imaginative approach to programming. Once defined by limited viewership, cult TV has developed its own identity, with some shows gaining large, mainstream audiences. By exploring the defining characteristics of cult TV, The Essential Cult TV Reader traces the development of this once obscure form and explains how cult TV achieved its current status as legitimate television. The essays explore a wide range of cult programs, from early shows such as Star Trek, The Avengers, Dark Shadows, and The Twilight Zone to popular contemporary shows such as Lost, Dexter, and 24, addressing the cultural context that allowed the development of the phenomenon. The contributors investigate the obligations of cult series to their fans, the relationship of camp and cult, the effects of DVD releases and the Internet, and the globalization of cult TV. The Essential Cult TV Reader answers many of the questions surrounding the form while revealing emerging debates on its future.

Pharmako/Gnosis Dale Pendell, 2009-08-03 This is the third and final volume of North Atlantic Books' hard cover edition of Dale Pendell's Pharmako trilogy, an encyclopedic study of the history and uses of psychoactive plants and related synthetics first published between 1995 and 2005. The books form an interrelated suite of works that provide the reader with a unique, reliable, and often personal immersion in this medically, culturally, and spiritually fascinating subject. All three books are beautifully designed and illustrated, and are written with unparalleled authority, erudition, playfulness, and range. *Pharmako/Gnosis: Plant Teachers and the Poison Path* focuses on plant-based and derivative psychedelic teachers (including ayahuasca, peyote, LSD, and DMT) and on the poison path of substances such as belladonna, ketamine, and ibogaine. Each substance is explored in detail, not only with information on its history, pharmacology, preparation, and cultural and esoteric correspondences, but also the subtleties of each plant's effect on consciousness in a way that only poets can do. The whole concoction is sprinkled with abundant quotations from famous writers, creating a literary brew as intoxicating as its subject. The Pharmako series includes the predecessor volumes *Pharmako/Poeia* (which covers tobacco, alcohol, cannabis, opiates, salvia divinorum, and other substances) and *Pharmako/Dynamis* (focusing on stimulants and empathogens).

From Logos to Bios Wynand de Beer, 2018-04-10 This ground-breaking book utilizes insights from Hellenic cosmology and bio-philosophy in a discussion of the origins and mechanisms of organic diversity. Building upon the concept of evolution as the unfolding of inherent possibilities, the author also explores organic form and transformation, emphasizing the mathematical foundations thereof.

Introducing Phonology David Odden, 2005-02-24 Publisher Description

Mechcomp2 Antonio J.M. Ferreira, Ana M.A. Neves, Erasmo Viola, Francesco Tornabene, Nicholas Fantuzzi, 2016-05-20 Composites materials have aroused a great interest over the last few decades. Several applications of fibrous composites, functionally graded materials, laminated composites,

nano-structured reinforcements, morphing structures, can be found in many engineering fields, such as aerospace, mechanical, naval and civil engineering. The necessity of lightweight structures, smart and adaptive systems, high-level strength, have led both the academic research and the manufacturing development to a recurring employment of these materials. Many journal papers and technical notes have been published extensively over the last seventy years in international scientific journals of different engineering fields. For this reason, the establishment of this second edition of Mechanics of Composites International Conference has appeared appropriate to continue what has been begun during the first edition occurred in 2014 at Stony Brook University (USA). MECHCOMP wants to be an occasion for many researchers from each part of the globe to meet and discuss about the recent advancements regarding the use of composite structures. As a proof of this event, which has taken place in Porto (Portugal), selected plenary and key-note lectures have been collected in the present book.

Modular Narratives in Contemporary Cinema A. Cameron, 2008-07-11 Since the early 1990s there has been a trend towards narrative complexity within popular cinema. This book examines a number of contemporary films that play overtly with narrative structure, raising questions of chance and destiny, memory and history, simultaneity and the representation of time.

Programming Environments for Massively Parallel Distributed Systems Karsten M. Decker, Rene M. Rehmann, 2013-04-17 Massively Parallel Systems (MPSs) with their scalable computation and storage space promises are becoming increasingly important for high-performance computing. The growing acceptance of MPSs in academia is clearly apparent. However, in industrial companies, their usage remains low. The programming of MPSs is still the big obstacle, and solving this software problem is sometimes referred to as one of the most challenging tasks of the 1990's. The 1994 working conference on Programming Environments for Massively Parallel Systems was the latest event of the working group WG 10.3 of the International Federation for Information Processing (IFIP) in this field. It succeeded the 1992 conference in Edinburgh on Programming Environments for Parallel Computing. The research and development work discussed at the conference addresses the entire spectrum of software problems including virtual machines which are less cumbersome to program; more convenient programming models; advanced programming languages, and especially more sophisticated programming tools; but also algorithms and applications.

5000 Years of Geometry Christoph J. Scriba, Peter Schreiber, 2015-04-22 The present volume provides a fascinating overview of geometrical ideas and perceptions from the earliest cultures to the mathematical and artistic concepts of the 20th century. It is the English translation of the 3rd edition of the well-received German book "5000 Jahre Geometrie," in which geometry is presented as a chain of developments in cultural history and their interaction with architecture, the visual arts, philosophy, science and engineering. Geometry originated in the ancient cultures along the Indus and Nile Rivers and in Mesopotamia, experiencing its first "Golden Age" in Ancient Greece. Inspired by the Greek mathematics, a new germ of geometry blossomed in the Islamic civilizations. Through the Oriental influence on Spain, this knowledge later spread to Western Europe. Here, as part of the medieval Quadrivium, the understanding of geometry was deepened, leading to a revival during the Renaissance. Together with parallel achievements in India, China, Japan and the ancient American cultures, the European approaches formed the ideas and branches of geometry we know in the modern age: coordinate methods, analytical geometry, descriptive and projective geometry in the 17th and 18th centuries, axiom systems, geometry as a theory with multiple structures and geometry in computer sciences in the 19th and 20th centuries. Each chapter of the book starts with a table of key historical and cultural dates and ends with a summary of essential contents of geometry in the respective era. Compelling examples invite the reader to further explore the problems of geometry in ancient and modern times. The book will appeal to mathematicians interested in Geometry and to all readers with an interest in cultural history. From letters to the authors for the German language edition I hope it gets a translation, as there is no comparable work. Prof. J. Grattan-Guinness (Middlesex University London) Five Thousand Years of Geometry - I think it is the most handsome book I

have ever seen from Springer and the inclusion of so many color plates really improves its appearance dramatically! Prof. J.W. Dauben (City University of New York) An excellent book in every respect. The authors have successfully combined the history of geometry with the general development of culture and history. ... The graphic design is also excellent. Prof. Z. Nádenik (Czech Technical University in Prague)

Geodiversity Murray Gray, 2004-06-25 A counterpoint to biodiversity, geodiversity describes the rocks, sediments, soils, fossils, landforms, and the physical processes that underlie our environment. The first book to focus exclusively on the subject, *Geodiversity* describes the interrelationships between geodiversity and biodiversity, the value of geodiversity to society, as well as current threats to its existence. Illustrated with global case studies throughout, the book examines traditional approaches to protecting biodiversity and the new management agenda which is starting to be used instead.
