Modular Origami Polyhedra Lewis Simon,Bennett Arnstein,Rona Gurkewitz,1999 This newly revised and enlarged book offers paperfolders, model builders, and math students alike a stimulating journey into the world of three-dimensional geometric origami. Step-by-step instructions and clearly detailed diagrams explain how to create more than 35 different modular polyhedra. The modules, each made from a single piece of paper, have points and pockets, enabling origamists to build fascinating figures by inserting the tapered ends of each module into the pockets of the adjacent modules. Unavailable elsewhere, the models in this innovative book are diverse, ranging from relatively simple modular cube and stellated octahedron to more advanced two-piece modules, a gyroscope, and even a 14-sided cuboctahedron. Graded according to difficulty, these multifaceted marvels have a style and beauty all their own and will not only challenge

devotees of the ancient Japanese art of paper folding, but will also prove useful in classroom demonstrations of geometric principles.

Necessary People Anna Pitoniak, 2019-05-21 A propulsive, chilling novel exploring the dangerous fault lines of female friendships (Lee Child), Necessary People deftly plumbs the limits of ambition, loyalty, and love. One of them has it all. One of them wants it all. But they can't both win. Stella and Violet are best friends, and from the moment they met in college, they knew their roles. Beautiful, privileged, and reckless Stella lives in the spotlight. Hardworking, laser-focused Violet stays behind the scenes, always ready to clean up the mess that Stella inevitably leaves in her wake. After graduation, Violet moves to New York and lands a job in cable news, where she works her way up from intern to assistant to producer, and to a life where she's finally free from Stella's shadow. In this fast-paced world, Violet thrives,

and her ambitions grow -- but everything is jeopardized when Stella, envious of Violet's new life, uses her connections, beauty, and charisma to get hired at the same network. Stella soon moves in front of the camera, becoming the public face of the stories that Violet has worked tirelessly to produce -- and taking all the credit. Stella might be the one with the rich family and the right friends, but Violet isn't giving up so easily. As she and Stella strive for success, each reveals just how far she'll go to get what she wants -- even if it means destroying the other person along the way. I literally couldn't stop reading. -- Stephen King I love a book that is smart as hell and impossible to put down and this is IT. -- Jessica Knoll Named one of the Best Books of May by Marie Claire, Town & Country, Refinery29, Cosmopolitan, Woman's Day, Bustle, CrimeReads, and O, the Oprah Magazine

Converting STEM into STEAM Programs Arthur J. Stewart, Michael P. Mueller, Deborah J. Tippins, 2020-02-27 This book examines the push and pull of factors contributing to and constraining conversion of STEM (science, technology, engineering and math) education programs into STEAM (science, technology, engineering, math and arts) education programs. The chapters in this book offer thought-provoking examples, theory, and suggestions about the advantages, methods and challenges involved in making STEM to STEAM conversions, at levels ranging from K12 through graduate university programs. A large driving force for STEM-to-STEAM conversions is the emerging awareness that the scientific workforce finds itself less than ideally prepared when engaging with so-called 'wicked problems' – the complex suite of emerging, multifaceted issues such as global climate change, social injustice, and pandemic diseases. Dealing with these issues requires cross-disciplinary expertise and the ability to insert technical and scientific understanding effectively into areas of public planning and policy. The different models and possibilities for STEAM, as the next phase of the STEM revolution, laid out in this book will promote research and further our understanding of STEAM as a forward-thinking approach to education. Gillian Roehrig, STEM Education, University of Minnesota, USA The ideal teacher sees opportunities for integrating ideas from multiple disciplines into every lesson. This book offers many worthwhile suggestions on how to do that deliberately and systematically George DeBoer, Project 2061 of the American Association for the Advancement of Science, USA For the last several years, calls for expanding STEM education have grown, but so too have concerns about technocratic approaches to STEM. This volume challenges the community to consider broader views on STEM by focusing on the place of arts education within this movement. The chapters offer much needed, new perspectives on the (re)integration of the arts and sciences Troy Sadler, School of Education, University of North Carolina, USA

Pro Full-Text Search in SQL Server 2008 Hilary Cotter, Michael Coles, 2009-01-29 Businesses today want actionable insights into their data—they want their data to reveal itself to them in a natural and user-friendly form. What could be more natural than human language? Natural-language search is at the center of a storm of ever-increasing web-driven demand for human-computer communication and information access. Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.
