Made to Stick Chip Heath, Dan Heath, 2007-01-02 NEW YORK TIMES BESTSELLER • The instant classic about why some ideas thrive, why others die, and how to make your ideas stick. “Anyone interested in influencing others—to buy, to vote, to learn, to diet, to give to charity or to start a revolution—can learn from this book.”—The Washington Post Mark Twain once observed, “A lie can get halfway around the world before the truth can even get its boots on.” His observation rings true: Urban legends, conspiracy theories, and bogus news stories circulate effortlessly. Meanwhile, people with important ideas—entrepreneurs, teachers, politicians, and journalists—struggle to make them “stick.” In *Made to Stick*, Chip and Dan Heath reveal the anatomy of ideas that stick and explain ways to make ideas stickier, such as applying the human scale principle, using the Velcro Theory of Memory, and creating curiosity gaps. Along the way, we discover that sticky messages of all kinds—from the infamous “kidney theft ring” hoax to a coach’s lessons on sportsmanship to a vision for a new product at Sony—draw their power from the same six traits. *Made to Stick* will transform the way you communicate. It’s a fast-paced tour of success stories (and failures): the Nobel Prize-winning scientist who drank a glass of bacteria to prove a point about stomach ulcers; the charities who make use of the Mother Teresa Effect; the elementary-school teacher whose simulation actually prevented racial prejudice. Provocative, eye-opening, and often surprisingly funny, *Made to Stick* shows us the vital principles of winning ideas—and tells us how we can apply these rules to making our own messages stick.

Permanent Exhibit Matthew Vollmer, 2018 Brief collage-style essays that explore the ephemeral and fractured nature of life in the digital age.

I Was a Teenage Popsicle Bev Katz Rosenbaum, 2006-10-03 Floe Ryan was frozen – or 'vitrified' – at sixteen. She and her parents had a rare disease, so it was their only choice until a cure was found. Now she's been thawed and it's ten years in the future – but she's still a teenager. And her parents are still chilling out... So now her little sister is her older sister, and she's making Floe suffer for every snotty thing she ever did. It's hard getting used to... not to mention a new school, new technology, and a zillion other new things that happened while she was napping in the freezer. Luckily, she has Taz, the hottie skater boy who was a popsicle too, so they get to reintegrate together. But now they're trying to close the Venice Beach Cryonics Center – with Floe's parents still in it! It's up to her to save the clinic and her parents – so she can finally have a somewhat normal life.

The Empathy Exams Leslie Jamison, 2014-04-01 From personal loss to phantom diseases, *The Empathy Exams* is a bold and brilliant collection, winner of the Graywolf Press Nonfiction Prize A Publishers Weekly Top Ten Essay Collection of Spring 2014 Beginning with her experience as a medical actor who was paid to act out symptoms for medical students to diagnose, Leslie Jamison's visceral and revealing essays ask essential questions about our basic understanding of others: How should we care about each other? How can we feel another's pain, especially when pain can be assumed, distorted, or performed? Is empathy a tool by which to test or even grade each other? By confronting pain—real and imagined, her own and others'—Jamison uncovers a personal and cultural urgency to feel. She draws from her own experiences of illness and bodily injury to engage in an exploration that extends far beyond her life, spanning wide-ranging territory—from poverty tourism to phantom diseases, street violence to reality television, illness to incarceration—in its search for a kind of sight shaped by humility and grace.

The Etymologies of Isidore of Seville, 2006-06-08 This work is a complete English translation of the Latin Etymologies of Isidore, Bishop of Seville (c.560-636). Isidore compiled the work between c.615 and the early 630s and it takes the form of an encyclopedia, arranged by subject matter. It contains much lore of the late classical world beginning with the Seven Liberal Arts, including Rhetoric, and touches on thousands of topics ranging from the names of God, the terminology of the Law, the technologies of fabrics, ships and agriculture to the names of cities and rivers, the theatrical arts, and cooking utensils. Isidore provides etymologies for most of the terms he explains, finding in the causes of words the underlying key to their meaning. This book offers a highly readable translation of the twenty books of the Etymologies, one of the most widely known texts for a thousand years from Isidore's time.

Entangled Life Merlin Sheldrake, 2021-04-13 NEW YORK TIMES BESTSELLER • A “brilliant [and] entrancing” (The Guardian) journey into the hidden lives of fungi—the great connectors of the living world—and their astonishing and intimate roles in human life, with the power to heal our bodies, expand our minds, and help us address our most urgent environmental problems. “Grand and dizzying in how thoroughly it recalibrates our understanding of the natural world.”—Ed Yong, author of *An Immense World* ONE OF THE BEST BOOKS OF THE YEAR—Time, BBC Science Focus, The Daily Mail, Geographical, The Times, The Telegraph, New Statesman, London Evening Standard, Science Friday When we think of fungi, we likely think of mushrooms. But mushrooms are only fruiting bodies, analogous to apples on a tree. Most fungi live out of sight, yet make up a massively diverse kingdom of organisms that supports and sustains nearly all living systems. Fungi provide a key to understanding the planet on which we live, and the ways

we think, feel, and behave. In the first edition of this mind-bending book, Sheldrake introduced us to this mysterious but massively diverse kingdom of life. This exquisitely designed volume, abridged from the original, features more than one hundred full-color images that bring the spectacular variety, strangeness, and beauty of fungi to life as never before. Fungi throw our concepts of individuality and even intelligence into question. They are metabolic masters, earth makers, and key players in most of life's processes. They can change our minds, heal our bodies, and even help us remediate environmental disaster. By examining fungi on their own terms, Sheldrake reveals how these extraordinary organisms—and our relationships with them—are changing our understanding of how life works. Winner of the Wainwright Prize, the Royal Society Science Book Prize, and the Guild of Food Writers Award • Shortlisted for the British Book Award • Longlisted for the Rathbones Folio Prize

They Met in a Tavern Elijah Menchaca, 2021-08-10 They used to be heroes . . . and it was all downhill from there. The Starbreakers were your classic teenage heroes. Using their combined powers and skills, they were the most successful group of glintchasers in Corsar. But that all changed the day the city of Relgen died. The group went their separate ways, placing the blame on each other. Brass carried on as a solo act. Snow found work as a notorious assassin. Church became a town's spiritual leader. Angel was the owner of a bar and inn. And after overcoming his own guilt, Phoenix started a new life as a family man. Seven years after their falling out, a hefty bounty is placed on their heads. Phoenix tries to reunite the Starbreakers before everything they have left is taken from them. But a lot can change in seven years. And if mending old wounds was easy, they would have done it a long time ago.

Humanizing Digital Reality Klaas De Rycke, Christoph Gengnagel, Olivier Baverel, Jane Burry, Caitlin Mueller, Minh Man Nguyen, Philippe Rahm, Mette Ramsgaard Thomsen, 2017-09-15 This book aims at finding some answers to the questions: What is the influence of humans in controlling CAD and how much is human in control of its surroundings? How far does our reach as humans really go? Do the complex algorithms that we use for city planning nowadays live up to their expectations and do they offer enough quality? How much data do we have and can we control? Are today's inventions reversing the humanly controlled algorithms into a space where humans are controlled by the algorithms? Are processing power, robots for the digital environment and construction in particular not only there to rediscover what we already knew and know or do they really bring us further into the fields of constructing and architecture? The chapter authors were invited speakers at the 6th Symposium Design Modelling Symposium: Humanizing Digital Reality, which took place in Ensa-Versailles, France from 16 - 20 September 2017.

The Dark Prophecy Rick Riordan, 2018-10-02 Leaving the safety of the demigod training ground, a disgraced Apollo embarks on a quest across North America to find a dangerous ancient-world Oracle while navigating the challenges of the evil Triumvirate.

Zero Day Jan Gangsei, 2016-01-12 Eight years ago, Addie Webster was the victim of the most notorious kidnapping of the decade. Addie vanished—and her high-profile parents were forced to move on. Mark Webster is now president of the United States, fighting to keep the oval office after a tumultuous first term. Then the unthinkable happens: the president's daughter resurfaces. Addie is brought back into her family's fold, but who is this sixteen-year-old girl with a quiet, burning intelligence now living in the White House? There are those in the president's political circle who find her timely return suspicious. When a national security advisor approaches Darrow Fergusson, Addie's childhood best friend and the son of the president's chief of staff, he doesn't know what to think. How could the girl he's missed for all these years be a threat to national security? Still, at the

risk of having his own secrets exposed, Darrow agrees to spy on Addie. He soon realizes that his old friend is much more than the traumatized victim of a sick political fringe group. Addie has come with a mission...but will she choose to complete it?

The Participatory Museum Nina Simon, 2010 Visitor participation is a hot topic in the contemporary world of museums, art galleries, science centers, libraries and cultural organizations. How can your institution do it and do it well? The Participatory Museum is a practical guide to working with community members and visitors to make cultural institutions more dynamic, relevant, essential places. Museum consultant and exhibit designer Nina Simon weaves together innovative design techniques and case studies to make a powerful case for participatory practice. Nina Simon's new book is essential for museum directors interested in experimenting with audience participation on the one hand and cautious about upending the tradition museum model on the other. In concentrating on the practical, this book makes implementation possible in most museums. More importantly, in describing the philosophy and rationale behind participatory activity, it makes clear that action does not always require new technology or machinery. Museums need to change, are changing, and will change further in the future. This book is a helpful and thoughtful road map for speeding such transformation. -Elaine Heumann Gurian, international museum consultant and author of *Civilizing the Museum* This book is an extraordinary resource. Nina has assembled the collective wisdom of the field, and has given it her own brilliant spin. She shows us all how to walk the talk. Her book will make you want to go right out and start experimenting with participatory projects. -Kathleen McLean, participatory museum designer and author of *Planning for People in Museum Exhibitions* I predict that in the future this book will be a classic work of museology. --Elizabeth Merritt, founding director of the Center for the Future of Museums

Tales of the San Francisco Cacophony Society Kevin Evans, John Law, Carrie Galbraith, 2019-06-27 A template for pranksters, artists, adventurers and anyone interested in rampant creativity, this is the history of the most influential underground cabal that has never been exposed by the mainstream media. Rising from the ashes of the mysterious and legendary Suicide Club, the Cacophony Society at its zenith hosted chapters in most major US cities and influenced much of what was once called the 'underground'. Packed with original art, never before published photographs, original documents and incredulous news stories this is an homage to the San Francisco group.

Journey to the Mythological Inferno Enrico Mattievich, 2010 In his *Journey to the Mythological Inferno*, author Enrico Mattievich, boldly ties the many loose ends-and proposes a novel theory-to, among other things, our understanding of the origin of pre-Columbian American civilization, to the origin of ancient Greek mythology, to the tantalizing mystery of ancient knowledge of America in the Old World, and to myths of ancient travelers to the 'Underworld' (Southern Hemisphere). With about 75 illustrations and maps, Dr. Mattievich 'reconstructs' a possible journey by ancient Greek to the heartland of South America, guided by the verses of Greek and Roman poets, and following the mighty Amazon river all the way to its source at the Peruvian Andes.
