🔗 **BMP-2** Ryszard Kominek,2009-12-15 * INCLUDES FREE DECALS AND MASKING FOIL * PACKED WITH PHOTOS IN COLOR AND BLACK AND WHITE The BMP-2 is a second-generation, amphibious infantry fighting vehicle introduced in the 1980s in the Soviet Union, following the BMP-1 of the 1960s. Although the BMP-1 was a revolutionary design, its main armament quickly became obsolete. Therefore the Soviet Union decided to produce an updated and improved version of the BMP-1 with the main emphasis on improving the main armament. In 1972 work got underway to develop an improved version of the BMP-1. This photo album of the BMP-2 contains color photos with English/Polish photo captions. Contains external and internal views of the Russian BMP-2 Infantry Fighting Vehicle, and includes free decals. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. Includes extra features such as decals and masking foil.

🔗 **BMP-1** Miroslaw Skwiot,2009-12-15 * INCLUDES FREE DECALS AND MASKING FOIL * PACKED WITH COLOR PHOTOS The BMP-1 was the world's first mass-produced infantry fighting vehicle, a revolutionary design combining the properties of an armored personnel carrier and a light tank. The Soviet military leadership saw any future wars as being conducted with nuclear, chemical and biological weapons, where unprotected infantry would soon be either killed or incapacitated by radiation or chemical and biological agents. A vehicle like the BMP would allow infantry to operate from the relative safety of its armored, radiation shielded interior in contaminated areas and to fight alongside it in uncontaminated areas. It would increase infantry squad mobility, provide fire support to them, and also be able to fight alongside main battle tanks. This book is an invaluable album of detailed photographs for the modeler. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. 🔗 **BMP Infantry Fighting Vehicle 1967-94** Steven J. Zaloga,2013-06-20 The Russian BMP infantry fighting vehicle (IFV) was one of the most significant innovations in infantry tactics in the latter half of the 20th century. Built in response to the threat of nuclear warfare, it was the world's first IFV, providing the infantry squad with unprecedented firepower, mobility and protection. With over 55,000 manufactured since 1966, the BMP is also numerically one of the most important armoured vehicles ever built. This richly illustrated book examines the development and design of the BMP, detailing its armaments, performance in combat and variants.

🔗 **The Soviet Army: Troops, Organization, and Equipment** Department of Department of the Army,2019-07-16 This is NOT an official reprint of FM 100-2-3. This manual should have been updated a long time ago. We took the best copy we could find and replaced most of the photographs because the originals were so dark as to be totally useless. Unfortunately, the text is small on some of the tables so as to be illegible but much of the data is obsolete anyway. We don't know how much interest there is in this manual but if there is enough interest, we will gladly rekey all the data as best we can and add new weapons that have since come on line. As an example, take a look at these on the next few pages. *1K17 Szhatie (1🔗 17🔗 🔗 🔗 🔗 🔗 🔗) Russian Stiletto Laser Tank *Combat Laser System (Peresvet) Russian Laser Cannon *T-14 Armata Main Battle Tank *T-15 Heavy Infantry Combat Vehicle *Kurganets-25 Light Tracked Armored Vehicle *2S35 Koalitsiya-SV 152-mm Self-Propelled Howitzer *VPK-7829 Bumerang Modular Infantry Wheeled Fighting Vehicle Why buy a book you can download for free? If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). 🔗 **Soviet Tank Company Tactics** Defense Intelligence Agency,2019-07-25 Soviet Tank Company Tactics, May 1976 We were surprised to find there were no clean copies in print so we decided to reconstitute the report as best we could. Unfortunately, the photos are not very good and the originals are nowhere to be found, so we did not replace them. Rather than change the document, we decided to add a new document at the end that would show current (2019) Russian tanks and include what little information is available. As far as tactics go, not really sure how the new tanks, such as the T-14 will cause changes to Russian tank tactics but some of the information is still valid today, such as the use of snorkel, night vision and the effects of poor weather conditions. You will note that we added some additional information regarding Russian New Generation Warfare (RNGW), 4th Generation Warfare, Hybrid War, and new Russian weapons at the end including: - 1K17 Szhatie (1🔗 17🔗 🔗 🔗 🔗 🔗 🔗) Russian Stiletto Laser Tank - Combat Laser System (Peresvet) Russian Laser Cannon - T-14 Armata Main Battle Tank - T-15 Heavy Infantry Combat Vehicle - Kurganets-25 Light Tracked Armored Vehicle - 2S35 Koalitsiya-SV 152-mm Self-Propelled Howitzer - VPK-7829 Bumerang Modular Infantry Wheeled Fighting Vehicle Why buy a book you can download for free? 🔗 **Raising Red Flags** N.R. Jenzen-Jones,Jonathan Ferguson,2014-11-18 This report examines the significant range of arms and munitions carried and employed throughout the conflict by armed individuals on all sides. It also examines, somewhat less extensively, the range of armoured vehicles and aircraft observed in the conflict. This report examines over 100 distinct weapons systems, over 60 different types of munitions, and over 70 different models of armoured fighting vehicles, as well as miscellaneous associated materiel, in the context of the ongoing conflict in Ukraine. Particular attention is paid to items which may indicate flows of arms and munitions into and within the affected areas of Ukraine. Beginning with an assessment of the arms and munitions employed during the initial unrest in Kiev, in February 2012, the report documents relevant materiel up until the time of publication

🔗 **The Bear Went Over the Mountain** Lester W. Grau,1996 Counterinsurgency punctuated by moments of heady excitement and terror. Colonel Grau, the editor and translator, has added his own commentary to produce a useful guide for commanders to meet the challenges of this kind of war and to help keep his fellow soldiers alive. This book will also be of interest to the historian and general reader, who will discover that advances in technology have had little impact on this kind of war, and that many of the same tactics the British Army used on the Northwest Frontier still apply today.

🔗 **Russian Assessments and Applications of the Correlation of Forces and Means** Clint Reach,Vikram Kilambi,Mark Cozad,2020-06-30 The authors examine how Russia assesses and applies the correlation of forces and means-the military balance between two opponents at the global, regional, and local levels-and outline recent relevant developments in Russian military thought.

RUSSIA’S MILITARY MODERNISATION: AN ASSESSMENT The International Institute for Strategic Studies (IISS),2020-09-29 This new IISS Strategic Dossier examines the recent development of Moscow’s armed forces and military capabilities. It analyses the aspirations underpinning Russia’s military reform programme and its successes as well as its failures. The book also provides insights into Russia’s operational use of its armed forces, including in the intervention in Syria, the goals and results of recent state armament programmes, and the trajectory of future developments. This full-colour volume includes more than 50 graphics, maps and charts and over 70 images, and contains chapters on: Russia’s armed forces since the end of the Cold War Strategic forces Ground forces Naval forces Aerospace forces Russia’s approach to military decision-making and joint operations Economics and industry At a time when Russia’s relations with many of its neighbours are increasingly strained, and amid renewed concern about the risk of an armed clash, this dossier is essential reading for understanding the state, capabilities and future of Russia’s armed forces.

LUCKY WAR Richard Moody Swain, 1997 Provides an account, from the point of view of the U.S. Army forces employed, of the 1990-91 Persian Gulf War, from the Iraqi invasion of Kuwait to the withdrawal of coalition forces from southeastern Iraq. It focuses on the Army’s part in this war, particularly the activities of the Headquarters, Third Army, and the Army Forces Central Command (ARCENT). It looks especially at the activities of the VII Corps, which executed ARCENT’s main effort in the theater ground force Schwerpunkt -- General Schwarzkopf’s Great Wheel. This is not an official history; the author speaks in his own voice and makes his own judgments. Maps.

Newell’s and Michael D. Krause’s On Operational Art, captures the doctrinal debate over the evolving concept of operational art—the critical link between strategy and tactics—in the face of the new complexities of warfare and the demands of irregular operations in the twenty-first century. Consisting of fifteen original essays selected and edited by Michael D. Krause in collaboration with R. Cody Phillips, the well-organized anthology presents the collective view of distinguished military historians and scholars that operational art must be adjusted to accommodate the changing circumstances happening around the world, especially when dealing with broad coalitions and alliances in regional environments and at an international level. THE TANKS OF AUGUST Ruslan Pukhov, 2010 The publication of this book coincides with the second anniversary of the armed conflict between Russia and Georgia on August 8-12, 2008, now dubbed the Five Day War. The conflict was triggered by Georgia’s ambitious and nationalistic president, Mikhail Saakashvili, who attempted a blitzkrieg to conquer the former Georgian autonomy of South Ossetia, which had proclaimed independence. That attempt led to a military intervention by Russia, which acted as the guarantor of peace in the region, and the first official war between Russia and one of the former Soviet republics. This work contains six essays, from a primarily Russian perspective, which provide an in-depth analysis of the political, social, economic, and military context for and causes of the war, the nature of wartime military operations, the human and material costs of the brief struggle, and the war’s likely implications for the future.

THEORY OF GROUND VEHICLES J. Y. Wong, 2001-03-20 An updated edition of the classic reference on the dynamics of road and off-road vehicles As we enter a new millennium, the vehicle industry faces greater challenges than ever before as it strives to meet the increasing demand for safer, environmentally friendlier, more energy efficient, and lower emissions products.
