*Moon Shot* Alan Shepard, Deke Slayton, Jay Barbree, 2011-05-03 New York Times bestseller for fans of *First Man*: A “breathtaking” insider history of NASA’s space program—from astronauts Alan Shepard and Deke Slayton (Entertainment Weekly). On October 4, 1957, the Soviet Union launched Sputnik I, and the space race was born. Desperate to beat the Russians into space, NASA put together a crew of the nation’s most daring test pilots: the seven men who were to lead America to the moon. The first into space was Alan Shepard; the last was Deke Slayton, whose irregular heartbeat kept him grounded until 1975. They spent the 1960s at the forefront of NASA’s effort to conquer space, and *Moon Shot* is their inside account of what many call the twentieth century’s greatest feat—landing humans on another world. Collaborating with NBC’s veteran space reporter Jay Barbree, Shepard and Slayton narrate in gripping detail the story of America’s space exploration from the time of Shepard’s first flight until he and eleven others had walked on the moon.

Spaceship Handbook Jack Hagerty, Jon C. Rogers, 2001

Creating Space Mat Irvine, 2002 Foreword by Sir Arthur C Clarke. Space exploration began with model and toy rockets. History shows that the greatest Rocketeers began their careers flying model rockets. Now in this book the story of the space race is told in dazzling colour. From the birth of models to the present day the toy rockets have often inspired the real rockets of the future. In fact model manufacturers like Revell and Aurora were frequently in trouble with the defence department for revealing military secrets! This is the Story of the Space Age, and uses the models to illustrate the way history twisted and turned to put us where we are today -- and maybe how space travel will develop in the future.
