Famous Figures of Ancient Times Cathy Diez-Luckie,2009-04-07 Famous Figures of Ancient Times Make articulated puppets of famous people from ancient history with Famous Figures of Ancient Times! Cut them out and put them together with a hole punch and mini brads. Then use your imagination to make them move and come to life with the real stories of history. Inspire your child with this fun history craft. Perfect for eager children who want more hands-on activities and love crafts. You can also use them to motivate reluctant learners. Add this ancient history activity to your homeschool history lesson. Or, have your child make the paper dolls while reading a biography. Another idea is to have your child narrate what they have learned with the puppet. A great hands-on ancient history project for elementary kids. Make 21 Jointed Paper Dolls from Ancient History The 21 famous people in this book come in two versions: one colored and one to color. The card stock pages make sturdy paper dolls in ancient costume. You may laminate the pages before cutting them out to strengthen them. We label the back of each paper doll with a letter key for easy identification and assembly. Cut out the pieces. Use a 1/8" round hole punch to form a hole at each joint. Finally, place a mini brad through the joint hole and you have a moving historical character! Includes Facts and a Reading List There is a short description about each person at the beginning of the book, along with a list of books to read aloud. The list of books may be a teaching resource for books to read while your child is making the jointed paper dolls. Use the historical paper dolls with biographies, with lap books, as a unit study, on a timeline, or with any ancient history curriculum. Hours of fun and educational play for hands-on learners. Build the Great Pyramid with Khufu. Rule ancient Egypt with Hatshepsut. Climb Mount Sinai with Moses. Fight the Spartans with a Greek hoplite. Ride with Hannibal and his war elephants as he tries to defeat the Romans. Learn while playing with paper dolls from Famous Figures of Ancient Times!

Breaking the Chains of Gravity Amy Shira Teitel,2015-10-22 The incredible story of spaceflight before the establishment of NASA. NASA's history is a familiar story, one that typically peaks with Neil Armstrong taking his small step on the Moon in 1969. But America's space agency wasn't created in a vacuum. It was assembled from pre-existing parts, drawing together some of the best minds the non-Soviet world had to offer. In the 1930s, rockets were all the rage in Germany, the focus both of scientists hoping to fly into space and of the German armed forces, looking to circumvent the restrictions of the Treaty of Versailles. One of the key figures in this period was Wernher von Braun, an engineer who designed the rockets that became the devastating V-2. As the war came to its chaotic conclusion, von Braun escaped from the ruins of Nazi Germany, and was taken to America where he began developing missiles for the US Army. Meanwhile, the US Air Force was looking ahead to a time when men would fly in space, and test pilots like Neil Armstrong were flying cutting-edge, rocket-powered aircraft in the thin upper atmosphere. Breaking the Chains of Gravity tells the story of America's nascent space program, its scientific advances, its personalities and the rivalries it caused between the various arms of the US military. At this point getting a man in space became a national imperative, leading to the creation of the National Aeronautics and Space Administration, otherwise known as NASA.

Sydney Opera House Aid Philip Drew,2002-05-24 A detailed survey of the Sydney Opera House, illustrated with photographs and drawings. Sydney Opera House (1957-73) is one of the best-known buildings of the late twentieth century and perhaps Australia's most potent landmark, its white shell-like forms inextricably linked with the image of Sydney itself. A momentous breakthrough for the architecture of its time, Jørn Utzon's building remains monumental in contemporary world architecture across the world. Launched in 1991, the Architecture in Detail series attracted immediate acclaim and now comprises more than 60 titles. These books are highly collectable documents, each focusing in depth on a celebrated building. The series covers all sides of the vast spectrum of architecture from the past, present and future; the individual buildings are selected for their exceptional character, innovative design or technical virtuosity. Each volume contains a definitive text by a respected

author; a sequence of color and black-and-white photographs; a series of technical drawings; and a set of essential working details. These titles are vital to every architectural library, appealing to the professional and student alike, or indeed anyone with an appreciation of buildings.

Young People Re-Generating Politics in Times of Crises Sarah Pickard,Judith Bessant,2017-07-31 This book provides insight into the diverse ways young people from around the world are regenerating politics in innovative and multifaceted ways. The authors, who include academics and activists, challenge claims that young people are apolitical, apathetic and living up to the ‘me generation’ stereotype. Contributions cover a rich body of case examples of traditional and new forms of youth politics in response to situated injustices and political and socio-economic crises. Significant and optimistic, the collection presents strong evidence from across the globe that these developments are not isolated incidences, but are in fact part of a systemic, large-scale transformation leading to a regeneration of the political landscape by young people. The book is aimed at students and scholars in the fields of politics, sociology, policy studies and youth and childhood studies.
