The subsequent chapter deals with the development of the paper-machine where the British improved the machine and were then widely used by people. This topic is followed by discussions on the progress of paper making in 1830-1835 where an advanced type of Fourdrinier machine was introduced by Matthew Towgood and Leapidge South. Other chapters describe further improvements on the Fourdrinier machines and the paper-makings on the late 1800's.
