In the Metro Marc Augé, 2002 Tourists climb the Eiffel Tower to see Paris. Parisians know that to really see the city you must descend into the metro. In this revelatory book, Marc Augé takes readers below Paris in a work that is both an ethnography of the city and a personal narrative. Guiding us through history, memory, and physical space, Augé juxtaposes the romance of the metro with the reality of multiethnic urban France. His work is part autobiography, with impressions from a lifetime riding the trains; part meditation on

self and memory reflected in the people and places underneath Paris; part analysis of a place where the third world and the first world meet, where remnants of cultures move and press together; and part a reflection on anthropology in an era of globalization and urban development. Although he is a pillar of French thought, *In the Metro* is Auge's first major critical and creative work translated into English. It shows him to be firmly rooted in a tradition of literary ethnography that reaches back to Claude Levi-Strauss and Michel de Certeau, but also engaged in current theoretical debates in literary and cultural studies. In Auge's idiosyncratic and innovative approach, the act of observing the quotidian is elevated to an art. The writer and his history become part of the field he observes, and anthropology interacts with a site -- urban life -- usually reserved for sociology and cultural studies. Throughout, Auge reveals a passion for his milieu, seeing the metro as a place rich with history and literature -- an eclectic egalitarian society.

The Pariahs of Yesterday Leslie Page

Moch, 2012-03-30 This work looks at the surge of Bretons who left their homes in Western France in the latter half of the 19th century to live and work in Paris. Portrayed as backward, ignorant peasants they found no welcome until after WWII. Moch positions her work within immigration theory, connecting migration studies to theories about state projects of assimilation and about cultures of inclusion and exclusion.

Football in France Geoff Hare, 2003-04 Hare traces the gradual evolution of traditional French

football values and considers the impact of new and controversial business practices. He asks what is peculiarly French about French football, and what does football tell us about France?.

The Strange Death of Europe Douglas

Murray, 2018-06-14 The Strange Death of Europe is the internationally bestselling account of a continent and a culture caught in the act of suicide, now updated with new material taking in developments since it was first published to huge acclaim. These include rapid changes in the dynamics of global politics, world leadership and terror attacks across Europe. Douglas Murray travels across Europe to examine first-hand how mass immigration, cultivated self-distrust and delusion have contributed to a continent in the grips of its own demise. From the shores of Lampedusa to migrant camps in Greece, from Cologne to London, he looks critically at the factors that have come together to make Europeans unable to argue for themselves and incapable of resisting their alteration as a society. Murray's tremendous and shattering book (The Times) addresses the disappointing failures of multiculturalism, Angela Merkel's U-turn on migration, the lack of repatriation and the Western fixation on guilt, uncovering the malaise at the very heart of the European culture. His conclusion is bleak, but the predictions not irrevocable. As Murray argues, this may be our last chance to change the outcome, before it's too late.

Understanding Football Hooliganism Ramón Spaaij, 2006-01-01 Football hooliganism periodically generates widespread political and public anxiety. In spite of the efforts made and resources invested over the past decades, football hooliganism is still perceived by politicians, policymakers and media as a disturbing social problem. This highly readable book provides the first systematic and empirically grounded

comparison of football hooliganism in different national and local contexts. Focused around the six Western European football clubs on which the author did his research, the book shows how different clubs experience and understand football hooliganism in different ways. The development and effects of anti-hooligan policies are also assessed. The emphasis throughout is on the importance of context, social interaction and collective identity for understanding football hooliganism. This book will be essential reading for anyone interested in football culture, hooliganism and collective violence.

Demystifying the French Janet

Hulstrand, 2019-01-26 *Demystifying the French: How to Love Them, and Make Them Love You* is aimed at first-time visitors to France as well as long-term expatriates. Designed to help readers 'crack the code,' avoid common mistakes, and get off on the right foot with the French, the book begins with five easy-to-follow essential tips 'for even brief encounters' by introducing a few French phrases and how to say them that will pave the way for a positive experience in France. The tips are followed by 10 chapters that go into a deeper explanation of French habits, manners, and ways of viewing the world. Hulstrand shares the perspective she has gained in nearly 40 years of time spent living, working, teaching, and traveling in France, and illustrates the principles she is discussing with sometimes touching, and often amusing, personal anecdotes... Reflections contributed by David Downie, Adrian Leeds, Harriet Welty Rochefort, and other well-

known commentators on Franco-American cultural differences provide additional perspective and depth. A glossary of French terms that is both substantive and whimsical provides surprising insights into historical as well as cultural reasons for the French being 'the way they are.' Aimed mainly at an American audience, this book will be helpful for anyone who wants to better understand the French, and have fun while doing so.--Amazon.com.

A USA TODAY bestseller! Thousands of years after his death, Milo of Croton is still undisputedly revered to be the strongest man who ever lived. This dominant Olympian wrestler routinely entered packed stadiums carrying a full-grown bull across his back. As he paced the track, Milo welcomed his cheering fans to slap the loins and tug the tail of his colossal bovine pet. Within the pages of this book, based on historical accounts, readers learn how Milo accomplished his monumental wrestling achievements – a career that amazingly endured an unparalleled three decades. An epic odyssey of inspirational and motivational magnitude, 'Wolves of Croton - The Untold Story of Milo' details Milo's genetic

and epigenetic influencers. Attend Milo's strength conditioning sessions and wrestling practices, learn the origins of modern-day strength training and the achievement of peak performance, then step into the arena and watch Milo mangle his opponents inside the pit. Biocentrism Robert Lanza, Bob Berman, 2011 Robert Lanza is one of the most respected scientists in the world a US News and World Report cover story called him a genius and a renegade thinker, even likening him to Einstein. Lanza has teamed with Bob Berman, the most widely read astronomer in the world, to produce *Biocentrism*, a revolutionary new view of the universe. Every now and then a simple yet radical idea shakes the very foundations of knowledge. The startling discovery that the world was not flat challenged and ultimately changed the way people perceived themselves and their relationship with the world. For most humans of the 15th century, the notion of Earth as ball of rock was nonsense. The whole of Western, natural philosophy is undergoing a sea change again, increasingly being forced upon us by the experimental findings of quantum theory, and at the same time, toward doubt and uncertainty in the physical explanations of the universes genesis and structure. *Biocentrism* completes this shift in worldview, turning the planet upside down again with the revolutionary view that life creates the universe instead of the other way around. In this

paradigm, life is not an accidental byproduct of the laws of physics. Biocentrism takes the reader on a seemingly improbable but ultimately inescapable journey through a foreign universe our own from the viewpoints of an acclaimed biologist and a leading astronomer. Switching perspective from physics to biology unlocks the cages in which Western science has unwittingly managed to confine itself. Biocentrism will shatter the readers ideas of life--time and space, and even death. At the same time it will release us from the dull worldview of life being merely the activity of an admixture of carbon and a few other elements; it suggests the exhilarating possibility that life is fundamentally immortal. The 21st century is predicted to be the Century of Biology, a shift from the previous century dominated by physics. It seems fitting, then, to begin the century by turning the universe outside-in and unifying the foundations of science with a simple idea discovered by one of the leading life-scientists of our age. Biocentrism awakens in readers a new sense of possibility, and is full of so many shocking new perspectives that the reader will never see reality the same way again.

Soccer Empire Laurent Dubois, 2010 Laurent Dubois mines the history of French soccer for fascinating theories and riveting stories. His understanding of the relationship between the game and politics is subtle, leading readers deep into important discussions about race and national identity. For those of us who admired the poetics of Les Bleus this is essential reading.—Franklin Foer, author of *How Soccer Explains the World* Laurent Dubois is

historian, fan and graceful writer all in one. In soccer, he has found an innovative way to explore France and its empire. A serious book and an excellent read.—Simon Kuper, author of *Soccernomics* Beautifully lyrical and authoritative. We meet a host of players, colonized and colonizer, following them from their original playing fields—a vast lawn, a concrete lot—to their triumphs in national and international play. —Alice Kaplan, author of *The Interpreter* This book is a brilliant, beautifully written, and unique history of French colonialism and post-coloniality through the lens of football/soccer. Dubois weaves an eminently readable and engaging narrative that tracks tensions around race and national identity through the biographies of key football players and officials who became iconic of the aspirations of peripheral subjects of the French empire. More than a simple history of French football, the book amounts to a description of France's imperial project and an incisive reflection on the race question in contemporary France. It will please both fans of the 'beautiful game' and those inclined to dismiss sports as but the opium of the masses.—Paul Silverstein, author of *Algeria in France: Transpolitics, Race and Nation*

Film Theory Thomas Elsaesser, Malte Hagener, 2015-03-12 What is the relationship between cinema and spectator? This is the key question for film theory, and one that Thomas Elsaesser and Malte Hagener put at the center of their insightful and engaging book, now revised from its popular first edition. Every kind of

cinema (and every film theory) first imagines an ideal spectator, and then maps certain dynamic interactions between the screen and the spectator's mind, body and senses. Using seven distinctive configurations of spectator and screen that move progressively from 'exterior' to 'interior' relationships, the authors retrace the most important stages of film theory from its beginnings to the present—from neo-realist and modernist theories to psychoanalytic, 'apparatus,' phenomenological and cognitivist theories, and including recent cross-overs with philosophy and neurology. This new and updated edition of *Film Theory: An Introduction through the Senses* has been extensively revised and rewritten throughout, incorporating discussion of contemporary films like *Her* and *Gravity*, and including a greatly expanded final chapter, which brings film theory fully into the digital age.
