Star Wars Dark Lord James Luceno, 2005 Darth Vader, the evil emperor's powerful enforcer, sets out to eliminate all resistance to the Empire, a mission that reveals his true strength and role as the Emperor's iron fist.

Jane Austen's Cults and Cultures Claudia L. Johnson, 2014-04-04 Johnson begins by exploring the most important monuments and portraits of Austen, considering how these artifacts point to an author who is invisible and yet whose image is inseparable from the characters and fictional worlds she created. She then passes through the four critical phases of Austen's reception.

Mr. Scott's Guide to the Enterprise Shane Johnson, 1987 Mr. Scott's Guide to the Enterprise is the most accurate, in-depth look at the U.S.S. Enterprise NCC 1701A available. The Enterprise is thoroughly examined, deck-by-deck in full, fascinating detail. By using dozens of blueprints, sketches, and photographs, the inner workings of a starship are revealed.

Hardware: The Definitive SF Works of Chris Foss Chris Foss, 2011-09-06 Foss's groundbreaking and distinctive science fiction art revolutionized paperback covers in the 1970s and 80s. Dramatically raising the bar for realism and invention, his trademark battle-weary spacecraft, dramatic alien landscapes and crumbling brutalist architecture irrevocably changed the aesthetic of science fiction art and cinema. Featuring work for books by Isaac Asimov, E. E. 'Doc' Smith, Arthur C. Clarke, A. E. Van Vogt and Philip K. Dick, and film design for Ridley Scott and Stanley Kubrick, this volume brings together many rare and classic images that have never been seen or reprinted before. The first comprehensive retrospective of Chris Foss's SF career. "Chris Foss' name has become pre-eminent among sf artists... He is in love with the monstrous, with angular momentum, with inertia-free projectiles and irresistible objects." — Brian Aldiss "[Foss'] creations are real machines, not just

an artist's dreams. They combine the two elements so essential to science fiction: realism and a sense of wonder... A medieval goldsmith of future eons." — Alejandro Jodorowsky

Star Trek, the Next Generation Rick Sternbach, 1996 A fan's collection of Enterprise blueprints reveals every deck, corridor, and corner of the ship that explored the vast reaches of space

X-15 Photo Scrapbook Tony R. Landis, Dennis R. Jenkins, 2003 The North American X-15 was the last in a line of manned rocket-powered research airplanes built during the 1950s to explore ever-faster and higher flight regimes. This was an era before computers were commonplace, and the only way to investigate the unknown was to go there. The program was launched in 1954 specifically to produce the first hypersonic (velocities greater than five times the speed of sound) manned aircraft. Forward-thinking researchers also decided to design the airplane to fly to the edge of space, long before the manned space program had begun in earnest. An in-depth history of the X-15 program may be found in *Hypersonic: The Story of the North American X-15* by Dennis R. Jenkins and Tony R. Landis. This book is a collection of illustrations that were assembled for *Hypersonic* but would not fit into the finished work. Since many of these are significant and most have never before been published, it was decided to print this scrapbook as a companion volume to *Hypersonic*. With over 350 b/w and 50 color photos, this scrapbook provides an excellent visual look at a very exciting research program. Dimensions (width x height): 9 x 9 inches # of pages 108 # of color photographs: 400 b/w & color photos

X-Planes Photo Scrapbook Dennis R. Jenkins, 2004 9x9, 450 black & white, photos and 50 color photos The X-Planes conjure up images of Chuck Yeager first breaking the sound barrier in the X-1 or of the black, bullet-shaped X-15 streaking through the skies at over Mach 6. But there have been 48 more X-designations assigned, as well as a host of other experimental aircraft that did not fall into the

formal X-series. Some of these investigated very low-speed flight, vertical take-off, or were technology demonstrators for production military aircraft. Others were missiles, or gliders. One was supposed to be a spacecraft. Tony R. Landis and Dennis R. Jenkins have assembled an outstanding collection of photographs documenting the X-Planes. These photographs come from government and company archives as well as personal and public collections. Hundreds of photos - some in color and many never-before-seen - detail the modern history of experimental flight.
