Titan #1: Taking Wing Michael A. Martin,Andy Mangels,2005-04-01 William Riker, former first officer of the USS Enterprise in Star Trek: The Next Generation, takes command of the new USS Titan in this white-knuckled adventure perfect for longtime and new Star Trek fans. After almost a decade of strife against foes such as the Borg, the Cardassians, the Klingons, and the Dominion, the United Federation of Planets is at the dawn of a new era. Starfleet is renewing its mission of peaceful exploration, diplomacy, and the expansion of knowledge. Among the starships spearheading that endeavor is the USS Titan, commanded by Captain William T. Riker and manned by the most biologically varied and culturally diverse crew in Starfleet history. But their mission does not begin according to plan. In the wake of Star Trek: Nemesis, Praetor Shinzon, slayer of the Romulan Senate, is dead. The power vacuum created by his demise has put the Romulan Star Empire, longtime adversary of the Federation, at the brink of civil war. Competing factions now vie for control of their fragmenting civilization, and if the empire should fall, that entire area of the galaxy may destabilize. To restore order to the region, Titan's long-anticipated mission of exploration is delayed as Starfleet assigns Riker to set up power-sharing talks among the Romulan factions. But even as the first tentative steps are taken toward building a new Romulus, the remnants of the Tal Shiar, the dreaded Romulan intelligence service, are regrouping behind the scenes for a power play of their own. With no other help available, Riker and the Titan crew become the last hope to prevent the quadrant from falling into chaos.

Star Trek Adventures - Beta Quadrant Modiphius Entertainment,2018-10 YOU JUDGE YOURSELVES AGAINST THE PITIFUL ADVERSARIES YOU'VE ENCOUNTERED SO FAR: THE ROMULANS, THE KLINGONS... THEY'RE NOTHING COMPARED TO WHAT'S WAITING.

Deep Space Propulsion K. F. Long,2011-11-25 The technology of the next few decades could possibly allow us to explore with robotic probes the closest stars outside our Solar System, and maybe even observe some of the recently discovered planets circling these stars. This book looks at the reasons for exploring our stellar neighbors and at the technologies we are developing to build space probes that can traverse the enormous distances between the stars. In order to reach the nearest stars, we must first develop a propulsion technology that would take our robotic probes there in a reasonable time. Such propulsion technology has radically different requirements from conventional chemical rockets, because of the enormous distances that must be crossed. Surprisingly, many propulsion schemes for interstellar travel have been suggested and await only practical engineering solutions and the political will to make them a reality. This is a result of the tremendous advances in astrophysics that have been made in recent decades and the perseverance and imagination of tenacious theoretical physicists. This book explores these different propulsion schemes – all based on current physics – and the challenges they present to physicists, engineers, and space exploration entrepreneurs. This book will be helpful to anyone who really wants to understand the principles behind and likely future course of interstellar travel and who wants to recognize the distinctions between pure fantasy (such as Star Trek's 'warp drive') and methods that are grounded in real physics and offer practical technological solutions for exploring the stars in the decades to come.

The Essential Cult TV Reader David Lavery,2021-09-15 The Essential Cult TV Reader is a collection of insightful essays that examine television shows that amass engaged, active fan bases by employing an imaginative approach to programming. Once defined by limited viewership, cult TV has developed its own identity, with some shows gaining large, mainstream audiences. By exploring the defining characteristics of cult TV, The Essential Cult TV Reader traces the development of this once obscure form and explains how cult TV achieved its current status as legitimate television. The essays explore a wide range of cult programs, from early shows such as Star Trek, The Avengers, Dark Shadows, and The Twilight Zone to popular contemporary shows such as Lost, Dexter, and 24, addressing the cultural context that allowed the development of the phenomenon. The contributors investigate the obligations of cult series to their fans, the relationship of camp and cult, the effects of DVD releases and the Internet, and the globalization of cult TV. The Essential Cult TV Reader answers many of the questions surrounding the form while revealing emerging debates on its future.

The Kobayashi Maru Julia Ecklar,2000-09-22 A freak shuttlecraft accident -- and suddenly Captain Kirk and most of his senior officers find themselves adrift in space, with no hope of rescue, no hope of repairing their craft, or restoring communications -- with nothing, in short but time on their hands. Time enough for each to tell the story of the Kobayashi Maru -- the Starfleet Academy test given to command cadets. Nominally a tactical exercise, the Kobayashi Maru is in fact a test of character revealed in the choices each man makes -- and does not make. Discover now how Starfleet Cadets Kirk, Chekov, Scotty, and Sulu each faced the Kobayashi Maru...and became in turn Starfleet officers.

Danny Dunn and the Anti-Gravity Paint Jay Williams,Raymond Abrashkin,2014-11-15 Through a mishap in Professor Bulfinch's laboratory, Danny accidentally creates an anti-gravity paint. The natural use, of course, is for a spaceship -- the paint can replace rockets to get the ship into space. Unfortunately, the spaceship is launched prematurely after Danny and Joe follow Professor Bulfinch and Dr. Grimes on a tour of the ship. A mechanical failure dooms the four to a one-way trip out of the Solar System -- unless they can repair the spaceship in time! This is the first of the 15-volume Danny Dunn series and features the original cover by acclaimed artist Ezra Jack Keats. Look for Danny Dunn on a Desert Island, the second volume of the series, coming soon from Wildside Press!

Hardware: The Definitive SF Works of Chris Foss Chris Foss,2011-09-06 Foss's groundbreaking and distinctive science fiction art revolutionized paperback covers in the 1970s and 80s. Dramatically raising the bar for realism and invention, his trademark battle-weary spacecraft, dramatic alien landscapes and crumbling brutalist architecture irrevocably changed the aesthetic of science fiction art and cinema. Featuring work for books by Isaac Asimov, E. E. 'Doc' Smith, Arthur C. Clarke, A. E. Van Vogt and Philip K. Dick, and film design for Ridley Scott and Stanley Kubrick, this volume brings together many rare and classic images that have never been seen or reprinted before. The first comprehensive retrospective of Chris Foss's SF career. "Chris Foss' name has become pre-eminent among sf artists... He is in love with the monstrous, with angular momentum, with inertia-free projectiles and irresistible objects." — Brian Aldiss "[Foss'] creations are real machines, not just an artist's dreams. They combine the two elements so essential to science fiction: realism and a sense of wonder... A medieval goldsmith of future eons." — Alejandro Jodorowsky

Dangling Propositions Billy Sledge,2017-12-11 ...blest are those/Whose blood and judgment are so well commingled/That they are not a pipe for Fortune's finger/To sound what stop she please. (Hamlet III, 2) I can

imagine these Shakespearean lines occurring to my character Nebo Rhombus, confronted with obeying the mysterious will of the plasmamorph In Instrument, one of three stories comprising Dangling Propositions. A force of life from Earth's atmosphere has revealed itself to Rhombus, an image consultant/promoter. It is determined to employ him to somehow lead humankind from a world-threatening course, before that course is cataclysmically corrected. A matter of course is also plotted inThe Superstoic, though on an individual scale. Whether ultra-reticent library worker Zharko Solovich is willing, he is held to account for his right to be silent in an alternate world where no such right exists. For compulsive mimic Bogustin Guisermann, who hides himself mirroring others, being unintentionally gifted with the ability to blind people to his presence, as a result of thought-projection experiments, may be the refuge from thejudging sight of the world he's sought. In Not to Behold, to be perceived, not to be perceived, seems the question.

Escape from Baghdad! Saad Z. Hossain,2015 Welcome to Baghdad during the US invasion. A desperate American military has created a power vacuum that needs to be filled. Religious fanatics, mercenaries, occultists, and soldiers are all vying for power. So how do regular folks try to get by? If you're Dagr and Kinza, a former economics professor and a streetwise hoodlum, you turn to dealing in the black market. But everything is about to change, because they have inherited a very important prisoner: the star torturer of Hussein's recently collapsed regime, Captain Hamid, who promises them untold riches if they smuggle him out of Baghdad. With the heat on and nothing left for them in Baghdad, they enlist the help of Private Hoffman, their partner in crime and a U.S. Marine. In the chaos of a city without rule, getting out of Baghdad is no easy task and when they become embroiled in a mystery surrounding an ancient watch that doesn't tell time, nothing will ever be the same. With a satiric eye firmly cast on the absurdity of human violence, *Escape from Baghdad!* features shades of *Catch-22* and *Three Kings* while giving voice, ribald humor, and firepower to to people often referred to as collateral damage.
