Galactic North Alastair Reynolds,2020-04-21 A collection of eight short stories and novellas in the dark and turbulent world of Alastair Reynolds' Revelation Space universe.Centuries from now, solidarity stretches thin as humanity spreads past the solar system and to the nearest stars. Technology has produced powerful new tools-but lethal risk will always accompany great advancement.And without foresight, opposing groups may fracture multiple worlds. Between the Demarchists and the Conjoiners, the basic right to expand human intelligence-beyond its natural limits-has become a war-worthy cause. Only vast lighthugger starships bind these squabbling colonies together, manned by the panicky and paranoid Ultras. And the hyperpigs just try to keep their heads down.The rich get richer. And everyone tries not to think about the worrying number of extinct alien civilizations turning up on the outer reaches of settled space...because who's to say that humanity won't be next?

**A Call to Duty** David Weber,Timothy Zahn,2014-09-16 Growing up, Travis Uriah Long yearned for order and discipline in his life . . . the two things his neglectful mother couldn't or wouldn't provide. So when Travis enlisted in the Royal Manticoran Navy, he thought he'd finally found the structure he'd always wanted so desperately. But life in the RMN isn't exactly what he expected. Boot camp is rough and frustrating; his first ship assignment lax and disorderly; and with the Star Kingdom of Manticore still recovering from a devastating plague, the Navy is possibly on the edge of budgetary extinction. The Star Kingdom is a minor nation among the worlds of the Diaspora, its closest neighbors weeks or months away, with little in the way of resources. With only modest interstellar trade, no foreign contacts to speak of, a plague-ravaged economy to rebuild, and no enemies looming at the hyper limit, there are factions in Parliament who want nothing more than to scrap the Navy and shift its resources and manpower elsewhere. But those factions are mistaken. The universe is not a safe place. Travis Long is about to find that out. At the publisher's request, this title is sold without DRM (Digital Rights Management). About A Call to Duty: A new series set in the universe of Webers popular heroine Honor Harrington gets off to a solid start. . . . The first book in the Cobra War series hits all those marks in admirable style and makes for a quick, entertaining sci-fi novel. ¾Blogcritics \_[Conqueror]'s Heritage] is another finely wrought space adventure . . . **The Pixar Theory** Jon Negroni,2015-06-04 Every Pixar movie is connected. I explain how and possibly why. These are the words that began the detailed essay now known as The Pixar Theory, which came out way back in 2013. It collected over 10 million views on Jon's blog alone, and was syndicated on Buzzfeed, Mashable, Huffpost, Entertainment Weekly, and more - generating over 100 million impressions and now translated into a dozen languages. Now, these thoughts and ideas first written by Jon Negroni have been fully realized inside this book, aptly named The Pixar Theory. In this book, you'll find an analysis of every single Pixar movie to date and how it tells a hidden story lurking behind these classic movies. You'll learn about how the toys of Toy Story secretly owe their existence to the events of The Incredibles. You'll learn about what truly happened to the civilization of cars from Cars before the events of WALL-E. And of course, you'll find out the possible truth for why Boo of Monsters Inc. is the most important Pixar character yet. Welcome to the Pixar Theory. Don't forget to fasten your imagination.

*Knock Wood* Candice Bergen,2014-07 Candice Bergen's bestselling 1984 memoir: an "engaging, intelligent, and wittily self-deprecating autobiography" (The New York Times). Candice Bergen was born into the heady Hollywood of the 1950s, where "celebrity offspring" were celebrities unto themselves. And because she was the daughter of Edgar Bergen, vaudeville and radio's greatest dignitary/comedian, her "sibling" was Charlie McCarthy, the impudent dummy beloved of millions. Bergen—much as he loved his daughter—was a man who "kept his emotions pressed and neatly

hung,” and was more comfortable speaking to—and through—his brainchild who never had to grow up and leave the paradise that was childhood. Knock Wood is a book all about growing up—about the comedy of expectations that ruled Candice Bergen's early life, about the ironies that attended her exotic rites of passage. She stepped out into a world that offered her a wealth of options: adolescence in Swiss boarding schools; at nineteen, costarring opposite Steve McQueen in *The Sand Pebbles*; quick entry into the profession of photojournalism; automatic acceptance among the esteemed company of the moment—be it the international jet set, *Bel Air* in the 1960s, or the world that was radical politics in the 1970s. But always she carried the conviction that her gifts were untested, her luck unearned. Told with wit, self-deprecation, and a rare degree of courage, *Knock Wood* is the extraordinary record of Candice Bergen's coming of age. It is at once the moving fable of the love between a father and a daughter, of a woman's triumph over self-doubt, and a dazzling journal of America's life and times over the past four decades.

**From Cave Man to Cave Martian** Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a “Short Stay” Opposition Class mission to Mars as the first mission rather than the “Long Stay” concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Personality Howard S. Friedman, Miriam W. Schustack, 2003 [This] introductory textbook examines theories of personality, starting from the

viewpoint that there are eight basic aspects to personality: psychoanalytic, ego, biological, behaviorist, cognitive, trait, humanistic, and interactionist. Later chapters apply these aspects to individual differences such as those of gender and culture. Summaries after each chapter encapsulate key theorists and concepts discussed. -<http://www.bn.com>.

Wiley, John Scott Allen, 2013 An ideal core text for introductory courses, *Medical Anthropology: A Biocultural Approach*, Second Edition, offers an accessible and contemporary overview of this rapidly expanding field. Suburban Remix Jason Beske, David Dixon, 2018-02 Investment has flooded back to cities because dense, walkable, mixed-use urban environments offer choices that support diverse dreams. Auto-oriented, single-use suburbs have a hard time competing. *Suburban Remix* brings together experts in planning, urban design, real estate development, and urban policy to demonstrate how suburbs can use growing demand for urban living to renew their appeal as places to live, work, play, and invest. The case studies and analysis show how compact new urban places are being created in suburbs to produce health, economic, and environmental benefits, and contribute to solving a growing equity crisis.

Slave Stealers Timothy Ballard, 2018 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day underground railroad which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The Conductor; Abraham Lincoln--the Great Emancipator; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
