Power Friending Amber Mac,2010-06-10 Amber understands how important it is for all of us, both as individuals and as businesses, to be able to use social media to connect with people in ways that are real and authentic. I think she's a leader in this space. -Tony Robbins, world-renowned speaker and entrepreneur Amber Mac wants to be your friend. She may be a tech-savvy webpreneur, the popular host of TV shows and video podcasts, and an in-demand consultant and speaker, but if you ask Amber Mac about her strategy for success, she'll tell you she's just trying to be a good friend. When it comes to social media-whether it's Facebook or Twitter or the latest video blog-the

tools evolve quickly, the rules change rapidly, and the technology feels more and more complex. But making social media work for your company doesn't have to be complicated or expensive. In this compact yet thorough guide, Mac shows you how to effectively harness the online world to grow your business. The secret: think of your audience as your friends and then treat them that way. The Power Friending approach is all about developing real relationships based on mutual respect and support. While you may never meet some of your online friends face-to-face, they still expect you to follow the established norms of friendship: be authentic, reach out, listen. And don't lie to your friends. These same rules apply when building a strong brand online. Whether you're a blogger, a small company, a well-known global enterprise, or an aspiring queen of the Internet, Mac shows how to make the most of social networking tools, including: -Targeting the right networks -Feeding and seeding a community -Authentically engaging with customers and fans -Managing your online friendships on a daily basis and on a budget This isn't a book of abstract theories or complicated strategies. Mac writes from personal experience: she built a huge fan base through social networking. The Second Self Sherry Turkle, 1984 In *The Second Self*, Sherry Turkle looks at the computer not as a tool, but as part of our social and psychological lives; she looks beyond how we use computer games and spreadsheets to explore how the computer affects our awareness of ourselves, of one another, and of our relationship with the world. Technology, she writes, catalyzes changes not only in what we do but in how we think. First published in 1984, *The Second Self* is still essential reading as a primer in the psychology of computation. This twentieth anniversary edition allows us to reconsider two decades of computer culture-to (re)experience what was and is most novel in our new media culture and to view our own contemporary relationship with technology with fresh eyes. Turkle frames this classic work with a new introduction, a new epilogue, and extensive notes added to the original text. Turkle talks to children, college students, engineers, AI scientists, hackers, and personal computer owners-people confronting machines that seem to think and at the same time suggest a new way for us to think-about human thought, emotion, memory, and understanding. Her interviews reveal that we

experience computers as being on the border between inanimate and animate, as both an extension of the self and part of the external world. Their special place betwixt and between traditional categories is part of what makes them compelling and evocative. In the introduction to this edition, Turkle quotes a PDA user as saying, When my Palm crashed, it was like a death. I thought I had lost my mind. Why we think of the workings of a machine in psychological terms-how this happens, and what it means for all of us-is the ever more timely subject of *The Second Self*. Book jacket.
