Reinforcement Learning, second edition Richard S. Sutton,Andrew G. Barto,2018-11-13 The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

Personality Howard S. Friedman,Miriam W. Schustack,2003 [This] introductory textbook examines theories of personality, starting from the viewpoint that there are eight basic aspects to personality: psychoanalytic, ego, biological, behaviorist, cognitive, trait, humanistic, and interactionist. Later chapters apply these aspects to individual differences such as those of gender and culture. Summaries after each chapter encapsulate key theorists and concepts discussed. -http://www.bn.com.

Lightless C.A. Higgins,2015-09-29 NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BUZZFEED AND KIRKUS REVIEWS • With deeply moving human drama, nail-biting suspense—and bold speculation informed by a degree in physics—C. A. Higgins spins a riveting science fiction debut guaranteed to catapult readers beyond their expectations. Serving aboard the Ananke, an experimental military spacecraft launched by the ruthless organization that rules Earth and its solar system, computer scientist Althea has established an intense emotional bond—not with any of her crewmates, but with the ship’s electronic systems, which speak more deeply to her analytical mind than human feelings do. But when a pair of fugitive terrorists gain access to the Ananke, Althea must draw upon her heart and soul for the strength to defend her beloved ship. While one of the saboteurs remains at large somewhere on board, his captured partner—the enigmatic Ivan—may prove to be more dangerous. The perversely fascinating criminal whose silver tongue is his most effective weapon has long evaded the authorities’ most relentless surveillance—and kept the truth about his methods and motives well hidden. As the ship’s systems begin to malfunction and the claustrophobic atmosphere is increasingly poisoned by distrust and suspicion, it falls to Althea to penetrate the prisoner’s layers of intrigue and deception before all is lost. But when the true nature of Ivan’s mission is exposed, it will change Althea forever—if it doesn’t kill her first. Praise for Lightless “Gripping . . . sci-fi flavored with a hint of thriller.”—New York Daily News “[A] measured, lovely science-fiction debut [that is] more psychological thriller . . . contained, disciplined, tense . . . The plot is compulsive. . . . Lightless is the first of a planned series, and you can’t help looking forward to learning what’s next.”—The New York Times “Lightless is full of suspense and fun as hell to read.”—BuzzFeed “Absolutely brilliant . . . This is science fiction as it is meant to be done: scientific concepts wedded to and built upon human ideals.”—Seanan McGuire, New York Times bestselling author of the October Daye series “The stakes in this story are high—life and death, rebellion and betrayal—and debut novelist Higgins continually ratchets up the tension. . . . A suspenseful, emotional story that asks plenty of big questions about identity and freedom, this is a debut not to be missed.”—Kirkus Reviews (starred review) “A taut, suspenseful read.”—Tech Times “Lightless is an exercise in lighting a very slow fuse and building the tension to an unbearable pitch while making us guess just how apocalyptic the ultimate explosion will be. . . . It is a high-wire act, a wonderment, and a fine accomplishment from a name we’ll be seeing again.”—Sci Fi

The Girl in the Road Monica Byrne,2014-05-20 A debut that Neil Gaiman calls “Glorious. . . . So sharp, so focused and so human.” The Girl in the Road describes a future that is culturally lush and emotionally wrenching. Monica Byrne bursts on to the literary scene with an extraordinary vision of the future. In a world where global power has shifted east and revolution is brewing, two women embark on vastly different journeys—each harrowing and urgent and wholly unexpected. When Meena finds snakebites on her chest, her worst fears are realized: someone is after her and she must flee India. As she plots her exit, she learns of the Trail, an energy-harvesting bridge spanning the Arabian Sea that has become a refuge for itinerant vagabonds and loners on the run. This is her salvation. Slipping out in the cover of night, with a knapsack full of supplies including a pozit GPS, a scroll reader, and a sealable waterproof pod, she sets off for Ethiopia, the place of her birth. Meanwhile, Mariama, a young girl in Africa, is forced to flee her home. She joins up with a caravan of misfits heading across the Sahara. She is taken in by Yemaya, a beautiful and enigmatic woman who becomes her protector and confidante. They are trying to reach Addis Abba, Ethiopia, a metropolis swirling with radical politics and rich culture. But Mariama will find a city far different than she ever expected—romantic, turbulent, and dangerous. As one heads east and the other west, Meena and Mariama’s fates are linked in ways that are mysterious and shocking to the core. Written with stunning clarity, deep emotion, and a futuristic flair, The Girl in the Road is an artistic feat of the first order: vividly imagined, artfully told, and profoundly moving.

Slave Stealers Timothy Ballard,2018 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an

autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day underground railroad which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The Conductor; Abraham Lincoln--the Great Emancipator; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

The Rating of Chess Players, Past and Present Arpad E. Elo,2008 One of the most extraordinary books ever written about chess and chessplayers, this authoritative study goes well beyond a lucid explanation of how today's chessmasters and tournament players are rated. Twenty years' research and practice produce a wealth of thought-provoking and hitherto unpublished material on the nature and development of high-level talent: Just what constitutes an exceptional performance at the chessboard? Can you really profit from chess lessons? What is the lifetime pattern of Grandmaster development? Where are the masters born? Does your child have master potential? The step-by-step rating system exposition should enable any reader to become an expert on it. For some it may suggest fresh approaches to performance measurement and handicapping in bowling, bridge, golf and elsewhere. 43 charts, diagrams and maps supplement the text. How and why are chessmasters statistically remarkable? How much will your rating rise if you work with the devotion of a Steinitz? At what age should study begin? What toll does age take, and when does it begin? Development of the performance data, covering hundreds of years and thousands of players, has revealed a fresh and exciting version of chess history. One of the many tables identifies 500 all-time chess greatpersonal data and top lifetime performance ratings. Just what does government assistance do for chess? What is the Soviet secret? What can we learn from the Icelanders? Why did the small city of Plovdiv produce three Grandmasters in only ten years? Who are the untitled dead? Did Euwe take the championship from Alekhine on a fluke? How would Fischer fare against Morphy in a ten-wins match? It was inevitable that this fascinating story be written, ' asserts FIDE President Max Euwe, who introduces the book and recognizes the major part played by ratings in today's burgeoning international activity. Although this is the definitive ratings work, with statistics alone sufficient to place it in every reference library, it was written by a gentle scientist for pleasurable reading -for the enjoyment of the truths, the questions, and the opportunities it reveals.

The Imperial Infantryman's Uplifting Primer - The Damocies Gulf Edition Matt Ralphs,2008-01-08 Pocket book of the Imperial Guard styled in the form of an artefact of the 41st millennium. Contained within is a wealth of information describing tactics, combat, enemies, prayers and much more all couched in a tongue-in-cheek, pseudo-propagandist rhetoric. The book is filled with numerous sketches and diagrams to accompany the text. This second edition has additional sections on fighting in space and combating the alien Tau.

Hardware: The Definitive SF Works of Chris Foss Chris Foss,2011-09-06 Foss's groundbreaking and distinctive science fiction art revolutionized paperback covers in the 1970s and 80s. Dramatically raising the bar for realism and invention, his trademark battle-weary spacecraft, dramatic alien landscapes and crumbling brutalist architecture irrevocably changed the aesthetic of science fiction art and cinema. Featuring work for books by Isaac Asimov, E. E. 'Doc' Smith, Arthur C. Clarke, A. E. Van Vogt and Philip K. Dick, and film design for Ridley Scott and Stanley Kubrick, this volume brings together many rare and classic images that have never been seen or reprinted before. The first comprehensive retrospective of Chris Foss's SF career. "Chris Foss' name has become pre-eminent among sf artists... He is in love with the monstrous, with angular momentum, with inertia-free projectiles and irresistible objects." — Brian Aldiss "[Foss'] creations are real machines, not just an artist's dreams. They combine the two elements so essential to science fiction: realism and a sense of wonder... A medieval goldsmith of future eons." — Alejandro Jodorowsky

States of the Body Produced by Love Nisha Ramayya,2019 Love is a many-headed snake in Nisha Ramayya's debut poetry collection, twisting its way through devotion, sacrifice, and bliss. Seeking a way home, Ramayya discovers that homecoming - the impossible return - is a process of make-believe and magical thinking across Britain, India, and the infinite expanse. Ramayya's visionary poetry traces an opalescent, treacherous world by way of heritage, ritual, and myth. Thousand-petalled lotuses bloom inside skulls, goddesses with dirty feet charm honeybees, strains of jazz standards bleed into anti-national anthems. Meditating on diasporic identity and relationships, her writing roams the Indo-European language family, finds consolation in genealogies of decolonial and anti-racist resistance, and roots itself in the movements between ancient Sanskrit texts and contemporary feminist prose poems. In Ramayya's hands, the body assumes many forms as love produces many states: attraction and repulsion, excitement and exhaustion, selfishness and the dissolution of self. Desire, eroticism, and care contain the possibilities of shame, fury, and destruction. Moving towards and away from love, being translated and transformed by love, suffering under love and refusing its power - the poems in this book never leave love's hold.
