Art Themes Marjorie Cohee Manifold,2017-11-20 Flexible in approach and full of colorful examples, this textbook provides a basic introduction to what art is and can be in the lives of people who do not necessarily think of themselves as artists. You will be taught about a variety of art themes, genres, materials, and processes that appeal to novice art makers. The lessons are organized by themes of general subject matter or media. Options are available for work in mixed media, crafts, photography and digital media, as well as in traditional drawing or painting media. After picking a theme of particular interest to you, look next at the four strands of lessons presented in that thematic unit. Moving from left to right, select one lesson from each consecutive strand and complete that lesson. Because each lesson builds upon previously presented knowledge and developed skill, as you progress through four lessons, one from each strand, you should grow in your understanding of art concepts, meanings, and processes, while also improving your art making skills. Completing this course will help you develop a new appreciation for the power and possibilities of art learning, by understanding better the art others create, as well as making it yourself.

The Maker Cookbook Cindy Wall,Lynn Pawloski,2014-08-28 The Maker Movement is hot, and librarians are eager to participate. Even if you feel restricted by budget, staff, or space, this step-by-step guide will help you turn your library into a creativity center. The Maker Movement is sweeping the nation because it is creative and educational—and a lot of fun. Nonetheless, some librarians have hesitated to incorporate the movement into their programming because their libraries do not have dedicated makerspaces. If that describes you, then take heart. Written by librarians for librarians, this cookbook proves that every library is already a MakerPlace and provides you with recipes to make your library come alive with creativity. Easy-to-use, step-by-step guidance helps you create engaging K-8 programs in science and technology, arts and crafts, and home skills that are perfect for the library setting. The menu of ideas is broken into four types of programming. Appetizers add a taste of the Maker movement to existing library programs. Entrees present full programs for a lengthy one-day event or a short series. Side Dishes are programs you can use if you have limited staff, budget, space, or any combination of those. Desserts are low-tech programs, suitable for young children. Each recipe includes extensions, variations, and curriculum tie-ins that give you even more ways to present the program ideas, whether to a different audience or as part of other related activities. Programs that involve creating a Balloon Zip Line, a Zen Garden, or a Maker Marketplace will delight library users and generate activity and excitement in your library.

Karen Memory Elizabeth Bear,2015-02-03 You ain't gonna like what I have to tell you, but I'm gonna tell you anyway. See, my name is Karen Memery, like memory only spelt with an e, and I'm one of the girls what

works in the Hôtel Mon Cherie on Amity Street. Hôtel has a little hat over the o like that. It's French, so Beatrice tells me. Set in the late 19th century—when the city we now call Seattle Underground was the whole town (and still on the surface), when airships plied the trade routes, would-be gold miners were heading to the gold fields of Alaska, and steam-powered mechanicals stalked the waterfront, Karen is a young woman on her own, is making the best of her orphaned state by working in Madame Damnable's high-quality bordello. Through Karen's eyes we get to know the other girls in the house—a resourceful group—and the poor and the powerful of the town. Trouble erupts one night when a badly injured girl arrives at their door, beggin sanctuary, followed by the man who holds her indenture, and who has a machine that can take over anyone's mind and control their actions. And as if that wasn't bad enough, the next night brings a body dumped in their rubbish heap—a streetwalker who has been brutally murdered. Bear brings alive this Jack-the-Ripper yarn of the old west with a light touch in Karen's own memorable voice, and a mesmerizing evocation of classic steam-powered science.
