Ferry and Brandon's Cost Planning of Buildings Richard Kirkham,2013-02-05 Ferry and Brandon's Cost Planning of Buildings provides a comprehensive introduction to the practice and procedures of cost planning in the procurement of buildings. The eighth edition of this leading textbook has been thoroughly updated to reflect the significant changes that have occurred in the UK construction industry since the new millennium. Whilst retaining its core structure of the three-phase cost planning process originally developed by Ferry and Brandon, the text provides a thorough grounding in contemporary issues including procurement innovation, whole life-cycle costing and modelling techniques. Designed to support the core cost planning studies covered by students reading for degrees in quantity surveying and construction management, it provides a platform for understanding the fundamental importance of effective cost planning practice. The principals of elemental cost planning are covered from both pre- and post- contract perspectives; the role of effective briefing and client/stakeholder engagement as best practice is also reinforced in this text. In his revisions, Richard Kirkham reflects the many changes in the construction industry in the past eight years: procurement is given prominence early in the book; the changing role of the quantity surveyor and building economist is discussed, as is the crucial role they assume throughout the project life cycle. He emphasises the importance of early and collaborative working in the design team, as well as the impact of whole life-cycle costing.

Around the world, a community movement is underway featuring quaint landscape structures mounted on posts in front yards and other green spaces. Some are built for personal use, as miniature sheds for gardeners or as decorative accent pieces. More commonly, though, they are evidence of the growing trend toward neighborhood organization and community outreach. This movement has been popularized by Wisconsin-based Little Free Library (LFL), whose members currently include 75,000 stewards seeking to build community togetherness and promote reading at the same time by sharing books among neighbors. LFL has inspired builders to use similar structures to share things like CDs, food, garden tools, and seeds in the

community. Produced in cooperation with Little Free Library, Little Free Libraries and Tiny Sheds is the builder's complete source of inspiration and how-to knowledge. Illustrated throughout with colorful step-by-step photography and a gallery of tiny structures for further inspiration, Little Free Libraries and Tiny Sheds covers every step: planning and design, tools and building techniques, best materials, and 12 complete plans for structures of varying size and aesthetics. In addition, author and professional carpenter Phil Schmidt includes information on proper installation of small structures and common repairs and maintenance for down the road. Little Free Libraries and Tiny Sheds even includes information on how to become a steward, getting the word out about your little structure once it's up and running, and tips for building a lively collection. Community togetherness has never been so at the fore of our consciousness—or so important. Little Free Libraries and Tiny Sheds is one tool on the road to helping you build community in your neighborhood.

The House on Mango Street Sandra Cisneros, 2013-04-30 NATIONAL BESTSELLER • A coming-of-age classic about a young girl growing up in Chicago • Acclaimed by critics, beloved by readers of all ages, taught in schools and universities alike, and translated around the world—from the winner of the 2019 PEN/Nabokov Award for Achievement in International Literature. “Cisneros draws on her rich [Latino] heritage...and seduces with precise, spare prose, creat[ing] unforgettable characters we want to lift off the page. She is not only a gifted writer, but an absolutely essential one.” —The New York Times Book Review The House on Mango Street is one of the most cherished novels of the last fifty years. Readers from all walks of life have fallen for the voice of Esperanza Cordero, growing up in Chicago and inventing for herself who and what she will become. “In English my name means hope,” she says. “In Spanish it means too many letters. It means sadness, it means waiting. Told in a series of vignettes—sometimes heartbreaking, sometimes joyous—Cisneros’s masterpiece is a classic story of childhood and self-discovery and one of the greatest neighborhood novels of all time. Like Sinclair Lewis’s Main Street or Toni Morrison’s Sula, it makes a world through people and their voices, and it does so in language that is poetic and direct. This gorgeous coming-of-age novel is a celebration of the power of telling one’s story and of being proud of where you're from.

Here for It R. Eric Thomas, 2021-09-07 NATIONAL BESTSELLER • Read with Jenna Book Club Pick as Featured on Today • From the creator of Elle’s “Eric Reads the News,” a heartfelt and hilarious memoir-in-essays about growing up seeing the world differently, finding unexpected hope, and experiencing every awkward, extraordinary stumble along the way. “Pop culture—obsessed, Sedaris-level laugh-out-loud funny . . . [R. Eric Thomas] is one of my favorite writers.”—Lin-Manuel Miranda, Entertainment Weekly FINALIST FOR THE LAMBDA LITERARY AWARD • NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY TEEN VOGUE AND ONE OF THE BEST BOOKS OF THE YEAR BY O: The Oprah Magazine • NPR • Marie Claire • Men’s Health R. Eric Thomas didn’t know he was different until the world told him so. Everywhere he went—whether it was his rich, mostly white, suburban high school, his conservative black church, or his Ivy League college in a big city—he found himself on the outside looking in. In essays by turns hysterical and heartfelt, Thomas reexamines what it means to be an “other” through the lens of his own life experience. He explores the two worlds of his childhood: the barren urban landscape where his parents’ house was an anomalous bright spot, and the Eden-like school they sent him to in white suburbia. He writes about struggling to reconcile his Christian identity with his sexuality, the exhaustion of code-switching in college, accidentally getting famous on the internet (for the wrong reason), and the surreal experience of covering the 2016 election for Elle online, and the seismic changes that came thereafter. Ultimately, Thomas seeks the answer to these ever more relevant questions: Is the

future worth it? Why do we bother when everything seems to be getting worse? As the world continues to shift in unpredictable ways, Thomas finds the answers to these questions by reenvisioning what “normal” means and in the powerful alchemy that occurs when you at last place yourself at the center of your own story. Here for It will resonate deeply and joyfully with everyone who has ever felt pushed to the margins, struggled with self-acceptance, or wished to shine more brightly in a dark world. Stay here for it—the future may surprise you.

A Pattern Language Christopher Alexander,2018-09-20 You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you can use it to design an office, or a workshop, or a public building. And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely. The three books are The Timeless Way of Building, The Oregon Experiment, and this book, A Pattern Language. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not made by architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain languages, which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. Patterns, the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of the problem with an illustration, and a solution. As the authors say in their introduction, many of the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five hundred years as they are today.
