**The Us Navy's Fast Attack Submarines, Vol. 1** James C. Goodall, 2017 This illustrated book covers the complete history of the United States' Los Angeles class attack submarines from initial design and construction, through testing and trials, to its current operations. The nuclear-powered USS Los Angeles (SSN-688) class attack submarine represented the lead ship of the largest group of vessels constructed for the US Navy during the Cold War, and was purposefully designed for anti-submarine operations against the Soviets. Sixty-two boats were built and launched between 1976 and 1996, and the class continues to serve in force to this day. The exclusive and extensive photographic coverage of the boat's interior is featured here for the first time. Details of the boats' armament includes: four 21 bow-mounted torpedo tubes supporting the Mk 48 ADCAP torpedo series; Tomahawk (BGM-109) cruise missile; and Harpoon (UGM-84) anti-ship missile capability. The author's unprecedented access allows the reader a first time view of these submarines.

**Handprints on Hubble** Kathryn D. Sullivan, 2019-11-05 The first American woman to walk in space recounts her experience as part of the team that launched, rescued, repaired, and maintained the Hubble Space Telescope The Hubble Space Telescope has revolutionized our understanding of the universe. It has, among many other achievements, revealed thousands of galaxies in what seemed to be empty patches of sky; transformed our knowledge of black holes; found dwarf planets with moons orbiting other stars; and

measured precisely how fast the universe is expanding. In *Handprints on Hubble*, retired astronaut Kathryn Sullivan describes her work on the NASA team that made all this possible. Sullivan, the first American woman to walk in space, recounts how she and other astronauts, engineers, and scientists launched, rescued, repaired, and maintained Hubble, the most productive observatory ever built. Along the way, Sullivan chronicles her early life as a “Sputnik Baby,” her path to NASA through oceanography, and her initiation into the space program as one of “thirty-five new guys.” (She was also one of the first six women to join NASA’s storied astronaut corps.) She describes in vivid detail what liftoff feels like inside a spacecraft (it’s like “being in an earthquake and a fighter jet at the same time”), shows us the view from a spacewalk, and recounts the temporary grounding of the shuttle program after the Challenger disaster. Sullivan explains that “maintainability” was designed into Hubble, and she describes the work of inventing the tools and processes that made on-orbit maintenance possible. Because in-flight repair and upgrade was part of the plan, NASA was able to fix a serious defect in Hubble’s mirrors—leaving literal and metaphorical “handprints on Hubble.” *Handprints on Hubble* was published with the support of the MIT Press Fund for Diverse Voices.

**Who was who in America** ,1943 Provides brief profiles of notable Americans, as well as individuals whose careers were of regional or international significance, who died between 1969 and 1973, based on information provided by the person prior to his or her death, arranged alphabetically by surname. Includes an index to volumes one through five, and the historical volume.

*A Polar Bear in the Snow* Mac Barnett,2020-10-13 A majestic polar bear heads out on

a mysterious walk in a dazzling, playful collaboration from an exciting pair of picture-book creators. Follow a magnificent polar bear through a fantastic world of snow and shockingly blue sea. Over the ice, through the water, past Arctic animals and even a human . . . where is he going? What does he want? Acclaimed author Mac Barnett's narration deftly balances suspense and emotion, as well as poignant, subtle themes, compelling us to follow the bear with each page turn. Artist Shawn Harris's striking torn-paper illustrations layer white-on-white hues, with bolts of blue and an interplay of shadow and light, for a gorgeous view of a stark yet beautiful landscape. Simple and thought-provoking, illuminating and intriguing, this engaging picture book will have readers pondering the answer to its final question long after the polar bear has continued on his way.

Relentless Strike Sean Naylor, 2015-09-01 The New York Times Bestseller and Winner of the 2015 Army Historical Foundation Distinguished Writing Award for Unit History Since the attacks of September 11, one organization has been at the forefront of America's military response. Its efforts turned the tide against al-Qaida in Iraq, killed Bin Laden and Zarqawi, rescued Captain Phillips and captured Saddam Hussein. Its commander can direct cruise missile strikes from nuclear submarines and conduct special operations raids

anywhere in the world. Relentless Strike tells the inside story of Joint Special Operations Command, the secret military organization that during the past decade has revolutionized counterterrorism, seamlessly fusing intelligence and operational skills to conduct missions that hit the headlines, and those that have remained in the shadows-until now. Because JSOC includes the military's most storied special operations units-Delta Force, SEAL Team 6, the 75th Ranger Regiment-as well as America's most secret aviation and intelligence units, this is their story, too. Relentless Strike reveals tension-drenched meetings in war rooms from the Pentagon to Iraq and special operations battles from the cabin of an MH-60 Black Hawk to the driver's seat of Delta Force's Pinzgauer vehicles as they approach their targets. Through exclusive interviews, reporter Sean Naylor uses his unique access to reveal how an organization designed in the 1980s for a very limited mission set transformed itself after 9/11 to become the military's premier weapon in the war against terrorism and how it continues to evolve today.

**WCFS2020** Łukasz Piątek, Soon Heng Lim, Chien Ming Wang, Rutger de Graaf-van Dinther, 2021-08-05 This book highlights state-of-the-art research findings on floating developments in both inland and coastal waters with focus on living, recreation and working offshore. It includes six themes: (1) business case and real estate development, (2) spatial planning and architecture, (3) food and energy production, (4) ecological impact and nature-based solutions, (5) governance and social impact and (6) design and engineering of (infra)structures. The book presents key issues addressed when utilizing

water space. It gives an overview of findings and discussions from the world's leading experts from the industry, policymakers, entrepreneurs, researchers and identifies new opportunities as well as fosters collaboration on floating projects for a more climate-adaptive, socially inclusive, sustainable and better world.

**The League of Regrettable Superheroes** Jon Morris, 2015-06-02 Meet one hundred of the strangest superheroes ever to see print, complete with backstories, vintage art, and colorful commentary. You know about Batman, Superman, and Spiderman, but have you heard of Doll Man, Doctor Hormone, or Spider Queen? So prepare yourself for such not-ready-for-prime-time heroes as Bee Man (Batman, but with bees), the Clown (circus-themed crimebuster), the Eye (a giant, floating eyeball; just accept it), and many other oddballs and oddities. Drawing on the entire history of the medium, *The League of Regrettable Superheroes* will appeal to die-hard comics fans, casual comics readers, and anyone who enjoys peering into the stranger corners of pop culture.

Northwest Foraging Doug Benoiel, 2011-02-04 [CLICK HERE](#) to download the section on foraging for field mustard with four sample recipes from *Northwest Foraging* \* Suitable for novice foragers and seasoned botanists alike \* More than 65 of the most common edible plants in the Pacific Northwest are thoroughly described \* Poisonous plants commonly encountered are also included Originally published in 1974, *Northwest Foraging* quickly became a wild food classic. Now fully updated and expanded by the original author, this elegant new edition is sure to become a modern staple in backpacks, kitchens, and personal libraries. A noted wild edibles authority, Doug Benoiel provides more than 65 thorough descriptions of the most common edible plants of the Pacific

Northwest region, from asparagus to watercress, juneberries to cattails, and many, many more! He also includes a description of which poisonous look-alike plants to avoid -- a must-read for the foraging novice. Features include detailed illustrations of each plant, an illustrated guide to general plant identification principles, seasonality charts for prime harvesting, a selection of simple foraging recipes, and a glossary of botanical terms. Beginning with his botany studies at the University of Washington, Doug Benoliel has been dedicated to native plants. He has owned a landscaping, design, and nursery business, and done his extensive work with the National Outdoor Leadership School (NOLS). Doug lives on Lopez Island, Washington.

*From Cave Man to Cave Martian* Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one

would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

*Basics of Virtual Reality* Armin Grasnack, 2022-01-04 Today, the reality we know can be recorded and reproduced true to reality using technical processes. Space and time are recreated virtually as a copy in artificial reality. However, the reproduction of virtual reality is not limited to a mere copy of what exists. A visitor to the virtual space does not have to be content with the pixelated image of the old familiar, but can encounter unreal phenomena in the illusory world that never existed in real life or are even physically impossible. This enables an expansion of the recorded reality and allows the perception of surprisingly new perspectives. A perspective denotes the perception of a fact from a certain point of view and corresponds to the way of looking at things. But a perspective is also the observation of a scene from a viewing position. From different perspectives the illusion of reality arises during the reproduction by observation. This vision is not based on imagination or hallucination, but is the basic function of virtual reality. This book describes the concepts, systems, and technologies used to create virtual reality from its ancient beginnings to the present, and provides a glimpse into a possible future. This book is a translation of the original German 1st edition *Grundlagen der virtuellen Realität* by Armin Grasnack, published by Springer-Verlag GmbH Germany, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.

Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

**Matthew Brannon: Concerning Vietnam** Matthew Brannon, 2019-07-23 Brannon offers us a different perspective and, just maybe, a higher level of understanding when it comes to this great American disaster story. -Clive Martin, CNN New York-based artist Matthew Brannon (born 1971) has spent the past five years exhaustively researching the Vietnam/American War, seeking his own understanding of one of the most pivotal confrontations of the 20th century and translating that research into intricate silkscreen works that collage military documents, maps, logos, memoranda and contemporaneous ephemera. *Concerning Vietnam* distills a picture of the war and its ongoing effects in vivid, densely packed images that employ the bold graphic design for which the artist is known. Alongside these works are Brannon's notes on the objects and situations they depict, constructing a detailed chronology of the war and a complex overview of the consequences of US intervention in Southeast Asia. Designed by Studio LHOOQ in close collaboration with the artist, *Concerning Vietnam* collects the entire series of prints and texts, with a new essay on the work by curator Veronica Roberts and a conversation between the artist and Vietnam historian Mark Atwood Lawrence.
