Sukhoi Su-27 Flanker E. Gordon, Yefim Gordon, 1999 The Su-27 entered service with the Russian Air Force in the mid-1980s. This comprehensive history is based on documents supplied from Sukhoi, interviews with design and engineering employees of the company, and all available information that has been published on this deadly aircraft. Contains development history, operational service history, technical details, and explanations of each model in the range. Technical drawings, photos, and text combine to make this the ultimate Sukhoi Su-27 reference.

Flying beyond the stall Douglas A. Joyce, 2014 The X-31 Enhanced Fighter Maneuverability Demonstrator was unique among experimental aircraft. A joint effort of the United States and Germany, the X-31 was the only X-plane to be designed, manufactured, and flight tested as an international collaboration. It was also the only X-plane to support two separate test programs conducted years apart, one administered largely by NASA and the other by the U.S. Navy, as well as the first X-plane ever to perform at the Paris Air Show. *Flying Beyond the Stall* begins by describing the government agencies and private-sector industries involved in the X-31 program, the genesis of the supermaneuverability concept and its initial design breakthroughs, design and fabrication of two test airframes, preparation for the X-31's first flight, and the first flights of Ship #1 and Ship #2. Subsequent chapters discuss envelope expansion, handling qualities (especially at high angles of attack), and flight with vectored thrust. The book then turns to the program's move to NASA's Dryden Flight Research Center and actual flight test data. Additional tasking, such as helmet-mounted display evaluations, handling quality studies, aerodynamic parameter estimation, and a tailless study are also discussed. The book describes how, in the aftermath of a disastrous accident with Ship #1 in 1995, Ship #2 was prepared for its outstanding participation in the Paris Air Show. The aircraft was then shipped back to Edwards AFB and put into storage until the late 1990s, when it was refurbished for participation in the U. S. Navy's VECTOR program. The book ends with a comprehensive discussion of lessons learned and includes an Appendix containing detailed information.

Visual Aircraft Recognition U. S. Army, 2013-01-14 This manual is primarily a ready reference to assist the ground observer in aircraft recognition and identification. It provides information on current operational aircraft of the United States and foreign countries, which may be observed worldwide in the combat area. It can be used as source material for personnel conducting unit training in visual aircraft recognition. The procedures in this publication apply throughout the US Army. The data is based on the best information available at the time of publication; however, it is not all-inclusive because of some classification guidelines. This publication, by nature, has a built-in time lag, and some aircraft may still be under development or classified at the time of writing, but may be fielded or unclassified at, or after, publication.

The Chinese Navy Institute for National Strategic Studies, 2011-12-27 Tells the story of the growing Chinese Navy - The People's Liberation Army Navy (PLAN) - and its expanding capabilities, evolving roles and military implications for the USA. Divided into four thematic sections, this special collection of essays surveys and analyzes the most important aspects of China's naval modernization.

Technology and Nationalism Marco Adria, 2010-01-28 Revisiting Marshall McLuhan's work on the ways that technologies influence societies, Adria reconsiders the effects technologies have had on Canadian regionalism and nationalism. Offering key insights into media history, the author outlines the influence that newspapers, radio, and television have had in forming a mindset ready to welcome the internet age. As the digital revolution continues to shape the world into a global village, *Technology and Nationalism* provides a detailed and overdue reflection on the influence of technology on the social and political bonds we form and inhabit.

The Chinese Air Force Richard P. Hallion, Roger Cliff, Phillip C. Saunders, Center for the Study of Chinese Military Affairs (National Defense University), 2012-10-03 Presents revised and edited papers from a October 2010 conference held in Taipei on the Chinese Air Force. The conference was jointly organized by Taiwan's Council for Advanced Policy Studies, the Carnegie Endowment for International Peace, the U.S. National Defense University, and the RAND Corporation. This book offers a complete picture of where the Chinese air force is today, where it has come from, and most importantly, where

it is headed.

A Guide to the Russian Federation Air Force Museum at Monino B. Korolkov, V. Kazashvili, 1996 Deep in a green pine forest, some 38 kilometers from Moscow is the Russian Federation Air Force Museum at Monino - a truly unique collection. The museum is founded on a rich collection of full-scale aircraft exhibits, as well as helicopters, aircraft engines, armament and search-and-rescue equipment, and reflects the history of Russian and Soviet aviation development from 1909 to the present. Shaking the Heavens and Splitting the Earth Roger Cliff, 2011 Less than a decade ago, China's air force was an antiquated service equipped almost exclusively with weapons based on 1950s-era Soviet designs and operated by personnel with questionable training according to outdated employment concepts. Today, the People's Liberation Army Air Force (PLAAF) appears to be on its way to becoming a modern, highly capable air force for the 21st century. This monograph analyzes publications of the Chinese military, previously published Western analyses of China's air force, and information available in published sources about current and future capabilities of the PLAAF. It describes the concepts for employing forces that the PLAAF is likely to implement in the future, analyzes how those concepts might be realized in a conflict over Taiwan, assesses the implications of China implementing these concepts, and provides recommendations about actions that should be taken in response.

Fighter Wing Tom Clancy, John Gresham, 2007-09-04 The #1 New York Times bestselling master of the military genre puts readers right in the cockpit. Tom Clancy's explorations of America's armed forces reveal exclusive, never-before-seen information on the people and technology that protect our nation. Here, the acclaimed author takes to the skies with the U.S. Air Force's elite: the Fighter Wing. With his compelling style and unerring eye for detail, Clancy captures the thrill of takeoff, the drama of the dogfight, and the relentless dangers our fighter pilots face every day of their lives- showing readers what it really means to be the best of the best. This is the ultimate insider's look at an Air Force combat wing-the planes, the technology, and the people...with Tom Clancy behind the stick.

Russia's Military Modernisation: An Assessment The International Institute for Strategic Studies (IISS), 2020-09-29 This new IISS Strategic Dossier examines the recent development of Moscow's armed forces and military capabilities. It analyses the aspirations underpinning Russia's military reform programme and its successes as well as its failures. The book also provides insights into Russia's operational use of its armed forces, including in the intervention in Syria, the goals and results of recent state armament programmes, and the trajectory of future developments. This full-colour volume includes more than 50 graphics, maps and charts and over 70 images, and contains chapters on: Russia's armed forces since the end of the Cold War Strategic forces Ground forces Naval forces Aerospace forces Russia's approach to military decision-making and joint operations Economics and industry At a time when Russia's relations with many of its neighbours are increasingly strained,

and amid renewed concern about the risk of an armed clash, this dossier is essential reading for understanding the state, capabilities and future of Russia's armed forces.

Jane's how to Fly and Fight in the Mikoyan MiG-29 Fulcrum Jon Lake, 1997 Continuing the successful *At the Controls* Series, Jane's military hardware experts look at the excellent all-weather MiG-29 fighter, mainstay of the former Soviet air force. Simple, cheap, and reliable, the MiG-29 became its nation's frontline fighter, a job it has performed remarkably well for a decade. Special 30 full-color foldout details the MiG-29's instrumentation, capabilities, and tactics. 150 illustrations.

F-22 Raptor Steve Pace, 1999 Provides history on America's next generation of fighter plane, known as the F-22 Raptor.

Russia's Air Power at the Crossroads Benjamin S. Lambeth, 1996 This report assesses trends and prospects in Russian military aviation, drawing on the extensive reportage on air power in the Russian defense literature since the onset of glasnost in 1986.

Red Eagles Steve Davies, 2012-01-24 When two Navy F-14 Tomcats engaged and shot down two Sukhoi Su-22 jet fighters in 1981, they drew on experience and tactics that they had learned from a previous encounter with MiG jet fighters. The difference between the two encounters was that in the first, the enemy fighters were flown by American pilots assigned to a top secret squadron hidden at a remote airfield in the ultra-secret Tonopah Nuclear Test range, Nevada. In the second, the Sukhoi fighters were flown by Libyan pilots attempting to enforce Colonel Qadaffi's 'Line of Death' over the Gulf of Sidra. From the mid-1960s until the end of the Cold War, the United States Air Force acquired and flew Russian-made MiG jets, eventually creating a secret squadron dedicated to exposing American fighter pilots to enemy MiGs. Following underperformance in the Vietnam War, the USAF began to study MiGs in order to improve fighter pilot training. This then developed into the black Constant Peg program. In this program, MiGs were secretly acquired, and made airworthy, a difficult task without manuals or parts. A secret base was found to operate the planes from; and then ace pilots were found and trained to not only fly the assets, but fly them as they were flown by America's enemies. Finally, a program of exposing American fighter pilots to the MiGs was developed. In all, more than 1,600 American fighter pilots would train against America's secret MiGs between 1974 and 1989. Uncovering the story of the secret MiGs in America during the Cold War, and specifically Constant Peg and the 4477th Test & Evaluation Squadron, is a challenge because much of the information has been destroyed, or remains classified. To piece together the story of this group of men who provided America's fighter pilots with a level of training that was the stuff of dreams, author Steve Davies has interviewed over thirty of the Red Eagle pilots, along with other members of the squadron. This paperback edition includes new material on HAVE IDEA and other HAVE programs; making the MiGs airworthy in 1977 from the maintainers' perspective; and the intelligence activities of MiG expert at the Foreign Technology Division Mike Coyle. The result is a fascinating glimpse into a black program that enabled American fighter pilots to go into combat having already met and defeated their first MiG. Hardcover edition ISBN: 9781846033780

The Encyclopedia of Aerodynamics Frank Hitchens, 2015-11-25 The Encyclopedia of Aerodynamics was written for pilots at all levels from private pilot to airline pilot, military pilots and students of aerodynamics as a complete reference manual to aerodynamic terminology. General aerodynamic text books for pilots are relatively limited in their scope while aerodynamic text books for engineering students involve complex calculus. The references in this book, The Encyclopedia of Aerodynamics, are clearly described and only basic algebra is used in a few references but is completely devoid of any calculus - an advantage to many readers. Over 1400 references are included with alternative terms used where appropriate and cross-referenced throughout. The text is illustrated with 178 photographs and 96 diagrams. The Encyclopedia of Aerodynamics is an ideal aerodynamic reference manual for any pilot's bookshelf.

Flankers Yefim Gordon, 2001 The development of Russian military aviation did not end with the collapse of Communism. The Su-27 has seen considerable upgrading in recent years. In effect, all versions of the Su-27 Flanker from the Su-27M onwards can be regarded as a new generation of combat aircraft -- by Russian standards. The book describes how the Sukhoi Company strives to make

the most of a good design, adapting it to today's changing requirements by integrating new weapons and state-of-the-art avionics.

Sukhoi Su-27 Hans-Heiri Stapfer, 2007 The Soviet answer to the F-15 Eagle and response to the trend in US fighters design toward improved maneuverability. A supersonic all-weather counter-air fighter, the Su-27 is equipped with a look-down/shoot-down weapons system and beyond-visual-range air-to-air missiles. Its range, thrust-to-weight ratio and maneuverability are all significant improvements over earlier Soviet fighters; one of the world's foremost combat aircraft and a potent adversary. Over 200 color and b/w photos, line drawings and 10 color profiles; 80 pages.

Buy, Build, Or Steal Phillip Charles Saunders, Joshua K. Wiseman, 2011 This study identifies potential aviation technology development and procurement strategies, presents a general model of the options available to developing countries, and applies that model to explain Chinese procurement and aviation technology acquisition efforts over the last 60 years. The model articulates three main technology procurement avenues: purchase (buy), indigenous development (build), and espionage (steal), and three subavenues: reverse engineering (combining buy/steal and build), coproduction (combining buy and build), and codevelopment (combining buy and build, with an emphasis on build). It examines the costs, benefits, and tradeoffs inherent in each approach. Four variables influence decisions about the mix of strategies: (1) a country's overall level of economic development, in particular the state of its technical/industrial base; (2) the technological capacity of a country's military aviation sector; (3) the willingness of foreign countries to sell advanced military aircraft, key components, armaments, and related production technology; and (4) the country's bargaining power vis-à-vis potential suppliers.

Jane's Fighter Combat in the Jet Age David C. Isby, 1997-06-26 Fighter Combat in the Jet Age covers the entire history of jet fighters in action, from the end of World War II to the present. Meticulously detailed, it features 300 photos, line drawings and graphs that reveal how jet fighters and their weapons have developed and improved, utterly changing the face of air combat. It also focuses on the key technological developments of the Cold War, such as the fighters built to intercept nuclear bombers and to dominate European skies in a Third World War. With combat examples from Southeast Asia, the Falklands and the Middle East, Fighter Combat in the Jet Age compares and contrasts the fighter aircraft of different nations and manufacturers. Also included are spreads with sidebars and boxes describing fighter tactics, major air battles, experimental weapons and famous pilots. It's enough to thrill aircraft enthusiasts of all ages.
