*Stonehenge Unraveled* Peter Payack, 1982-01-01 Stonehenge Unraveled - The Original Parody of the Stonehenge Watch tells the story of Stonehenge in a zany and amusing way. This book comes with the purchase of the Stonehenge Watch at [www.stonehengewatch.com](http://www.stonehengewatch.com).

**Daily STEM** Chris Woods, 2020-09-07 From The Author: Has your school added a STEM class, or are you hoping to build more STEM into your school community? Buying a bunch of 3D printers and robot kits is a good start, but what does a sustainable STEM learning culture look like? This book will challenge you to think past the Daily STEM acronym and think about what it means to build a culture of STEM thinking in your school. You'll find plenty of practical tips and examples to make STEM relevant for every kid and infuse it into every classroom and every home in your community. Editorial Reviews: STEM can seem like such a big challenge for teachers and school leaders alike. We all want students engaged in meaningful, hands-on learning. But where do we begin? Start with Daily STEM. This awesome gift to educators by author Chris Woods is packed full of practical, logical, and easy steps teachers can and should take to bring STEM to life. It's like having Chris right there coaching you, helping you find STEM in everyday life. Daily STEM will have you building a culture of STEM in your school or classroom and bringing relevant learning to life. Darrin M Peppard, Ed.D. - Superintendent - Author of Road To Awesome - Renaissance Hall of Fame Chris' book Daily STEM is exactly what every teacher needs to promote curiosity and hands-on learning in the classroom. He prompts critical thinking and offers experiences that are fun and engaging for students. It is packed full of cool ideas and STEM inspiration-a must read!!! Jacie Maslyk - Educator - Author - STEM Enthusiast I absolutely love Daily STEM!! You will never be able to look at the world the same way after you read this gem! Hundreds of ideas will swirl through your head after each page. If you are searching for your teaching style, here it is: curiosity and connections. This is a book you will read more than once. Chris's personal stories will put a smile on your face as you reflect on your own stories. WOW Factor!! Epic! Dr. Frank Rudnesky - Educator - Author - Speaker - Consultant Daily STEM is a book I would normally have an aversion to! Teachers either love the idea of STEM, or they run as fast as they can when they hear the term. I used to run! Daily Stem offered me significant insight into so many ways educators can continue to provide STEM instruction/ideas and exploration across content areas and beyond the classroom walls. The Q and A style made Daily Stem an easy read. It also provided opportunity to revisit a question -and the answer- quite readily. A noisy classroom is a collaborative classroom. A messy classroom is an inventing classroom, sums up best practice and is a powerful reminder as we plan for the new school year! *Paper Engineering* Natalie Avella, 2006-01 This fascinating book will reveal that paper can be so much more than a flat surface on which to display text and images. Featuring work by some of the world's most innovative graphic designers, Paper Engineering explores the numerous possibilities of paper, from the simplest die-cut to the most complicated fold. It shows paper at its most surprising and interactive, and designers at their most creative. Divided into two broad sections covering

cutting and folding techniques, the book also features three interviews with some of the world's leading paper engineers, Ron van der Meer, Kate Farley, and Ed Hutchins. Their work demonstrates just how far paper can be pushed, revealing it as an essential design element in its own right.

**200 Science Investigations for Young Students** Martin Wenham, 2000-12-13 This book enables teachers to develop a complete range of basic investigations for science with students aged five to 11 years. It demonstrates how children can use hands-on activities to consolidate and extend their knowledge and understanding. Investigations are presented in a generic form, so that teachers can work through them and adapt them to meet the particular needs of their own classes. The presentation of activities ranges from highly-structured sequences of instructions and questions (with answers!), to more general discussions, depending on the approach needed and the likely variations in equipment and materials available. Each activity is aimed to help any teacher carry out significant scientific investigations with their class, and where necessary, to learn alongside them. - Almost every investigation and activity has been tested by the author. - Investigations use readily-available, non-specialist or recycled materials. The context of this book is children's need to learn through first-hand experience of the world around them. This book is an essential resource for teachers planning an effective science programme, or for student teachers needing to broaden their scientific knowledge and understanding. 200 Science Investigations for Young Students is the companion volume of activities which demonstrate the theories in Martin Wenham's Understanding Primary Science. The content has been guided by, but not limited to, The National Curriculum 2000 and the Initial Teacher Training Curriculum for Primary Science, issued by the Teacher Training Agency.

**The Paper Locksmith** Rob Ives, 1997-08 By its very purpose, the way that a lock mechanism works has to remain hidden from view and it is not easy to imagine what is happening inside. These three ingenious paper models of a combination lock, a mortice lock, and a 'Yale' style of barrel lock cover three main types. Also, there is an interesting minibook describing the historical development of lock design and possibilities for the future.

**Greenhouse Studies** Philippe Weisbecker, 2012 Tiré du site Internet de Nieves: Born in 1942, Weisbecker studied interior design in Paris. By 1968 he moved to New York. First working as a draftsman in an architectural firm, he started a career as an illustrator at the age of 30. His work has been published in major american publications such as the New York Times, Time magazine and The New Yorker among others. In the late 90's he shifted gradually from commissioned work to his own original production which he is now showing in galleries worldwide. Moving back to France in 2006, he is now sharing his time between Paris and Barcelona. In essence, Weisbecker's art consist of depicting elements of our daily life untouched by the sometime devastating effects of fashion's changing mood. These range from tools to appliances, from industrial buildings to public housing and, in the present case, greenhouses. Greenhouses were created for the purpose of preserving an inner world from the outside world. they haven't changed much over time. Their purpose created their form. There lies their eternal beauty. It is this beauty that Weisbecker invites us to share with him through his Greenhouses study book.
