Studies, Commission on Life Sciences, Committee on Diet and Health, 1989-01-01 Diet and Health examines the many complex issues concerning diet and its role in increasing or decreasing the risk of chronic disease. It proposes dietary recommendations for reducing the risk of the major diseases and causes of death today: atherosclerotic cardiovascular diseases (including heart attack and stroke), cancer, high blood pressure, obesity, osteoporosis, diabetes mellitus, liver disease, and dental caries.

Sunny Side Up Susan Calman, 2018-09-06 The Calmanifesto of Happiness 'One of the kindest people I have ever met - a beautiful dancer and a beautiful person' Kevin Clifton 'Be good, be kind, be more like Susan Calman' Kirstie Allsopp 'Be kind to yourself - read this book, keep it on your bedside table or on your Kindle - even Kindle has the word kind in it' Sandi Toksvig 'Full of wisdom and humour, with the soft underbelly of the profound' Fi Glover 'It's a warm, funny and delightful book that is sure to cheer even the grumpiest curmudgeon in your life' Woman and Home Susan Calman's enthusiasm at being on *Strictly Come Dancing* was an inspiration to all of us. *Cheer Up Love*, Susan's first book, had a clear aim: to help people understand depression. *Sunny Side Up* has a similarly clear path: to persuade people to be kinder to each other and spread more joy. These are extremely difficult and confusing times - people are cross and shouty. It's exhausting! But more than anything, people like Susan, people who don't hate other people, are apologising for the way that they think. Susan wants to make sure that they don't. She wants them to know that it's ok to love people and that kindness is something wonderful and brilliant. Above all, she wants them to bring on the joy. So the mission is simple. To get the nation to join her in not being negative. To bring back joy, kindness and community, to find that joy in the little things in life and defeat the hate and fear. Susan is a one-woman army of hope and joy, and she's ready to lead the nation in a different direction.

The Pedagogy of Standardized Testing Arlo Kempf, 2016-04-29 Based on a large-scale international study of teachers in Los Angeles, Chicago, Ontario, and New York, this book illustrates the ways increased use of high-stakes standardized testing is fundamentally changing education in the US and Canada with a negative overall impact on the way teachers teach and students learn. Standardized testing makes understanding students' strengths and weaknesses more difficult, and class time spent on testing consumes scarce time and attention needed to support the success of all students—further disadvantaging ELLs, students with exceptionalities, low income, and racially minoritized students.

Cheer Up Love Susan Calman, 2016-05-05 'DEEPLY HONEST, SURPRISINGLY HILARIOUS AND UPLIFTING' The Pool 'HEART-WARMING: UNMISSABLE' Damian Barr, Metro Susan Calman is a much-loved comedian and writer who has appeared on countless radio and television programmes from *The News Quiz* and *Just a Minute* to *Armchair Detectives* and *Secret Scotland*. She's hosted the podcast *Mrs Brightside* and stole the nation's hearts in *Strictly Come Dancing*. Her breakout solo stand up show, *Susan Calman is Convicted*, dealt with subjects like the death penalty, appearance and depression. It was the overwhelming and positive reaction to the show she wrote about mental health that made Susan want to write a more detailed account of surviving depression when you're the world's most negative and anxious person. The Crab of Hate is the personification of Calman's depression and her version of the notorious Black Dog. A constant companion all her life, the Crab has provided her with the best, and very worst of times. This is a very personal and affecting memoir of how, after many years and with a lot of help and talking, Susan has embraced her dark side and realised that she can be the most joyous sad person you'll ever meet. *CHEER UP LOVE IS FUNNY, POIGNANT AND (HOPEFULLY) INFORMATIVE. IT'S ALWAYS GOOD TO TALK AND TO REALISE YOU ARE NOT ALONE.*

Review of the Department of Homeland Security's Approach to Risk Analysis National Research Council, Committee to Review the Department of Homeland Security's Approach to Risk Analysis, 2010-10-10 The events of September 11, 2001 changed perceptions, rearranged national priorities, and produced significant new government entities, including the U.S. Department of Homeland Security (DHS) created in 2003. While the principal mission of DHS is to lead efforts to secure the nation against those forces that wish to do harm, the department also has responsibilities in regard to preparation for and response to other hazards and disasters, such as floods, earthquakes, and other natural disasters. Whether in the context of preparedness, response or recovery from terrorism, illegal entry to the country, or natural disasters, DHS is committed to processes and methods that feature risk assessment as a critical component for making better-informed decisions. Review of the Department of Homeland Security's Approach to Risk Analysis explores how DHS is building its capabilities in risk analysis to inform decision making. The department uses risk analysis to inform decisions ranging from high-level policy choices to fine-scale protocols that guide the minute-by-minute actions of DHS employees. Although DHS is responsible for mitigating a range of threats, natural disasters, and pandemics, its risk analysis efforts are weighted heavily toward terrorism. In addition to assessing the capability of DHS risk analysis methods to support decision-making, the book evaluates the quality of the current approach to estimating risk and discusses how to improve current risk analysis procedures. Review of the Department of Homeland Security's Approach to Risk Analysis recommends that DHS continue to build its integrated risk management framework. It also suggests that the department improve the way models are developed and used and follow time-tested scientific practices, among other recommendations.

Designing Effective Instruction Gary R. Morrison, Steven M. Ross, Howard K. Kalman, Jerrold E. Kemp, 2012-12-26 This book includes many new, enhanced features and content. Overall, the text integrates two success stories of practicing instructional designers with a focus on the process of instructional design. The text includes stories of a relatively new designer and another with eight to ten years of experience, weaving their scenarios into the chapter narrative. Throughout the book, there are updated citations, content, and information, as well as more discussions on learning styles, examples of cognitive procedure, and explanations on sequencing from cognitive load theory.

Capitalism and Environmental Collapse Luiz Marques, 2020-08-17 This book intends to be an alert to the fact that the curve measuring environmental costs against the economic benefits of capitalism has irreversibly entered into a negative phase. The prospect of an environmental collapse has been evidenced by the sciences and the humanities since the 1960s. Today, it imposes its urgency. This collapse differs from past civilizations in that it is neither local nor just civilizational. It is global and occurs at the broadest level of the biosphere, accelerated by the convergence of different socio-environmental crises, such as: Earth energy imbalance, climate change and global warming Sea-level rise Decrease and degradation of forests Collapse of terrestrial and aquatic biodiversity Floods, droughts, wildfires, and extreme weather events Degradation of soils and water resources Increase in pollution caused by fossil fuels and coal Increase in waste production and industrial intoxication The book is divided in two parts. In the first part it presents a comprehensive review of scientific data to show the already visible effects of each of the different environmental crises and its consequences to human life on Earth. In the second part, Luiz Marques critically discusses what he calls the three concentric illusions that prevent us from realizing the gravity of the current socio-environmental crises: the illusion of a sustainable capitalism, the illusion that economic growth is still capable of providing more well-being and the anthropocentric illusion.

Finally, Marques argues that fitting back into the biosphere will only be possible if we dismantle the expansive socioeconomic gear that has shaped our societies since the 16th century by moving from a Social Contract to a Natural Contract, which takes into account the whole biosphere. According to him, the future society will be post-capitalist or it will not be a complex society, and even perhaps, we must fear, no society at all. "This book is backed up with the latest and best science and has made the complexities understandable for the average reader, all in a context of hope for the future." - William J. Ripple, PhD, Distinguished Professor of Ecology, Director of the Alliance of World Scientists, Oregon State University

The European Blood and Marrow Transplantation Textbook for Nurses Michelle Kenyon,Aleksandra Babic,2018-03-14 This book is open access under a CC BY 4.0 license. This textbook, endorsed by the European Society for Blood and Marrow Transplantation (EBMT), provides adult and paediatric nurses with a full and informative guide covering all aspects of transplant nursing, from basic principles to advanced concepts. It takes the reader on a journey through the history of transplant nursing, including essential and progressive elements to help nurses improve their knowledge and benefit the patient experience, as well as a comprehensive introduction to research and auditing methods. This new volume specifically intended for nurses, complements the ESH-EBMT reference title, a popular educational resource originally developed in 2003 for physicians to accompany an annual training course also serving as an educational tool in its own right. This title is designed to develop the knowledge of nurses in transplantation. It is the first book of its kind specifically targeted at nurses in this specialist field and acknowledges the valuable contribution that nursing makes in this area. This volume presents information that is essential for the education of nurses new to transplantation, while also offering a valuable resource for more experienced nurses who wish to update their knowledge.

Magic Ernesto De Martino,2015 Though his work was little known outside Italian intellectual circles for most of the twentieth century, anthropologist and historian of religions Ernesto de Martino is now recognized as one of the most original thinkers in the field. This book is testament to de Martino's innovation and engagement with Hegelian historicism and phenomenology--a work of ethnographic theory way ahead of its time. This new translation of *Sud e Magia*, his 1959 study of ceremonial magic and witchcraft in southern Italy, shows how De Martino is not interested in the question of whether magic is rational or irrational but rather in why it came to be perceived as a problem of knowledge in the first place. Setting his exploration within his wider, pathbreaking theorization of ritual, as well as in the context of his politically sensitive analysis of the global south's historical encounters with Western science, he presents the development of magic and ritual in Enlightenment Naples as a paradigmatic example of the complex dynamics between dominant and subaltern cultures. Far ahead of its time, *Magic* is still relevant as anthropologists continue to wrestle with modernity's relationship with magical thinking.

Writing in Knowledge Societies Doreen Starke-Meyerring,Anthony Paré,2011-11-15 The editors of *WRITING IN KNOWLEDGE SOCIETIES* provide a thoughtful, carefully constructed collection that addresses the vital roles rhetoric and writing play as knowledge-making practices in diverse knowledge-intensive settings. The essays in this book examine the multiple, subtle, yet consequential ways in which writing is epistemic, articulating the central role of writing in creating, shaping, sharing, and contesting knowledge in a range of human activities in workplaces, civic settings, and higher education.

The Poet's Manual and Rhyming Dictionary Frances Stillman,1966 A useful aid for all committed and aspiring poets. A good rhyming dictionary is an essential tool for all writers of verse. This volume is compactly arranged to allow writers to find the rhymes they need quickly and easily.

What is a Disaster? Enrico Louis Quarantelli, 2005 What is a Disaster? Addresses the most basic question in the field: that of defining the phenomenon of study. For theoretical advancement, it is important that researchers begin to develop a consensus about the meaning of disasters and related phenomena. With the rise in international terrorism, one must clarify whether these events are disasters and if so, what kind of disasters. Similarly, in addition to natural disasters, do we include riots, explosions, nuclear power plant accidents, dam collapses, and land subsidence under the same conceptual umbrella? What practical and theoretical differences does it make if the same label is used or not used for such different situations? What is a Disaster? Brings together twelve social scientists representing eight disciplines and seven countries to share their definition and vision of disasters. In the process, a wide range of views are expressed and issues raised regarding the relationship of academic versus practical definitions, the impact of grouping types of disasters in different ways, and the epistemologies on which theoretical growth should rest. The forum provided involves the presentation of each author's views, followed by a discussant's critique, and closed with a response from the author. The editor's closes the volume with discussions of the theoretical framework of disaster research and an agenda for disaster research in the twenty-first century.

Rape Culture, Gender Violence, and Religion Caroline Blyth, Emily Colgan, Katie B. Edwards, 2018-03-29 This volume considers the complex relationships that exist between Christianity, rape culture, and gender violence. Each chapter explores the various roles that Christian theologies, teachings, and practices have played in shaping contemporary understandings of gender violence and in sanctioning rape-supportive cultural belief systems and practices. Our contributors explore this topic from a range of disciplinary perspectives, including theology, gender and queer studies, cultural studies, pastoral care, and counseling. Together, the chapters in this volume testify to the considerable influence that Christianity has had, and continues to have, in directing conversations within the Christian tradition around gender violence and rape culture. They therefore invite readers to engage fruitfully in these conversations, fostering transformative dialogues with the Christian community about our shared responsibility to tackle the current global crisis of gender violence.

The Social Medicine Reader Gail Henderson, 1997 To meet the needs of the rapidly changing world of health care, future physicians and health care providers will need to be trained to become wiser scientists and humanists in order to understand the social and moral as well as technological aspects of health and illness. The Social Medicine Reader is designed to meet this need. Based on more than a decade of teaching social medicine to first-year medical students at the pioneering Department of Social Medicine at the University of North Carolina, The Social Medicine Reader defines the meaning of the social medicine perspective and offers an approach for teaching it. Looking at medicine from a variety of perspectives, this anthology features fiction, medical reports, scholarly essays, poetry, case studies, and personal narratives by patients and doctors--all of which contribute to an understanding of how medicine and medical practice is profoundly influenced by social, cultural, political, and economic forces. What happens when a person becomes a patient? How are illness and disability experienced? What causes disease? What can medicine do? What constitutes a doctor/patient relationship? What are the ethical obligations of a health care provider? These questions and many others are raised by The Social Medicine Reader, which is organized into sections that address how patients experience illness, cultural attitudes toward disease, social factors related to health problems, the socialization of physicians, the doctor/patient relationship, health care ethics and the provider's role, medical care financing, rationing, and managed care.

What is a Disaster? E.L. Quarantelli, 2005-06-27 Are conflict situations such as the ethnic clashes in Yugoslavia or Rwanda, terrorist attacks and riots, the same kind of social

crises as those generated by natural and technological happenings such as earthquakes and chemical explosions? In *What is a Disaster?*, social science disaster researchers from six different disciplines advance their views on what a disaster is. Clashes in conceptions are highlighted, through the book's unique juxtaposition of the authors separately advanced views. A reaction paper to each set of views is presented by an experienced disaster researcher; in turn, the original authors provide a response to what has been said about their views. *What is a Disaster?* sets out the huge conceptual differences that exist concerning what a disaster is, and presents important implications for both theory, study and practice.

Ecology and Classification of North American Freshwater Invertebrates James H. Thorp, Alan P. Covich, 2010 The third edition of *Ecology and Classification of North American Freshwater Invertebrates* continues the tradition of in-depth coverage of the biology, ecology, phylogeny, and identification of freshwater invertebrates from the USA and Canada. This text serves as an authoritative single source for a broad coverage of the anatomy, physiology, ecology, and phylogeny of all major groups of invertebrates in inland waters of North America, north of Mexico. --Book Jacket.

Creating Spiritual and Psychological Resilience Grant H. Brenner, Daniel H. Bush, Joshua Moses, 2010-12-20 *Creating Spiritual and Psychological Resilience* explores the interface between spiritual and psychological care in the context of disaster recovery work, drawing upon recent disasters including but not limited to, the experiences of September 11, 2001. Each of the three sections that make up the book are structured around the cycle of disaster response and focus on the relevant phase of disaster recovery work. In each section, selected topics combining spiritual and mental health factors are examined; when possible, sections are co-written by a spiritual care provider and a mental health care provider with appropriate expertise. Existing interdisciplinary collaborations, creative partnerships, gaps in care, and needed interdisciplinary work are identified and addressed, making this book both a useful reference for theory and an invaluable hands-on resource.

The Modern Middle East Ilan Pappé, 2013-09-13 This hugely successful, ground-breaking book is the first introductory textbook on the Modern Middle East to foreground the urban, rural, cultural and women's histories of the region over its political and economic history. Ilan Pappé begins his narrative at the end of the First World War with the Ottoman heritage, and concludes at the present day with the political discourse of Islam. Providing full geographical coverage of the region, *The Modern Middle East* opens with a carefully argued introduction which outlines the methodology used in the textbook provides a thematic and comparative approach to the region, helping students to see the peoples of the Middle East and the developments that affect their lives as part of a larger world includes insights gained from new historiographical trends and a critical approach to conventional state- and nation-centred historiographies includes case studies, debates, maps, photos, an up-to-date bibliography and a glossarial index. This second edition has been brought right up to date with recent events, and includes a new chapter on the media revolution and the effect of media globalization on the Middle East, and a revised

and expanded discussion on modern Iranian history.

The World Health Report 2006 World Health Organization,2006-03-23 The 2006 World Health Report focuses on the chronic shortages of doctors, midwives, nurses and other health care support workers in the poorest countries of the world where they are most needed. This is particularly true in sub-Saharan Africa, which has only four in every hundred global health workers but has a quarter of the global burden of disease, and less than one per cent of the world's financial resources. Poor working conditions, high rates of attrition due to illness and migration, and education systems that are unable to pick up the slack reflect the depth of the challenges in these crisis countries. This report considers the challenges involved and sets out a 10-year action plan designed to tackle the crisis over the next ten years, by which countries can strengthen their health system by building their health workforces and institutional capacity with the support of global partners.
