The Flying-Machine from an Engineering Standpoint Frederick William Lanchester,2013-09 This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 edition. Excerpt: ...machines has been studied experimentally at the National Physical Laboratory, at the Aerodynamic Laboratory at Gottingen, and by M. F. Eiffel, in Paris. A few results relating to strut sections are given in Fig. 31a. The graph a a is a plotting from National Physical Laboratory data,² relating to the section A, representing one of the best forms tested, graphs b and c relating to sections B and C as determined by M. Eiffel.¹ In Fig. 31a ordinates represent resistance coefficient both in absolute units and in terms of normal plane (the normal plane unit being that of maximum section). In Fig. 316 are shown two strut-sections designed at the Royal Aircraft Factory. These were reported upon by the N.P.L. as giving less resistance for given strength than a number of others submitted. Approximately, strength for strength, 1 Report of the Advisory Committee for Aeronautics, 1912-1913, No. 83. J Report of the Advisory Committee for Aeronautics, 1912-1913, p. 111. 1 Resistance of the Air and Aviation, p. 184. 20 30 VELOCITY Fig. 31a. these gave one-fourth the resistance of struts of circular section.² The resistance of wires and ropes has been investigated both by the National Physical Laboratory and by Professor Prandtl of Gottingen. The position may be summarized here by saying that the resistance of a rope or stranded cable, at right angles to the direction of motion, is virtually equal to that of its area projected on a normal plane. The resistance of smooth wires is about 20 per cent. less. Both these results only hold good above a certain minimum value of LV, which may be taken at about 1-5; thus at 100 feet per second, the rule may be taken as applying to cables or wires down to about inch (= 0-015 foot) diameter.¹ Report of...

Flying Machine ,2007 Provides an introduction to the history of flight and explores the various aircraft in use today.

Modelling and Control of Mini-flying Machines Pedro Castillo,2007 Problems in the motion control of aircraft are of perennial interest to the control engineer as they tend to be of complex and nonlinear nature. Modelling and Control of Mini-Flying Machines is an exposition of models developed for various types of mini-aircraft : planar Vertical Take-off and Landing aircraft, helicopters, quadrotor mini-rotorcraft, other fixed-wing aircraft, blimps. For each of which it propounds: detailed models derived from Euler-Lagrange methods, appropriate nonlinear control strategies and convergence properties, real-time experimental comparisons of the performance of control algorithms, review of the principal sensors, on-board electronics, real-time architecture and communications systems for mini-flying machine control, including discussion of their performance, detailed explanation of the use of the Kalman filter to flying machine localization. To researchers and students in nonlinear control and its applications this book provides valuable insights to the application of real-time nonlinear techniques in an always challenging area.

The Delights of Wisdom Pertaining to Conjugal Love Emanuel Swedenborg,2019-11-25 The Delights of Wisdom Pertaining to Conjugal Love is a book by Emanuel Swedenborg, a Swedish theologian, scientist, thinker and mystic, here providing a thorough spiritual understanding of marriage love and sex. Excerpt: Spiritual cold in marriages is a disunion of souls and a disjunction of minds, whence come indifference, discord, contempt, disdain, and aversion; from which, in several cases, at length comes separation as to bed, chamber, and house. That these effects take place with married partners, while their primitive love is on the decline, and becomes cold, is too well known to need any comment. The reason is, because conjugal cold above all others resides in human minds; for the essential conjugal principle is inscribed on the soul, to the end that a soul may be propagated from a soul, and the soul of the father into the offspring. Hence it is that this cold originates there, and successively goes downward into the principles thence derived, and infects them; and thus changes the joys and delights of the primitive love into what is sad and undelightful.

Aviation Systems Andreas Wittmer,Thomas Bieger,Roland Müller,2011-08-17 This book aims to provide comprehensive coverage of the field of air transportation, giving attention to all major aspects, such as aviation regulation, economics, management and strategy. The book approaches aviation as an interrelated economic system and in so doing presents the “big picture” of aviation in the market economy. It explains the linkages between domains such as politics, society, technology, economy, ecology, regulation and how these influence each other. Examples of airports and airlines, and case studies in each chapter support the application-oriented approach. Students and researchers in business administration with a focus on the aviation industry, as well as professionals in the industry looking to refresh or broaden their knowledge of the field will benefit from this book.

A Scientist Explores Spirit George F. Dole,Robert H. Kirven,1997 Richly illustrated, the book includes a chronology of the life of Swedish scientist-turned-seer Emanuel Swedenborg (1688-1772), a bibliography of his works, and an outline of his key theological concepts.

Heaven and Hell Emanuel Swedenborg,1758

The spirits' book Allan Kardec,2021-11-11 After you have read The Spirits' Book, you will no longer have any reason to fear death. The Spirits' Book will provide you with the answers to nearly all the questions you may have with regards to the origin, nature and destiny of each and every soul on earth – and those of other worlds as well. It also addresses the issues of God, creation, moral laws and the nature of spirits and their relationships with humans. The book contains answers that were dictated to mediums by highly evolved spirits who love God. The Spirits' Book is the initial landmark publication of a Doctrine that has made a profound impact on the thought and view of life of a considerable portion of humankind since the first French edition was published in 1857.

Fire in the Minds of Men James H. Billington,1999 This book traces the origins of a faith--perhaps the faith of the century. Modern revolutionaries are believers, no less committed and intense than were Christians or Muslims of an earlier era. What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority. This inherently implausible idea energized Europe in the nineteenth century, and became the most pronounced ideological export of the West to the rest of the world in the twentieth century. Billington is interested in revolutionaries--the innovative creators of a new tradition. His historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian Revolution in the early twentieth century. The theater was Europe of the industrial era; the main stage was the journalistic offices within great cities such as Paris, Berlin, London, and St. Petersburg. Billington claims with considerable evidence that revolutionary ideologies were shaped as much by the occultism and proto-romanticism of Germany as the critical rationalism of the French Enlightenment. The conversion of social theory to political practice was essentially the work of three Russian revolutions: in 1905, March 1917, and November 1917. Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power. Despite his hard realism about the adverse practical consequences of revolutionary dogma, Billington appreciates the identity of its best sponsors, people who preached social justice transcending traditional national, ethnic, and gender boundaries. When this book originally appeared The New Republic hailed it as remarkable, learned and lively, while The New Yorker noted that Billington pays great attention to the lives and emotions of individuals and this makes his book absorbing. It is an invaluable work of history and contribution to our understanding of political life.

Window to Eternity Bruce Henderson,2010 Is there life after death? If so, what is it like? Bruce Henderson draws from Swedenborg's writings to paint a vivid picture of life after death and the road that we can all take to heaven.

Cardiovascular Biomechanics Peter R. Hoskins,Patricia V. Lawford,Barry J. Doyle,2017-02-16 This book provides a balanced presentation of the fundamental principles of cardiovascular biomechanics research, as well as its valuable clinical applications. Pursuing an integrated approach at the interface of the life sciences, physics and engineering, it also includes extensive images to explain the concepts discussed. With a focus on explaining the underlying principles, this book examines the physiology and mechanics of circulation, mechanobiology and the biomechanics of different components of the cardiovascular system, in-vivo techniques, in-vitro techniques, and the medical applications of this research. Written for undergraduate and postgraduate students and including sample problems at the end of each chapter, this interdisciplinary text provides an essential introduction to the topic. It is also an ideal reference text for researchers and clinical practitioners, and will benefit a wide range of students and researchers including engineers, physicists, biologists and clinicians who are interested in the area of cardiovascular biomechanics.
