Nanoscale Quantum Materials Tapash Chakraborty,2021-08-01 In the past four decades, there has been growing interest in the exciting new topic of physics in low dimensions. Thousands of original ideas have been proposed in the literature, and some are confirmed experimentally, along with several Nobel prizes which have been awarded in this field. While there are several books available, almost all are technical and accessible only to expert researchers. This book provides an accessible introduction to the field, with less emphasis on technical details. Whilst this book does not provide a traditional history of nano-science, instead it uses simple explanations and case studies as vehicles to explain key discoveries and the importance of them, enabling readers without a background in the area to gain an understanding of some aspects of nanoscale physics. It will be of interest to researchers working in condensed matter physics, in addition to engineers and advanced students in those disciplines. It also remains accessible to 'physics enthusiasts' from other academic disciplines, as technical details are contained within boxes and footnotes which can be skipped for a general reading of the book. Features: - Provides an accessible introduction to a technical subject - Contains exciting developments from the cutting-edge science being conducted in the area - Authored by a recognised expert in the field

A Letter to Tia Don Landy,2013-07-11 Author Don Landy provides canine and feline pet owners with a first person look at grief and grieving in a way that may surprise you. Don Landy never expected to have a dog in his life. After falling for a German shepherd named Sabrina and spending nearly eleven years together, Landy found himself sitting on the floor holding the lifeless body of his beloved dog in his arms and sobbing uncontrollably. Reeling from the loss he vows never again to take a pet, and thereby sets himself up for the inevitable pain that most pet owners experience when the end approaches. *A Letter to Tia: Grief. Grieving. The Love, Pain and Loss of a Friend* is his personal account of coming face-to-face with grief and grieving. Pet owners of all ages will find comfort, insight, and at times humor in this reflective, life-affirming story of love and loss. *A Letter to Tia* recounts Landy's past and present struggle with the loss of pets. He starts with the death of his show cat, Charlie Brown, twenty-five years ago and continues through to the recent diagnosis received by Tia, his German shepherd. After the previous loss of Sabrina, Landy and his wife accepted Tia into their lives with understandable trepidation. To insure they made the right move they test the relationship between Tia and their kitten Holly and discover they have become fast friends. However, when Tia is diagnosed with inoperable cancer at four years old, the author finds himself staring down the prospect of consuming sadness over the grim forecast for her survival. Landy chooses to process his grief full-on, identifying the tremendous toll that loss takes on pet owners, and how best to cope with the emotions that accompany it. With a life enriched by memories of his meaningful times with Tia, Landy's book addresses this exceptional feeling of loss, while also offering proof that miracles do happen. A moving tribute to the strong love that is forged between pets and pet owners, *A Letter to Tia: Grief. Grieving. The Love, Pain and Loss of a Friend* is sure to provide readers with a good cry, and a good laugh, as his compassionate, deeply felt, and surprising book celebrates this extraordinary bond.

*Human Rights Discourse in a Global Network* Lena Khor,2016-05-13 In her innovative study of human rights discourse, Lena Khor takes up the prevailing concern by scholars who charge that the globalization of human rights discourse is becoming yet another form of cultural, legal, and political imperialism imposed from above by an international human rights regime based in the Global North. To counter these charges, she argues for a paradigmatic shift away from human rights as a hegemonic, immutable, and ill-defined entity toward one that recognizes human rights as a social construct comprised of language and of language use. She proposes a new theoretical framework based on a global discourse network of human rights, supporting her model with case studies that examine the words and actions of witnesses to genocide (Paul Rusesabagina) and humanitarian organizations (Doctors Without Borders). She also analyzes the language of texts such as Michael Ondaatje's *Anil's Ghost*. Khor's idea of a globally networked structure of human rights discourse enables actors (textual and human) who tap into or are linked into this rapidly globalizing system of networks to increase their power as speaking subjects and, in so doing, to influence the range of acceptable meanings and practices of human rights in the cultural sphere. Khor's book is a unique and important contribution to the study of human rights in the humanities that revitalizes viable notions of agency and liberatory network power in fields that have been dominated by negative visions of human capacity and moral action.

*France* International Monetary Fund,2001-11-05 The growth rate of real hourly wages in France has fallen below the trend growth rate of total factor productivity. The distribution of wage and earnings growth has not been uniform across deciles. A breakdown in employment growth by wage deciles also suggests important composition changes. The development of key labor market variables has been discussed in this note. Microeconometric estimations provide evidence of an outward shift in the relationship between wages and unemployment that is independent of changes in labor demand taxes and unemployment income.
