Artificial Intelligence and the Future of Defense Stephan De Spiegeleire,Matthijs Maas,Tim Sweijts,2017-05-17 Artificial intelligence (AI) is on everybody's minds these days. Most of the world's leading companies are making massive investments in it. Governments are scrambling to catch up. Every single one of us who uses Google Search or any of the new digital assistants on our smartphones has witnessed first-hand how quickly these developments now go. Many analysts foresee truly disruptive changes in education, employment, health, knowledge generation, mobility, etc. But what will AI mean for defense and security? In a new study HCSS offers a unique perspective on this question. Most studies to date quickly jump from AI to autonomous (mostly weapon) systems. They anticipate future armed forces that mostly resemble today's armed forces, engaging in fairly similar types of activities with a still primarily industrial-kinetic capability bundle that would increasingly be AI-augmented. The authors of this study argue that AI may have a far more transformational impact on defense and security whereby new incarnations of 'armed force' start doing different things in novel ways. The report sketches a much broader option space within which defense and security organizations (DSOs) may wish to invest in successive generations of AI technologies. It suggests that some of the most promising investment opportunities to start generating the sustainable security effects that our polities, societies and economies expect may lie in the realms of prevention and resilience. Also in those areas any large-scale application of AI will have to result from a preliminary open-minded (on all sides) public debate on its legal, ethical and privacy implications. The authors submit, however, that such a debate would be more fruitful than the current heated discussions about 'killer drones' or robots. Finally, the study suggests that the advent of artificial super-intelligence (i.e. AI that is superior across the board to human intelligence), which many experts now put firmly within the longer-term planning horizons of our DSOs, presents us with unprecedented risks but also opportunities that we have to start to explore. The report contains an overview of the role that 'intelligence' - the computational part of the ability to achieve goals in the world - has played in defense and security throughout human history; a primer on AI (what it is, where it comes from and where it stands today - in both civilian and military contexts); a discussion of the broad option space for DSOs it opens up; 12 illustrative use cases across that option space; and a set of recommendations for - especially - small- and medium sized defense and security organizations.

Building a Lifeline for Freedom Salome Samadashvili,2014-11-02 PDF of this book can be downloaded from: <http://martenscentre.eu/publications/building-lifeline-freedom-eastern-partnership-20> The Eastern Partnership (EaP) Initiative is the bridge which connects Europe to the countries in its eastern neighbourhood. Those countries were left out of the cycle of peaceful development, which the European project brought to the continent following the Second World War. It aspires to transform these countries into more democratic and prosperous societies. Over the last five years, the EaP has achieved more in some partner countries than in others. Structural policy weaknesses and different socio-economic realities of the partner states notwithstanding, the main challenge to the success of the EaP has come from Russia, which chose to view this policy as a zero-sum game for geopolitical dominance in its shared neighbourhood with Europe. This paper argues that in order to achieve the desired transformations, the EaP needs a fresh start, focusing on different players, methods and political technologies. Failure of the EaP to achieve its goal could deprive another generation of Georgians, Moldovans, Ukrainians and others in the EaP countries of an opportunity for a better life.

Seismicity in Mines G. Gibowicz,2012-12-06 Recent seismological research has focused on processes other than pure shear failure (double-couple) as an alternative mechanism for some types of seismic events. This has been stimulated by what appears to be anomalous focal mechanisms observed for several earthquakes of possible volcanic nature in the 1980 Mammoth Lakes, California sequence (JULIAN and SIPKIN, 1985; SIPKIN, 1986). Although studies have concentrated on earthquakes associated with magmatic processes, possible non-double-couple seismic failure has been observed, but not widely known, in cases of mine seismicity in the past three decades. Such cases have occurred on a world-wide basis; however, no cases until now have been observed in the United States. The existence of non-double-couple failure in mine seismicity has been controversial as it has been for tectonic/volcanic earthquakes. Several of the benchmark studies of mine seismicity in the deep South African gold mines have resulted in the belief that no fundamental distinction in the source mechanism exists between tectonic earthquakes and rock bursts (MCGARR, 1984); both types of events are the result of pure shear failure. However, the reported cases of implanational focal mechanisms for mine seismicity continue to increase in number and prolong the controversy. During the summer of 1984, a three-dimensional, high resolution micro earthquake network was operated by Woodward-Clyde Consultants (WCC) in the vicinity of two coal mines beneath Gentry Mountain in the eastern Wasatch Plateau of central Utah.

Reading in Russia Damiano Rebecchini,2016-08-12 "Reader, where are you?", wondered, in the mid-1880s, Mikhail Saltykov-Shchedrin, one of the Russian writers that paid the most attention to the readership of his time. Saltykov-Shchedrin's call did not go unanswered. Over the past two centuries, various disciplines - from the social sciences to psychology, literary criticism, semiotics, historiography and bibliography - alternately tried to outline the specific features of the Russian reader and investigate his function in the history of Russian literary civilization. The essays collected in this volume follow in the tradition but, at the same time, present new challenges to the development of the discipline. The contributors, coming from various countries and different cultures (Russia, the US, Italy, France, Britain), discuss the subject of reading in Russia - from the age of Catherine II to the Soviet regime - from various perspectives: from aesthetics to reception, from the analysis of individual or collective practices, to the exploration of the social function of reading, to the spread and evolution of editorial formats. The contributions in this volume return a rich and articulated portrait of a culture made of great readers.

Badenheim Nineteen-thirty-nine Aharon Apelfeld,1980 A tale of Europe in the days just before the war. It tells of a small group of Jewish holiday makers in the resort of Badenheim in the Spring of 1939. Hitler's war looms, but Badenheim and its summer residents go about life as normal.

The Media City Scott McQuire,2008-02-21 If only more new media commentators had this level of historical-critical reference, engaging, good stories, and a degree of wonder at what media and windows bring to the city, to life. - John Hutnyk, Goldsmiths, University of London Just when you thought the last word had been said about

cities and media, along comes Scott McQuire to breathe new life into the debate. When revisiting existing pathways, his always ingenious eyes produce startling and original insights. When striking out into new territory, he opens up before us inspiring new vistas. I love this book. - James Donald, University of New South Wales A book that crams into a single chapter more insights and illustrations than seems feasible, yet which ties all threads together through a consistent, theoretically rich analysis of the interplay of media and city... Writing with effusiveness uncharacteristic of back-cover blurbs on academic tomes, James Donald says 'I love this book'. But I will end by echoing his praise, and make a promise to readers: you will love *The Media City*, too. - European Journal of Communication Refreshingly clear, getting to grips with some of the key concepts of urban sociology in a way that moves beyond the wistful evocation and splatter of undigested terms that characterises so much academic writing on culture and cities. - Media, Culture & Society Significant changes are occurring in the spaces and rhythms of contemporary cities and in the social functioning of media. This forceful book argues that the redefinition of urban space by mobile, instantaneous and pervasive media is producing a distinctive mode of social experience. Media are no longer separate from the city. Instead the proliferation of spatialized media platforms has produced a media-architecture complex - the media city. Offering critical and historical analysis at the deepest levels, *The Media City* links the formation of the modern city to the development of modern image technologies and outlines a new genealogy for assessing contemporary developments such as digital networks and digital architecture, web cams and public screens, surveillance society and reality television. Wide-ranging and thoughtfully illustrated, it intersects disciplines and connects phenomena which are too often left isolated from each other to propose a new way of understanding public and private space and social life in contemporary cities. It will find a broad readership in media and communications, cultural studies, social theory, urban sociology, architecture and art history. Winner of the 2009 Jane Jacobs Urban Communication Award, awarded by the Urban Communication Association.

The Patriotism of Despair Serguei Alex. Oushakine, 2011-02-23 The sudden dissolution of the Soviet Union altered the routines, norms, celebrations, and shared understandings that had shaped the lives of Russians for generations. It also meant an end to the state-sponsored, nonmonetary support that most residents had lived with all their lives. How did Russians make sense of these historic transformations? Serguei Alex. Oushakine offers a compelling look at postsocialist life in Russia. In Barnaul, a major industrial city in southwestern Siberia that has lost 25 percent of its population since 1991, many Russians are finding that what binds them together is loss and despair. *The Patriotism of Despair* examines the aftermath of the collapse of the Soviet Union, graphically described in spray paint by a graffiti artist in Barnaul: We have no Motherland. Once socialism disappeared as a way of understanding the world, what replaced it in people's minds? Once socialism stopped orienting politics and economics, how did capitalism insinuate itself into routine practices? Oushakine offers a compelling look at postsocialist life in noncosmopolitan Russia. He introduces readers to the neocoms: people who mourn the loss of the Soviet economy and the remonetization of transactions that had not involved the exchange of cash during the Soviet era. Moving from economics into military conflict and personal loss, Oushakine also describes the ways in which veterans of the Chechen war and mothers of soldiers who died there have connected their immediate experiences with the country's historical disruptions. The country, the nation, and traumatized individuals, Oushakine finds, are united by their vocabulary of shared pain.

Muzzling the Bear Salome Samadashvili, 2015-06-01 Russia has once again positioned itself as an adversary of the West and issued a new challenge to European security at its borders. It is also ideologically challenging the Western model of political and economic liberalism. How the EU responds to this challenge might define Europe for the foreseeable future. Designing strategies to counter Russian propaganda in Europe should be one of the central components of Europe's response to Russia's challenge.

Lyric Complicity Daria Khitrova, 2019 Blending close literary analysis with social and cultural history, Daria Khitrova shows how poetry lovers of the period all became nodes in a vast network of literary appreciation and constructed meaning. Poetry during the Golden Age was not a one-way avenue from author to reader. Rather, it was participatory, interactive, and performative.

Literature, History and Identity in Post-Soviet Russia, 1991-2006 Rosalind J. Marsh, Rosalind Marsh, 2007 The aim of this book is to explore some of the main pre-occupations of literature, culture and criticism dealing with historical themes in post-Soviet Russia, focusing mainly on literature in the years 1991 to 2006. --introd.

Artificial Intelligence in the 21st Century Stephen Lucci, Danny Kopec, 2015-12-10 This new edition provides a comprehensive, colorful, up-to-date, and accessible presentation of AI without sacrificing theoretical foundations. It includes numerous examples, applications, full color images, and human interest boxes to enhance student interest. New chapters on robotics and machine learning are now included. Advanced topics cover neural nets, genetic algorithms, natural language processing, planning, and complex board games. A companion DVD is provided with resources, applications, and figures from the book. Numerous instructors' resources are available upon adoption. eBook Customers: Companion files are available for downloading with order number/proof of purchase by writing to the publisher at info@merclearning.com. FEATURES: • Includes new chapters on robotics and machine learning and new sections on speech understanding and metaphor in NLP • Provides a comprehensive, colorful, up to date, and accessible presentation of AI without sacrificing theoretical foundations • Uses numerous examples, applications, full color images, and human interest boxes to enhance student interest • Introduces important AI concepts e.g., robotics, use in video games, neural nets, machine learning, and more thorough practical applications • Features over 300 figures and color images with worked problems detailing AI methods and solutions to selected exercises • Includes DVD with resources, simulations, and figures from the book • Provides numerous instructors' resources, including: solutions to exercises, Microsoft PP slides, etc.

River Channel Restoration Andrew Brookes,F. Douglas Shields,1996 River Channel Restoration summarises the current state of the art for river channel, floodplain and catchment restoration, and provides practical guiding principles for river managers. Fundamental principles are illustrated with case studies and experiences in a wide range of settings, principally Northern Europe and North America. An objective is to guide river managers away from trial and error approaches to appraisal and design. A multi-functional approach to restoration projects is needed, encompassing disciplines such as hydrology, hydraulics, geomorphology, water quality, ecology and landscape. Although concentrating on abiotic factors, this book will be of considerable interest to all disciplines with an interest in restoration. Contributors include university scientists, researchers, and practitioners from regulatory and consultancy organisations.

Mont Terri Rock Laboratory, 20 Years Paul Bossart,Alan Geoffrey Milnes,2017-12-20 The international Mont Terri rock laboratory in Switzerland plays a central role in the safety and construction of deep geological nuclear repositories in clay formations. The laboratory has developed and refined a range of new measurement and evaluation methods: it has e.g. advanced the determination of rock parameters using innovative borehole geophysics, improved the methodology for characterizing pore-water and microbial activity in claystones, and greatly improved our understanding of diffusion and retention processes of radionuclides in and through claystones. The methods and insights described in this compendium can also be applied to low-permeability rocks at various sites around the globe, and in other fields of application.
