Buyology Martin Lindstrom,2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Woodswoman Anne Labastille,1991-10-11 Ecologist Anne LaBastille created the life that many people dream about. When she and her husband divorced, she needed a place to live. Through luck and perseverance, she found the ideal spot: a 20-acre parcel of land in the Adirondack mountains, where she built the cozy, primitive log cabin that became her permanent home. Miles from the nearest town, LaBastille had to depend on her wits, ingenuity, and the help of generous neighbors for her survival. In precise, poetic language, she chronicles her adventures on Black Bear Lake, capturing the power of the landscape, the rhythms of the changing seasons, and the beauty of nature's many creatures. Most of all, she captures the struggle to balance her need for companionship and love with her desire for independence and solitude. Woodswoman is not simply a book about living in the wilderness, it is a book about living that contains a lesson for us all.

The Predictive Retailer Andrew Pearson,2017-10-23 The Predictive Retailer is a retail company that utilizes the latest technological developments to deliver an exceptional personalized experience to each and every customer. Today, technology such as AI, Machine Learning, Augmented Reality, IoT, Real-time stream processing, social media, and wearables are altering the Customer Experience (CX) landscape and retailers need to jump aboard this fast moving technology or run the risk of being left out in the cold. The Predictive Retailer reveals how these and other technologies can help shape the customer journey. The book details how the five types of analytics-descriptive, diagnostic, predictive, prescriptive, and edge analytics-affect not only the customer journey, but also just about every operating function of the retailer. An IoT connected retailer can make its operations smart. Connected devices can help with inventory optimization, supply chain management, labor management, waste management, as well as keep the retailer's data centers green and its energy use smart. Social media is no longer a vanity platform, but rather it is a place to both connect with current customers as well as court new ones. It is also a powerful branding channel that can be utilized to both understand a retailer's position in the market, as well as a place to benchmark its position against its competitors. Today, technology moves at break-neck speed and it can offer the potential of anticipatory capabilities, but it also comes with a confusing variety of technological terms--Big Data, Cognitive Computing, CX, Data Lakes, Hadoop, Kafka, Personalization, Spark, etc., etc. The Predictive Retailer will help make sense of it all, so that a retail executive can cut through the confusing technological jargon and understand why a Spark-based real-time stream processing data stream might be preferable to a TIBCO Streambase one, or an IBM Streaming Analytics one. This book will help retail executives break through the technological clutter so that they can deliver an unrivaled customer experience to each and every patron that comes through their doors.

They fail to understand the clinical picture of ADD and how it impacts the organizing process often making their advice irrelevant or frustrating when put into application. This is a book that has ADD-Friendly advice with the ADDer in mind. This collaboration brings forth the best underlying understanding with the most effective and practical remedy from ADD experts in two important fields -- professional organization and clinical psychology. Finally, it offers organizing advice that ranges from self-help to utilizing the help of non-professionals, to using professional assistance. Thus it permits the reader to decide where they are at personally in the organizing process, and what level of support will be most beneficial to their unique situation.
